Call if You Can...

About the Regional 9-1-1 System

The Mid-America Regional Council (MARC) serves as the coordinating agency for the Kansas City Regional 9-1-1 System, which handles more than 1.6 million emergency calls each year.

The system is served by 41 public safety answering points (PSAPs) operated by government agencies in the nine-county bistate region.

Public Safety Answering Points

Unified Government of Wyandotte County/Kansas City, Kansas

Text if You Can’t.

Text to 9-1-1 service is now available in the Greater Kansas City metro, which includes Cass, Clay, Jackson, Platte and Ray counties in Missouri, and Johnson, Leavenworth, Miami and Wyandotte counties in Kansas. All four major cell phone companies, including AT&T, Sprint, T-Mobile, and Verizon, now offer this service to their wireless customers.

Text to 9-1-1 should ONLY be used in an emergency and in circumstances when you cannot safely call 9-1-1.

Important Tips for Sending Texts to 9-1-1

Text to 9-1-1 should ONLY be used in an emergency and in circumstances when you cannot safely call 9-1-1.
Things to remember when sending a text to 9-1-1

- Include your exact location and the nature of your emergency.
- Use clear, simple language. Abbreviations and slang may create more confusion and delay response time.
- Do not text and drive. Not only is this dangerous, but it is illegal in most states. Please pull over to a safe location and stop your car prior to sending a text to 9-1-1.
- Do not copy other people on a text sent to 9-1-1.

- Don’t attach pictures or videos to a text message to 9-1-1.
- If you are in an area where text to 9-1-1 service is not available, you will get a “bounce back” message telling you to make a voice call instead.
- Silence the ringtone on your phone if the noise may compromise your safety. If you stop responding to text messages from the 9-1-1 center, the dispatcher may need to call to check on your safety.

When texting 9-1-1 might be better than calling

- If you are deaf or hard of hearing.
- If you are unable, for medical reasons, to speak into the phone.
- If your safety would be compromised if you spoke out loud — for example, during a home invasion or abduction.
- If your cell signal isn’t strong enough for a voice call to go through.

When NOT to call or text 9-1-1

- When there is no emergency.
- If an animal is hurt or lost (Call your city or county animal services instead).
- As a joke or prank.
- To report that electricity or other utilities are off.
- To report traffic jams.
- To ask about government services or general information.

Scenarios when it would be best to call 9-1-1

- To report a crime in progress.
- To report a fire.
- To save a life.
- Anytime an emergency response is required by law enforcement, fire or emergency medical personnel.

Texts sent to 9-1-1 have a 160-character limit, just like other text messages.

Most importantly, remember to call if you can and text only when you can’t call. Providing essential information to a 9-1-1 telecommunicator is much faster by voice than text. Texting is not always instantaneous.
