

5.0 Acknowledgements

The staff of AES wishes to thank MARC, and in particular Tom Jacobs, Scott Paszkiewicz, and Andrea Repinsky, for their inspiration and vision, which set the course for this project. Walt Foster and others at the EPA were also very helpful in establishing the technical foundation for this project. Data came from many sources, but in particular, AES wishes to thank the following due to the large commitment they made in providing assistance: EPA, MDC, KBS, MARC, MS DIS, DASC, NRCS, U.S. Army Corps of Engineers, and Johnson County Automated Information Mapping System (AIMS) and other local governments. PBA, especially Patti Banks and Laurie Brown, shared expertise, time, and office space to bring this project to completion.
