Purpose

To prioritize KCDC activities and output production

Mission

The KCDC will use available data to provide regional and local health information to the community and identify gaps in existing data sources and work to fill these gaps by producing (collecting, analyzing, and interpreting) missing/necessary population based data for the Kansas City Metropolitan Area, which consists of Leavenworth, Wyandotte, and Johnson counties in Kansas, Platte, Clay, Cass, Jackson, and Ray counties in Missouri and the cities of Independence and Kansas City, Missouri.

Vision

KCDC will become a regional leader in disseminating health data that is easy to use and translatable into improved health at both the local and regional levels. KCDC will seek to be involved in the improvement processes of current data use systems, advocating for data consistency and functionality for the user. KCDC will provide information on data use, interpretation, and quality to users of KCDC data. KCDC will collaborate on data use projects with other local and regional organizations. Additionally, KCDC will assess trending needs for workforce development.

Agenda

1. Introductions
2. Review September minutes
5. Election of new chair
6. Adjourn

Notes

- Status Report on Heroin & Opiates Surveillance work
  - Johnson County has identified opioid overdose as priority for CHIP under Mental Health & Substance Abuse. One of the data points they have talked about using is EMS Narcan administration data.
  - Somoza spoke with representatives from the state of MO who work on the ESSENCE surveillance project. They expressed interest in presenting to KCDC and also discussing
ways it is used at the local level and what we would need to make the most out of the application. They could potentially present at January meeting.

- The data workgroup for the Kansas City Opioid Crisis Task Force is working on a 4-6 page document that will be published by the Greater KC Health Foundation. KCDC members will receive a draft before it is released to the public for feedback and for preparation for any questions that may arise after the release.
- St. Louis is beginning a project to track opiates. This may or may not be related to the ordinances passed by St. Louis City, St. Louis County and St. Charles County to implement a local PDMP. Jackson County passed an ordinance to implement a local PDMP with these other jurisdictions. KCMO Neighborhoods & Safety Committee heard an ordinance the week before, but there were numerous questions and further discussion of the ordinance has been tabled until Nov 30th.

**MCH Indicators**
- Johnson County had prepared GIS maps for every priority indicator. Group had small changes to make to the maps to make them easier to interpret.
- Maps chosen to be highlighted in a 2-4 page document were those on fetal & infant death, breast feeding, first trimester care and low birth weight. Group discussed telling a story with the data.
- All maps and a data table would be included in an appendix.
- Clay County had worked on an infographic that could be customized to each jurisdiction.
- Group needs to decide whether infographic should be incorporated into document or used separately. Alternatively, parts of the infographic could be included in the document.
- X Somoza talked about adding data about maternal risk factors to help tell the story. Will check to see what are included in the HP 2020 list.
- Questions arose about what the Jackson County estimates include (just Eastern Jackson County or all of Jackson County, incl. KCMO) as well as what year MO began collecting breastfeeding data. E Walsh will follow up with A Hunter.
- There was discussion on possibly doing a separate fact sheet for adolescent health.

**Election of new chair**
- New co-chairs are X Somoza and D Vernberg
- Group agreed that still wanted to meet in a central location, will see if can meet at MARC offices.
- The 2nd Wednesday at 2:00 PM was agreed as a good time for a standing meeting for the group.

**Next meeting**
- The next meeting will be January 11th, 2:00 PM – 3:30 PM, location TBD
- A conference call line will be available

---

**NEXT STEPS/ ACTION ITEMS**

**E Walsh**
- Follow up with A Hunter on MCH questions
- Reach out to MARC about meeting location

**Johnson County**
- Edits to MCH maps

**X Somoza**
- Review HP 2020 indicators for maternal risk factors
