

ENERGIZE MISSOURI

MISSOURI DEPARTMENT OF NATURAL RESOURCES

Building Energy Standards are Beneficial for Missouri.

Energize Missouri Building Energy Standards Workshops will illustrate the far-reaching benefits associated with adopting and enforcing the latest International Energy Conservation Code (IECC) in an attempt to gain a stronger statewide involvement.

If all municipalities in Missouri adopted and enforced the model energy code statewide in 2011, the state would have saved \$318 million annually in energy costs by 2030.

Workshop Topics

- Residential Buildings Presentation 1:
Awareness & Requirements of the 2012 IECC
- Residential Buildings Presentation 2:
Building Modifications & Enforcing the 2012 IECC
