Purpose

To prioritize KCDC activities and output production

Mission

The KCDC will use available data to provide regional and local health information to the community and identify gaps in existing data sources and work to fill these gaps by producing (collecting, analyzing, and interpreting) missing/necessary population based data for the Kansas City Metropolitan Area, which consists of Leavenworth, Wyandotte, and Johnson counties in Kansas, Platte, Clay, Cass, Jackson, and Ray counties in Missouri and the cities of Independence and Kansas City, Missouri.

Vision

KCDC will become a regional leader in disseminating health data that is easy to use and translatable into improved health at both the local and regional levels. KCDC will seek to be involved in the improvement processes of current data use systems, advocating for data consistency and functionality for the user. KCDC will provide information on data use, interpretation, and quality to users of KCDC data. KCDC will collaborate on data use projects with other local and regional organizations. Additionally, KCDC will assess trending needs for workforce development.

Agenda

1. Introductions
2. Review January minutes
3. Status report on data use agreement formalizations
4. Status report on maternal and child health indicators work
5. Review data concerns with KHIN and LACIE. Discuss potential project to collaborate on, as offered by KHIN.
6. Housekeeping
7. Adjourn

Notes

- Meeting minutes approved
  - Motion by Erin to approve
  - Second by Kari
- Data use agreement formalizations
  - Tabled for next meeting, as those working on project not able to attend
- Maternal and child health indicators
  - Elizabeth H., Vince, Andy and Becca had done initial work on this. Indicators have been
compiled for both sides of state line
  o Some indicators are similar, but not a perfect match because of different definitions for numerator or denominator
  o Next steps will be to 1) identify indicators that are identical, 2) prioritize indicators by need on both sides of state line
  o Ellen suggested using a narrative, rather than strictly data tables or graphs, for this document
  o Elizabeth W. will work on prioritizing this list for the next meeting
• KHIN & LACIE discussion
  o Cost and exactly how data would be shared are the major concerns
  o Discussed desire to do proof of concept project, but would need to know if they plan on charging anything and how KCDC would have access to data
  o Other concerns from LHD perspective: where data would be stored, network security issues
  o Ellen wanted to know how each org handles deduplication of records; Elizabeth W. will ask
  o Kari suggested getting Sedgwick County’s input on their experience getting a data request from KHIN and will follow up with them.
  o Elizabeth W proposed leveraging KHIN and LACIE’s proof of concept proposal to create burden document on Heron & Opiate abuse and overdose in KC Metro; the Heroin & Opiates Steering Committee has a surveillance workgroup tasked with identifying data sources and getting accurate description of the problem in KC Metro.
  o Elizabeth W provided an initial outline for a proposed burden document for group to review
  o Group agreed this was a good project; several suggestions included looking at zip code or census tract level to identify jurisdictions with high rates of abuse or overdose
  o Andy offered to send presentation he did earlier this month on Heroin and Opiates in MO; will send to Elizabeth W who will then send out to group.
  o Group agreed that this will be a standing topic at future meetings. The Heroin and Opiates Steering committee surveillance work group will meet monthly, and interested KCDC members are welcome to attend those meetings.
• Johnson County Experience with CASPER
  o Ellen wanted to know about Johnson County’s experience using CASPER for their community health assessment; as no one from JoCo was in attendance, Elizabeth W said she would follow up with them and ask if they would be willing to do a short presentation or talk at next meeting on experiences and lessons learned.
• Next meeting
  o Scheduled for May 2016
  o A conference line will be available

NEXT STEPS/ ACTION ITEMS
E Walsh
  • Prioritize list of maternal and child health indicators
  • Follow up with KHIN and LACIE on proposal to work with KCDC, propose work on heroin and opiates overdose, ask about deduplication issues
  • Ask Johnson County if would like to present on experience using CASPER for CHA
K Neill
  • Follow up with Sedgwick County on experience working with KHIN
Everyone
  • Review attached documents
