Background Information

For each category, please indicate which, if any, strategies from the Congestion Management Toolbox have been implemented in the project location and describe their benefits.

- Highway** _____
- Transit** _____
- Bicycle and Pedestrian** _____
- Travel Demand Management** _____
- ITS and TSM** _____
- Access Management** _____
- Land Use** _____
- Parking Management** _____
- Other** _____

SOV Capacity Analysis

Explain why additional capacity is needed on the facility. Please include information related to the causes and severity current and future congestion. To the extent possible, describe congestion in terms of congestion related performance measures established in the long-range transportation plan.

Has an Environmental Assessment (EA) or Environmental Impact Statement (EIS) been completed in the project corridor? If so, please describe how strategies from the Congestion Management Toolbox were considered by the environmental study.

For each category, please indicate and describe which, if any, strategies from the Congestion Management Toolbox are included in the project scope.

- Highway** _____
- Transit** _____
- Bicycle and Pedestrian** _____
- Travel Demand Management** _____
- ITS and TSM** _____
- Access Management** _____
- Land Use** _____
- Parking Management** _____

Please describe how the project sponsor's commitment to implementing the strategies listed above.
