<td>Christina Haynie</td>
<td></td>
</tr>
</tbody>
</table>

Purpose

To prioritize KCDC activities and output production

Mission

The KCDC will use available data to provide regional and local health information to the community and identify gaps in existing data sources and work to fill these gaps by producing (collecting, analyzing, and interpreting) missing/necessary population based data for the Kansas City Metropolitan Area, which consists of Leavenworth, Wyandotte, and Johnson counties in Kansas, Platte, Clay, Cass, Jackson, and Ray counties in Missouri and the cities of Independence and Kansas City, Missouri.

Vision

KCDC will become a regional leader in disseminating health data that is easy to use and translatable into improved health at both the local and regional levels. KCDC will seek to be involved in the improvement processes of current data use systems, advocating for data consistency and functionality for the user. KCDC will provide information on data use, interpretation, and quality to users of KCDC data. KCDC will collaborate on data use projects with other local and regional organizations. Additionally, KCDC will assess trending needs for workforce development.

Agenda

1. Introductions
2. Review September minutes
3. Presentation and discussion on MCH indicator list
4. Discussion on data request formalization group
5. Miscellaneous items
6. Adjourn

Notes

- MCH Indicators
  - MO State provided updates on coding changes that may be contributing to discrepancies in SIDS death across the states
  - Kansas representatives will complete the document for Kansas and their jurisdictions
  - Ultimately, this project will produce two deliverables: one presenting our limitations and data discrepancies to be used in preparation for Healthy People 2030 and second a metro wide report on 10 or so MCH indicators
  - We will discuss indicators to include in the report at the January 2016 meeting

- Data exchange agreement
Dr. Somoza, M Hynek, E Lawlor, and M Onsongo met prior to the KCDC meeting to discuss the data exchange agreement formalization process
A letter to hospital CEOs and health directors will be drafted to discuss importance of data sharing

- Additional information
  - Discussed Johnson County, Kansas' experience with CASPER for their CHA
  - Discussed inviting MCH coalition to future meeting (probably March 2016 meeting) to work on MCH indicators
  - Discussed inviting LACIE and KHIN to present at January 2016 meeting (want to begin thinking about data use guidelines, EHR vendors, data standardization, and technical recommendations for vendors)
  - Discussed life expectancy and confidence interval calculations- worksheet available at SEPHO website; Missouri State also has SAS code

- Next meeting
  - The next meeting will be planned for January 2016
  - A conference call line will be available
