NATIONAL RESPONSE CENTER

EPCRA Section 302 requires facilities to notify state and local authorities of any extremely hazardous substances on site in excess of the threshold planning quantity.
EPCRA Section 303 requires facilities to designate a facility coordinator and develop emergency response plans for accidental chemical releases.
EPCRA Section 304 requires facilities where an hazardous substance is released in excess of the reportable quantity to report the event to proper authorities as soon as possible.
EPCRA Section 311 requires facilities to have Material Safety Data Sheets for chemicals held in amounts that exceed certain quantities.
EPCRA Section 312 requires facilities to submit Tier II reports with details about quantities and storage of specific chemicals to state and local authorities each year.
EPCRA Section 313 requires facilities to report annually on the release of certain toxic chemicals into air, land, water or transfer of these chemicals to waste treatment/disposal facilities.
