REQUEST FOR PROPOSALS

A. PURPOSE AND INTRODUCTION

The Mid-America Regional Council (MARC) seeks consulting services to complete the Greenwood Connected plan for the City of Greenwood, Missouri.

The PSP Program provides local governments with financial support to advance detailed local planning and project development activities in support of *Creating Sustainable Places, Connected KC 2050's* Activity Centers and Corridors framework, and the Mid-America Regional Council's adopted policy statement on regional land use direction. This project is one of 15 across the region chosen for funding through the Planning Sustainable Places Program.

B. CREATING SUSTAINABLE PLACES INITIATIVE

In October 2010, a consortium of more than 60 regional partners, led by the Mid-America Regional Council, received a \$4.25 million planning grant from the U.S. Department of Housing and Urban Development to advance the implementation of the Regional Plan for Sustainable Development, [Creating Sustainable Places](#).

Creating Sustainable Places is not only a regional vision and plan to guide how we grow and develop, but a strategy for moving our communities from planning to action. This strategy includes the following steps:

- Organizing for Success – Building on the region's strong track record of collaboration to provide leadership, coordinate outreach and education activities, broaden public understanding of and involvement in sustainability issues, and strengthen stakeholder capacity to address them.
- Enhancing Decision Making – Developing new tools, policies and practices necessary to make sound investments and accelerate sustainable development.
- Demonstrating New Models – Applying these new tools to key corridors and activity centers through demonstration projects that can help transform the ways neighborhoods and communities grow and develop.

The 2013 Planning Sustainable Places Program (PSP) combined funds dedicated to the demonstration projects component of Creating Sustainable Places and the Livable Communities Surface Transportation/Bridge Program awards to provide local governments with financial support to advance detailed local planning and project development activities. The program received 37 applications and funded 18 projects.

The 2015, 2017, 2019 and 2021 Planning Sustainable Places Programs (PSP) were funded solely through the Livable Communities Surface Transportation Program and thus funding was only available to jurisdictions and other government entities within the eight county MARC metropolitan planning organization boundary. In 2015, the program received 27 applications and funded 13 projects. In 2017, the program received 36 applications and funded 25 projects. In 2019, the program received 24 applications and funded 12 projects. In 2021, the program received 30 applications and funded 14 projects.

The Creating Sustainable Places Initiative and the region's long-range plan, *Connected KC 2050 (CKC 2050)* outline a need to focus efforts on promoting concepts consistent with sustainable communities and place a focus on advancing site specific and project specific activities in support of these objectives. Projects awarded funding will be consistent with those goals.

The 2023 Planning Sustainable Places program will continue to serve as a single local government assistance program intended to specifically respond to these goals and facilitate the following objectives:

Program Objectives:

- Support the development and implementation of local activity center plans consistent with Creating Sustainable Places principles, identified regional activity centers, and the land use policy direction outlined in *Connected KC 2050*.
- Support localized public engagement and community consensus building.
- Support the identification and conceptualization of land use strategies, transportation projects, and related sustainable development initiatives that help to realize and advance the objectives identified in the Creating Sustainable Places initiative, *Connected KC 2050*, and the MARC Board’s adopted policy statement on regional land use direction.
- Support the conceptualization, development, and implementation of Creating Sustainable Places projects.

Additional information about the [Planning Sustainable Places](#) program and the [Creating Sustainable Places](#) initiative can be found on the MARC website, www.marc.org.

The focus of this request for proposals (RFP) is to create a Sustainable Places Plan that addresses the following key priorities for the City of Greenwood, Missouri:

- Determine Best Path of Trail for Greenwood Connector
- Downtown / Main Street Study
 - Allendale Lake Rd to 150 Bridge over Big Creek
 - Walkability / Pedestrian Improvements Focus
- Opportunity Analysis, Needs Assessment

C. PROJECT BACKGROUND

There are two primary goals of the Greenwood Connected project. The first goal is to plan for and engage the community on the alignment of the Rock Island Trail through the City of Greenwood. The second goal is to plan a range of improvements for downtown Greenwood, including better walkability, economic vitality, placemaking, stormwater improvements, safety improvements, and more as determined by the study. The southern expansion of the Rock Island Trail creates an opportunity to dovetail these goals into one planning exercise and possibly one construction project. The City of Greenwood desires to create more connectivity between neighborhoods and Downtown Greenwood, including the Elementary School. In addition, missing sidewalks, lack of traffic control, limited parking, and lack of curb and gutter contribute to a less than ideal visitor experience. Improving Downtown Greenwood will create an opportunity for economic development in preparation for the expansion of the Rock Island Trail into Greenwood. This project will be a direct partnership between Greenwood and Jackson County.

D. SCOPE OF SERVICES

Project Overview

This project is a partnership between the City of Greenwood and Jackson County. The Greenwood Connected Plan has two primary goals. First, the community should be engaged to

determine the alignment of the Rock Island Trail through the City of Greenwood. Second, this engagement effort should also assist in planning a range of improvements to downtown Greenwood.

Context and Plan Review

The consultant should review relevant plans and studies to prepare the Greenwood connected plan, including the City of Greenwood Comprehensive Plan, Greenwood Stormwater Study, Rock Island Trail Creating Sustainable Places Study, Main Street Traffic Study, Osawatomie's Oz Commons Plan, Louisburg Master Trail Plan, Great American Rail-Trail Economic Impact Study, and the GAP Economic Study.

Deliverables: existing plan review

Public Engagement and Stakeholder Coordination

A robust and equitable public engagement process is required to meet the needs of Greenwood and the requirements of the Planning Sustainable Places program. Vital stakeholders for this project include Greenwood residents, local businesses, houses of worship, Greenwood Elementary School, the Planning Commission, and the Parks and Recreation Board.

The public should be engaged to determine the route alignment for the Rock Island Trail and potential downtown improvements. This work should include at least one public forum for residents to review potential recommendations. The consultant and project staff will work together to determine the best public engagement and stakeholder strategy for the project.

Deliverables: stakeholder engagement plan, public engagement plan, meeting schedule, meeting materials, presentation of final plan to Greenwood Board of Alderman.

Infrastructure Planning

The Greenwood Connected Plan will identify possible alignment routes for the Rock Island Trail. Additionally, it will provide prioritized recommendations for downtown Greenwood that would increase walkability and economic vitality including sidewalk improvements, roadway safety improvements, and parking optimization. These recommendations should be driven by resident input but grounded in best planning and engineering practices. Additionally, the infrastructure recommendations should be coordinated with the ARPA funded stormwater study to maximize the improvements achieved by both plans.

Deliverables: conceptual designs for Rock Island Trail alignment and downtown improvements

Greenwood Connected

Greenwood Connected will plan improvements to downtown Greenwood and alignment of the Rock Island Trail to improve walkability, economic vitality, and tourism in Greenwood. This plan will be presented to and adopted by the Greenwood Board of Alderman.

Deliverables: final Greenwood Connected Plan

All questions/requests for clarifications must be submitted in writing to MARC by **January 18 2023 at noon CST.**

Please submit questions in writing to **Beth Dawson** at bdawson@marc.org.

MARC will post all questions, answers and clarifications to <https://www.marc.org/about-marc/funding-and-rfps>.

J. CONTRACT AWARD

From the firms expressing interest, a committee will review the submittals and rank the firms. Short listed firms will be notified to schedule an interview.

The remaining firms will be notified by letter after the agreement is approved by the Board.

Awarding of the final contract is subject to the acceptance of the grant by the MARC Board and a signed funding agreement between the City of Greenwood, Missouri and MARC.

K. PROJECT BUDGET

The award of this contract will be based on a **qualifications-based selection process** that may include in-person interviews followed by the successful negotiation of costs and fees. The selected firm should be prepared to provide cost and fee information within two days of their notification of selection for negotiation. If the City cannot come to an agreement with the first choice firm on costs and fees, then the City may choose to terminate those negotiations and begin negotiations with the second firm on the scoring list or terminate all negotiations and issue another RFP for these services at a later date. The budget maximum is \$40,250.

L. PERIOD OF PERFORMANCE: End date of August 15, 2022.

Both the project budget and the period of performance are subject to change based on the availability of funds or other unforeseen events or activities.
