LinkforCare.org is an online database that connects to many regional resources.

LinkforCare.org is a regional online database of resources that can help area residents of all ages and abilities gain greater access to services in the Kansas City metropolitan area. Using this comprehensive directory, users can access resources in 12 service categories:

- Agencies and Associations
- Food and Nutrition
- Personal Services
- Health Care Services
- Transportation
- Housing Choices
- Safety and Security
- Mental Health
- Financial Help
- Care Management
- Caregiver Resources
- Legal Concerns

Find help in 5 easy steps:

1. Login to: [www.linkforcare.org](http://www.linkforcare.org)

2. Select: Search for Services — There are 12 main service categories, ranging from Agencies and Associations to Transportation.

3. Select: Service category

4. Select: A Neighborhood — This is optional but could be helpful if looking for more detailed information on routes.

5. Find Providers: A detailed listing of providers and contact information for your search will be displayed.

The Link for Care project was made possible with a grant from the Federal Transit Administration’s Veterans Transportation and Community Living Initiative. Area partners, including the University of Kansas Medical Center, the Mid-America Regional Council, University of Missouri—Kansas City Center for Nonprofit Leadership and Churn Creative, redeveloped an existing database that combines current resources with a user-friendly navigation menu and contemporary design.
