Procedure:

To ensure the 30-day compliance with the above regulation, all direct service providers will determine whether a child or enrolled pregnant woman has an ongoing source of continuous accessible health care provided by a health care professional and has health insurance coverage. Said healthcare professional maintains the person’s ongoing health record and is not primarily a source of emergency or urgent care services.

MAHS and direct service providers will:

- Determine as to whether a child or enrolled pregnant woman has a medical home, dental home and health insurance at time of intake.
- Review the completed Portrait of a Healthy Child, Portrait of a Healthy Pregnancy, Health History & Nutrition Assessments and health insurance documents received or not received at time of intake to make this determination. Any of these documents received or completed at orientation can be used to make this determination.
- If a child is determined to not have a medical home, dental home and/or health insurance, direct service providers will follow MAHS Policy and Procedure 1000 to assist families in accessing a source of care and/or health insurance to ensure all children have an ongoing source of health care. For a pregnant woman, direct service providers will use the Portrait of a Healthy Pregnancy to support the determination of accessing a source of care and/or health insurance.
- MAHS and direct service providers will monitor in ChildPlus using the ChildPlus Procedures for Health, to ensure the Source of Health Care date is entered within 30 days of entry.

This is a one-time event and will not be updated during the program year.
