2025 Annual Air Quality Survey

Executive Summary

Overview and Methodology

Between April and June 2025, the Mid-America Regional Council (MARC) conducted an Annual Air Quality Survey of residents in the metropolitan Kansas City area. The survey is part of an ongoing effort to measure the impact that air quality education efforts have had on the public's overall awareness and behavior. The Annual Air Quality Survey provides a benchmark for objectively evaluating the sustained impact of air quality education. The survey has been conducted annually since 1998.

ETC Institute selected a stratified random sample of households in the metropolitan Kansas City area to complete the survey. The sample was address-based and was stratified to ensure the completion of at least 800 surveys, with 160 surveys in each of the following counties: Wyandotte and Johnson Counties in Kansas and Clay, Platte and Jackson Counties in Missouri. Text messages were sent to residents in the sample encouraging participation and included a link to an online version of the survey, which was provided in both English and Spanish.

A total of 835 households completed the survey. The number completed for each county was: 160 in Clay, 166 in Jackson, 175 in Johnson, 166 in Platte, and 168 in Wyandotte. The results for the random sample of 835 households have a 95% level of confidence with a precision of at least +/- 3.4%. Individual survey responses were weighted to reflect the actual population of each county within the five-county region. The latest census data show the following population distribution by county in the MARC Air Quality region: 14% in Clay, 39% in Jackson, 32% in Johnson, 6% in Platte, and 10% in Wyandotte.

Major findings from the 2025 Annual Air Quality Survey are highlighted on the following pages. A complete set of the results is provided in the next three sections of this report. Comparisons with previous years are addressed in the "TREND DATA" graphs. Items identified as "*statistically significant*" changes were changes of more than 3.4% from 2024 to 2025.

Major Findings

PERCEPTIONS OF AIR QUALITY IN THE KC METRO AREA

- Eighty-two percent (82%) of the residents surveyed were “very” or “somewhat concerned” about the health consequences of poor air quality in the Kansas City area. This was 4% higher than in 2024. In 1998, 88% of residents surveyed were “very” or “somewhat concerned” about the health consequences of poor air quality in the Kansas City area.
- Forty-nine percent (49%) of residents felt air pollution in the Kansas City area was “getting much worse” or “getting somewhat worse,” 36% felt it was “staying the same,” 6% felt it was “getting somewhat better,” 2% felt it was “getting much better” and 6% did not know.

IMPACT OF AIR QUALITY EDUCATION EFFORTS

- Sixty-six percent (66%) of residents felt their level of awareness about air quality issues in the Kansas City area was the same compared to last year, 27% felt they were more aware, 6% felt they were less aware, and 1% did not know or indicated the question was not applicable to their situation because they did not live in the area during the last year. The percentage of residents who felt they were “more aware” of air quality issues was the same as it was in 2024 (27%).
- Thirty-seven percent (37%) of residents indicated that they had seen or heard promotional materials about air quality in the Kansas City area during the past year. This was an increase from 31% that was reported in 2024.
- The most frequent source of promotional media for air quality information was TV news/weather (78%). Some of the other more frequent sources were: radio (38%), KC Scout lighted highway message boards (33%), social media (X, Facebook, Instagram, etc.) (30%), internet (other than social media) (20%), and billboards (15%).
- Seventy-six percent (76%) of the residents surveyed remember seeing or hearing notifications about days with high levels of smoke or particulate matter. This was a statistically significant increase of 15% from 2024.
- More than half (51%) of residents had seen “Skycast” information during weather forecasts on their local television news. This was an increase from 50% in 2024.
- Twelve percent (12%) of residents reported they had heard about the AirQ program or AirQKC.org. In 2024, 7% indicated they had heard about the AirQ program, and in 2023 10% reported they had heard about the AirQ program.

PERCEIVED IMPORTANCE OF SKYCAST, OZONE ALERT DAYS AND THE REDUCTION OF AIR POLLUTION

- Ninety-three percent (93%) of residents felt it was “very important” or “somewhat important” for local television news stations to provide Skycast (Ozone Action Alert) information to the public. This was a decrease from 96% that was reported in 2024.
- Eighty percent (80%) of residents felt it was “very important” or “somewhat important” to know that it was an Ozone Action Alert Day in the Kansas City area. This was a significant increase from 72% that was reported in 2024.
- The number one reason residents felt it was important to reduce air pollution was the health effects (61%). Residents also felt it was important to reduce air pollution because of global warming/climate change (51%).

WILLINGNESS TO IMPROVE AIR QUALITY

- The activities that residents were most willing to do on an Ozone Alert Day, based upon the combined percentage of residents who were “very willing” and “willing,” were:
 - fill up their car with gasoline in the evening rather than the day (88%)
 - not overfilling or “topping off” their gas tank (87%)
 - not using lighter fluid on an outdoor grill (83%)
 - postpone mowing the lawn (82%)
 - postpone the use of paints or solvents (81%)
 - adopt driving habits that reduce emissions (79%)
- There was a statistically significant increase in 4 of the 12 activities that residents reported they were “more willing” to do compared to 2024. There were two significant decreases from 2024.

MOTIVATION TO REDUCE AIR POLLUTION

- The following situations would motivate residents most to take action to help reduce air pollution:
 - health effects of air pollution (80%)
 - saving money (74%)
 - knowing an Ozone Alert has been issued (72%)
 - feeling the action is the “right thing to do” or good for the environment (69%)
 - Reducing smog (69%)
- There were five significant increases in situations motivating residents to reduce air pollution from 2024.

SUPPORT OF GOVERNMENT EFFORTS TO HELP REDUCE GAS EMISSIONS

- Eighty-five percent (85%) of the residents surveyed supported efforts by the Municipal or County government to help reduce greenhouse gas emissions; this was an increase of 2% from 2024. The top three strategies that residents felt the government should use to help reduce greenhouse emissions were: using energy from renewable sources (77%), planting more trees (74%), and improving public transit (69%).

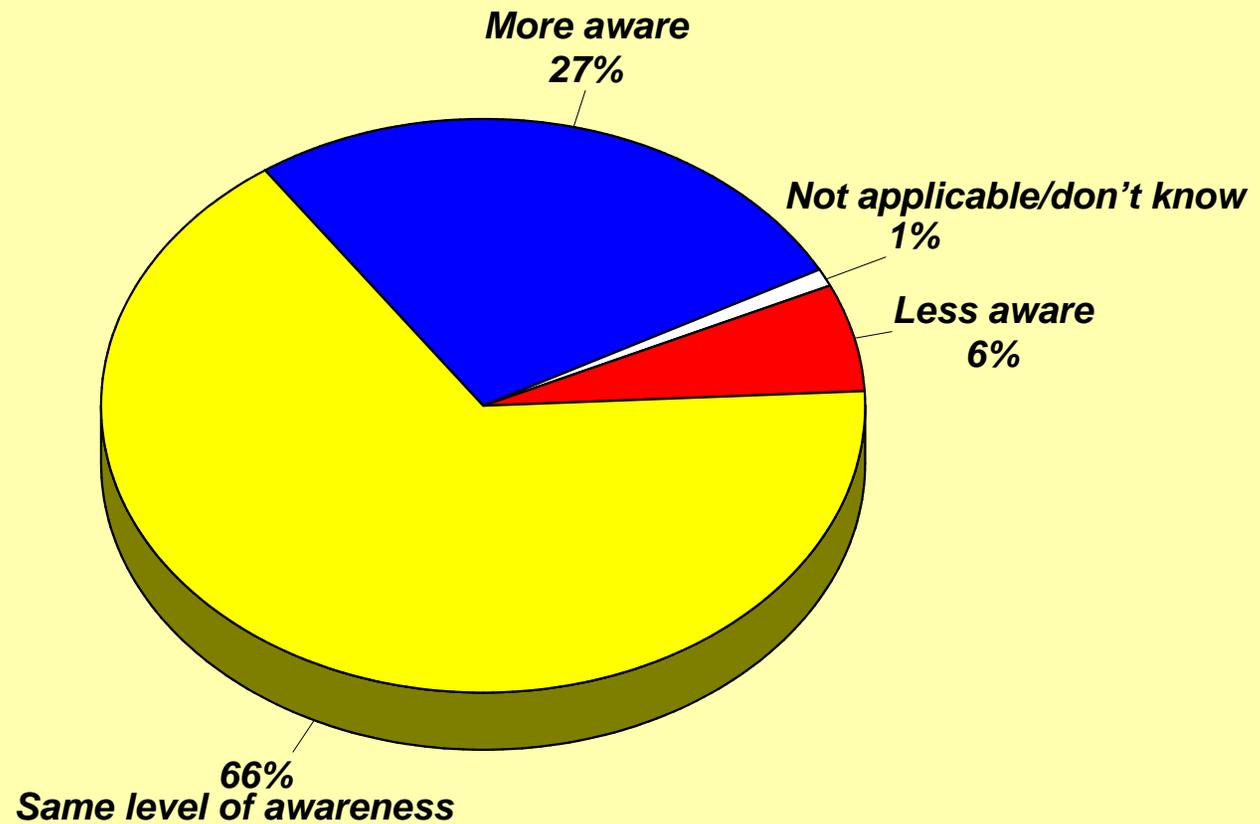

OTHER FINDINGS

- The top three sources that residents most preferred to receive information about air quality in the community were: an internet source that is easy to find (62%), television (54%), and email (40%).
- Eighteen percent (18%) of residents thought the natural environment would be better in the future, 57% did not, and 25% did not know.

Section 1:
Charts and Graphs

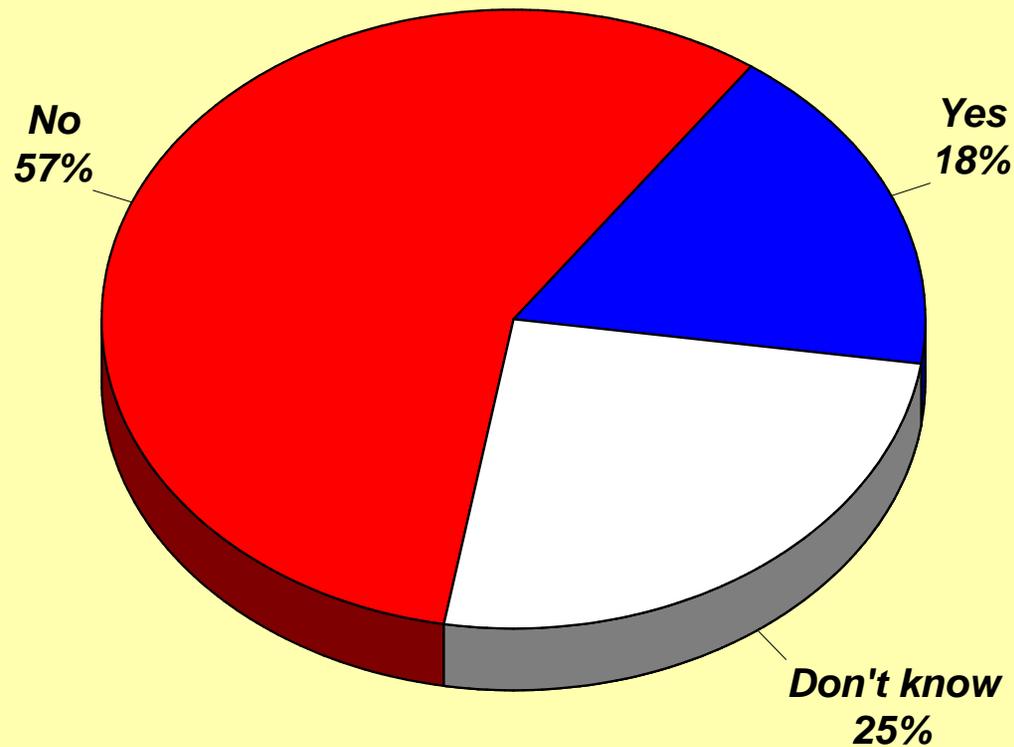

Q1: Compared to last year, how would you rate your level of awareness concerning air quality issues in the Kansas City area?

By percentage of respondents

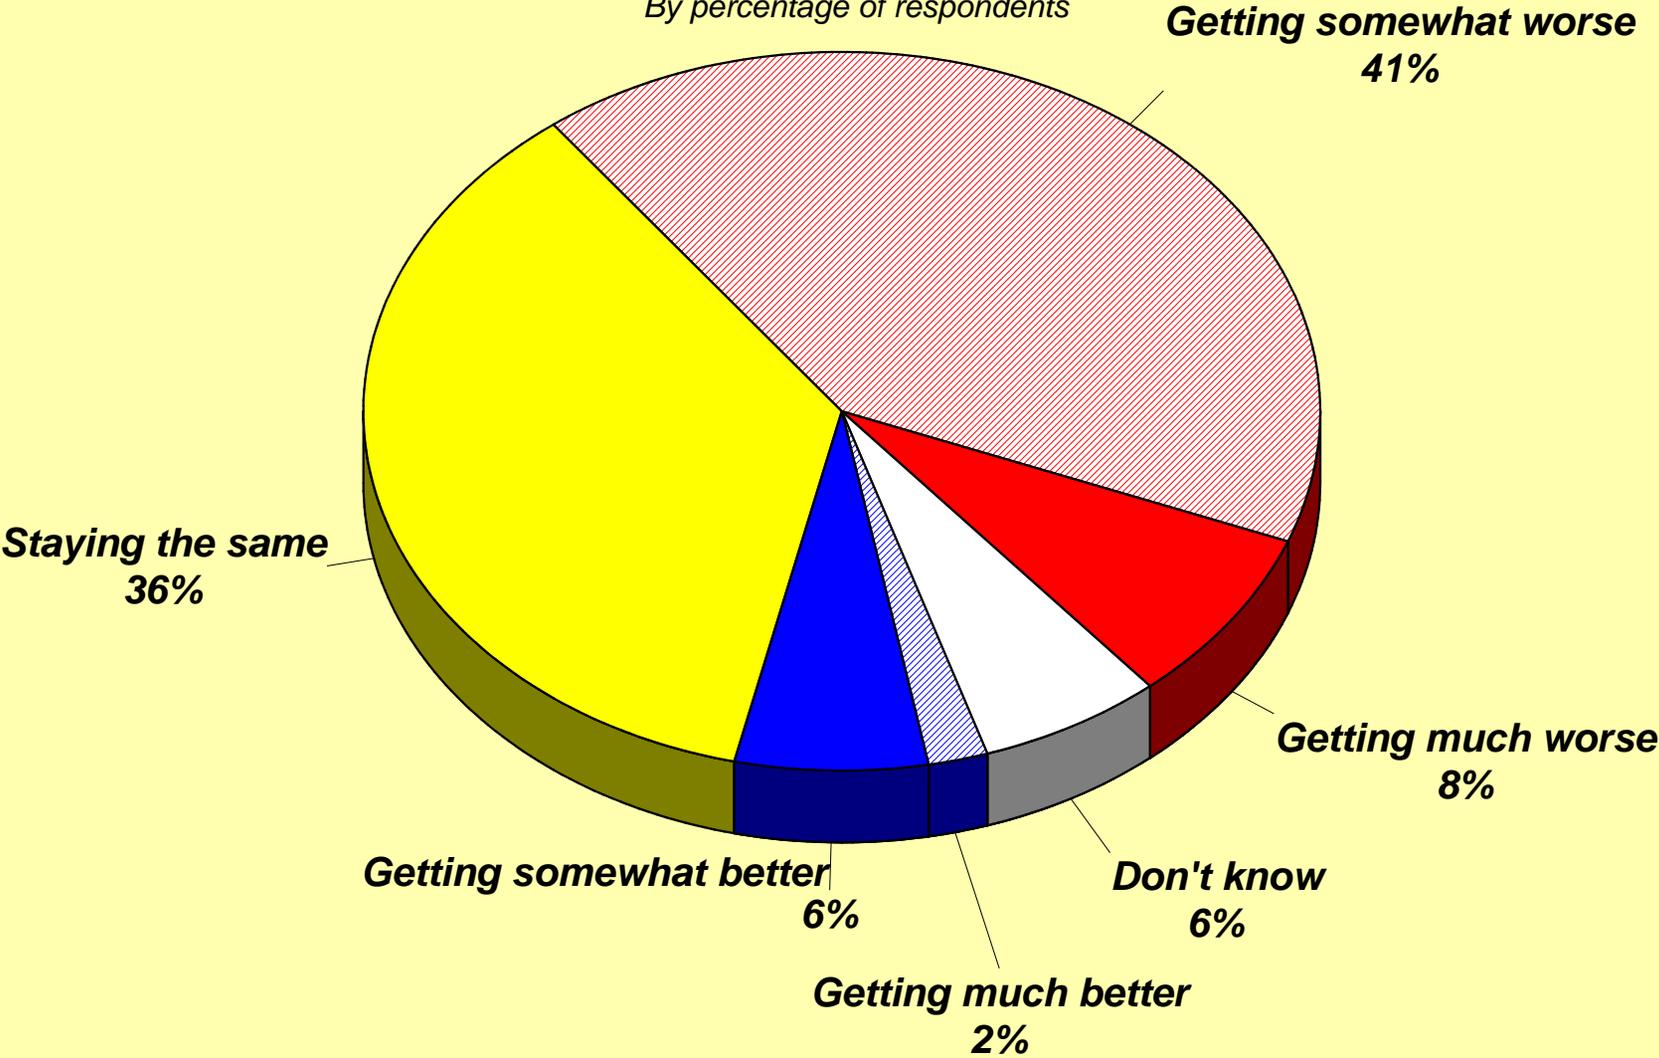

Q2: Do you think that our natural environment will be better in the future?

By percentage of respondents

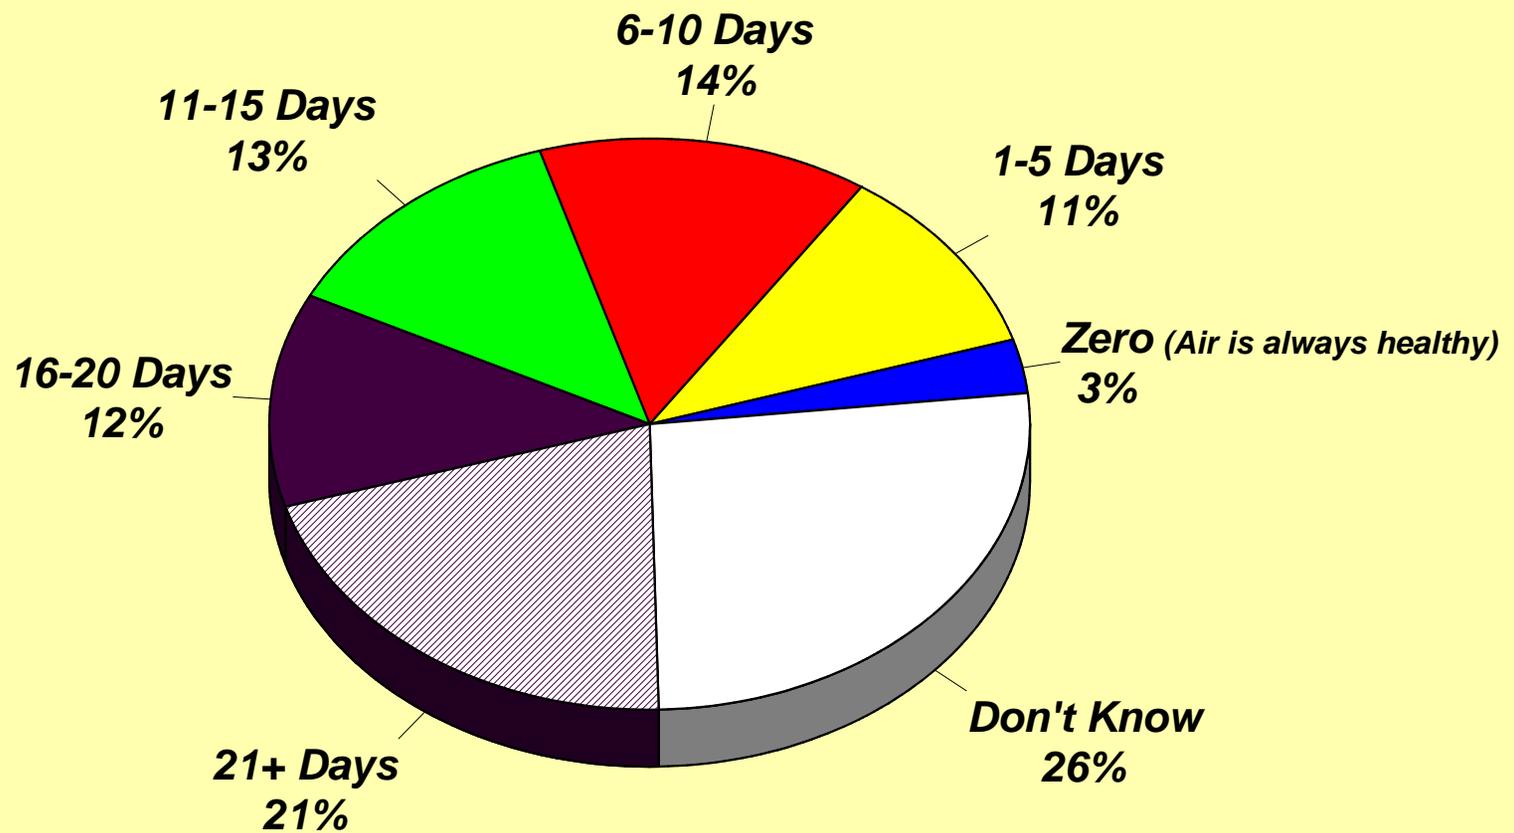

Q3: Do you think air pollution in the Kansas City area is:

By percentage of respondents

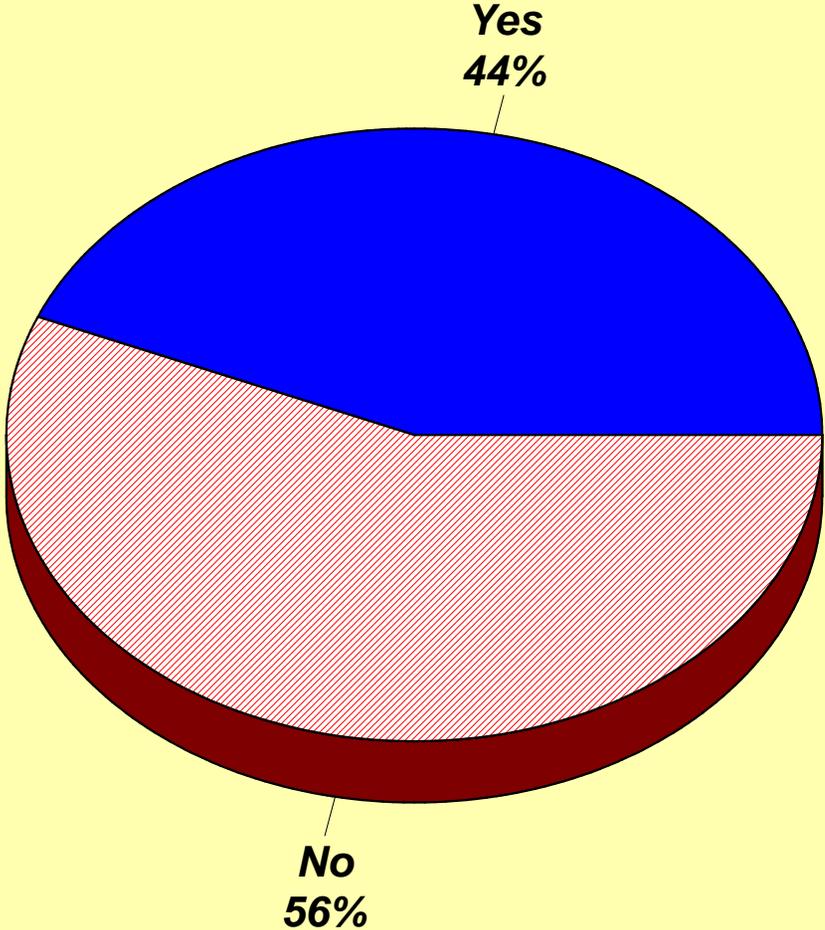

Q4: On average, how many days per year do you think Metropolitan Kansas City's Air Pollution levels fails to meet the health standards set in the Environmental Protection Agency?

By percentage of respondents

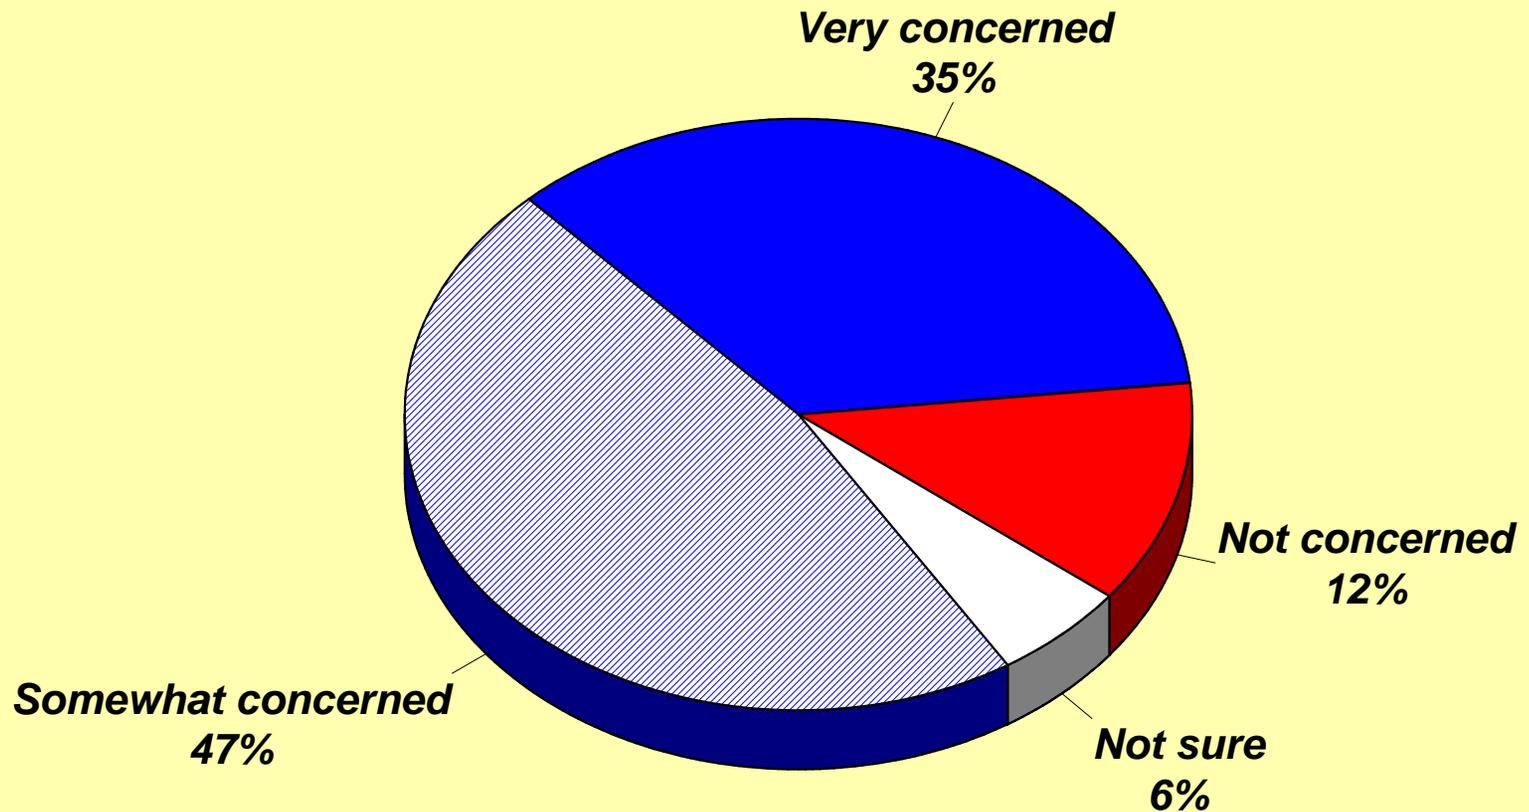

Q5: Do you or does anyone in your household have a breathing or respiratory problem?

By percentage of respondents

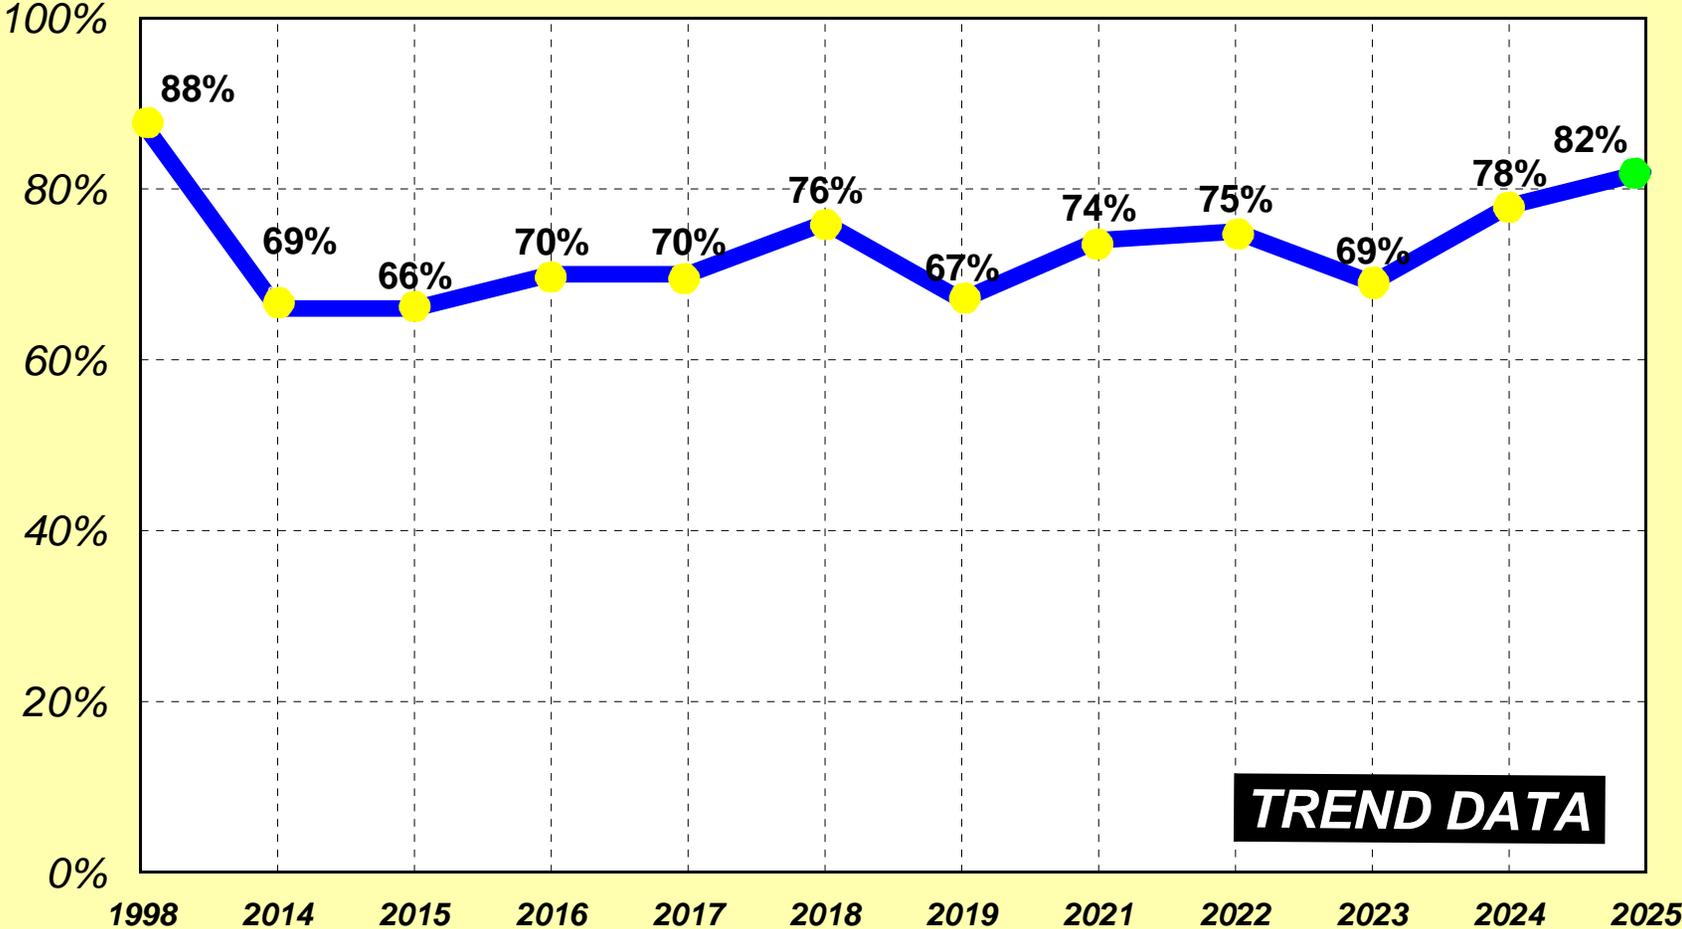

Q6: How concerned are you about the health consequences of poor air quality in the Kansas City area?

By percentage of respondents

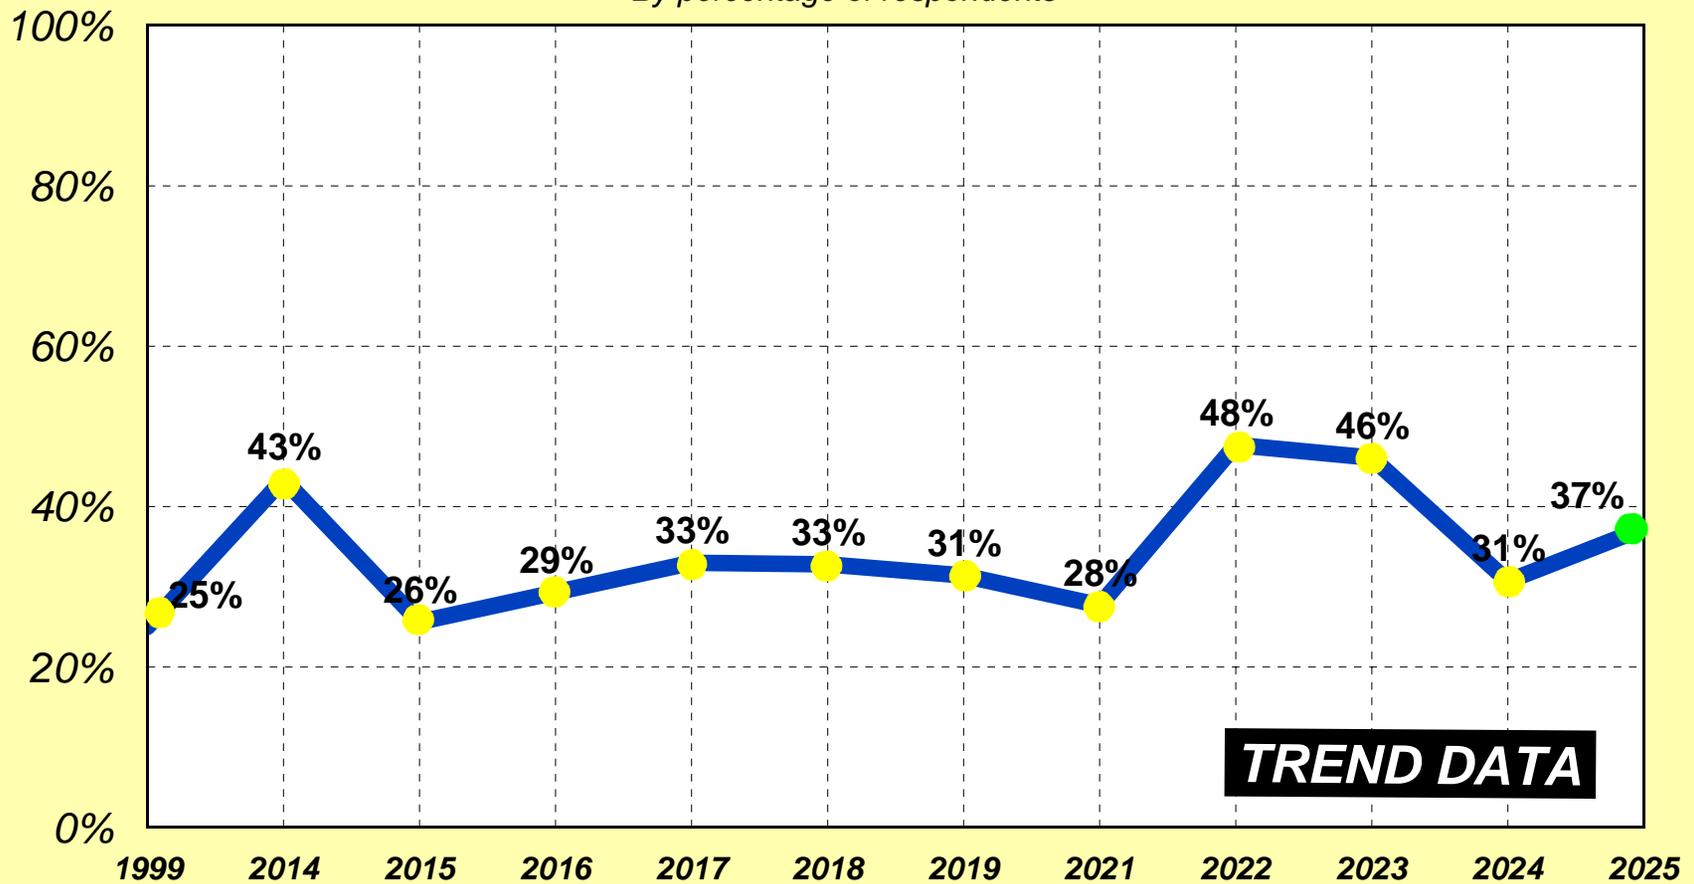

Q6: Percentage of Residents Who Were Very or Somewhat Concerned About the Health Consequences of Poor Air Quality in the Kansas City Area

By percentage of respondents

Q7: Percentage of Residents Who Had Seen or Heard Any Advertisements, Public Service Announcements, Brochures, Billboards, Radio or Other Promotional Media About Air Quality in the Kansas City Area During the Past Year

By percentage of respondents

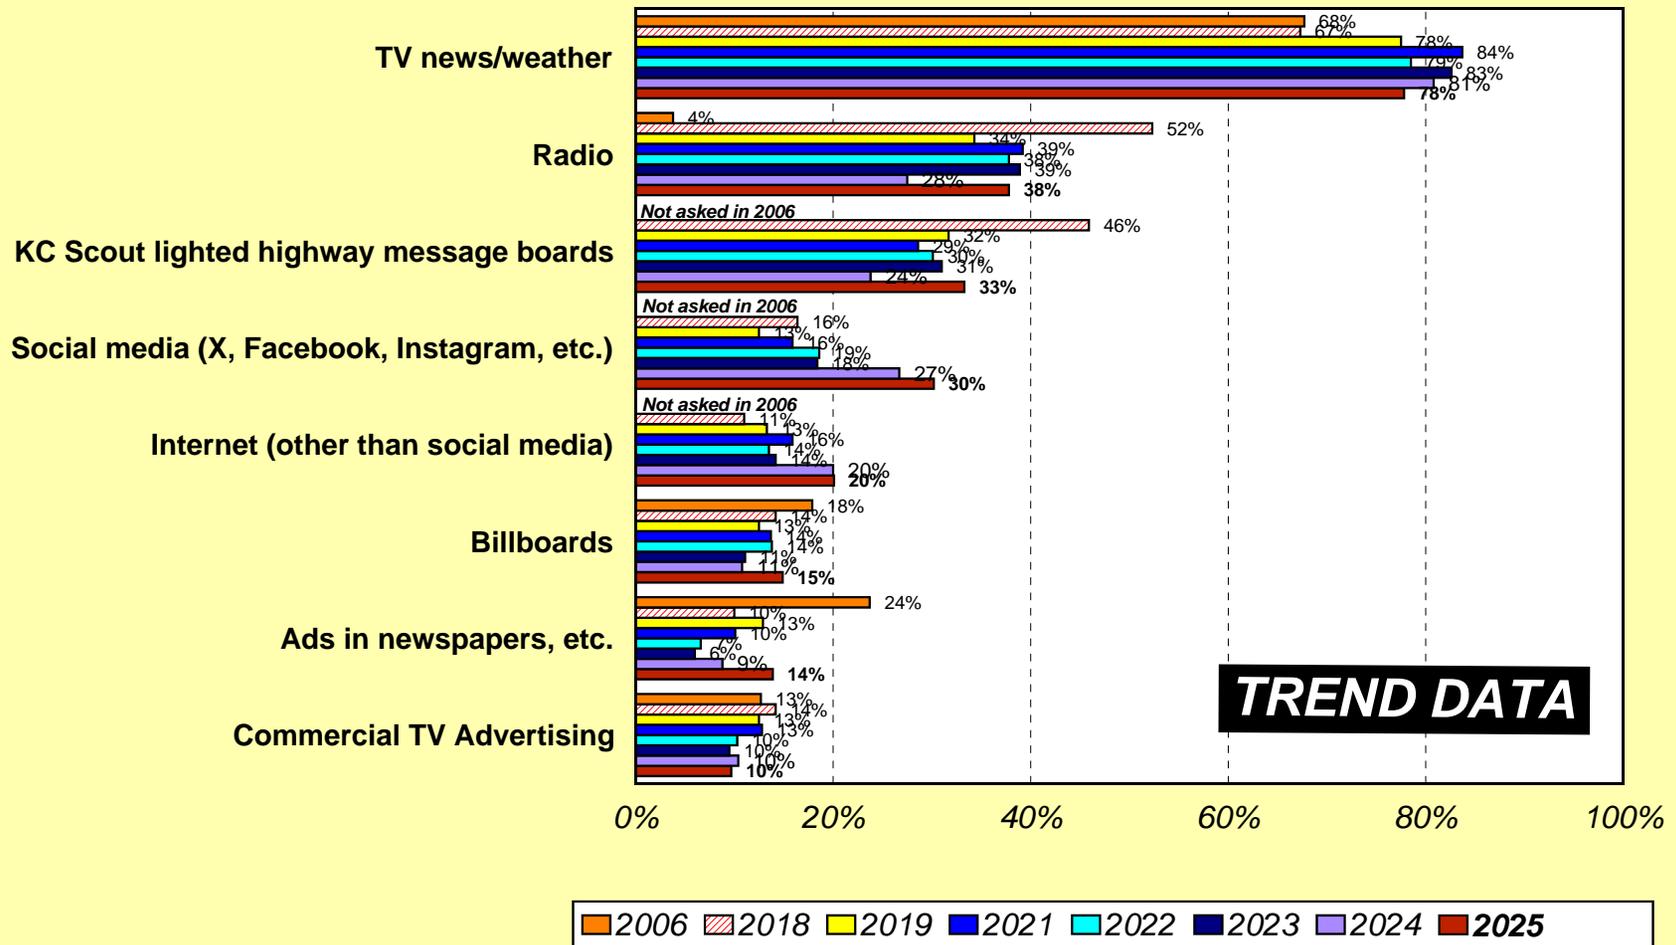

Q7a: What types of promotional media did you see or hear?

By percentage of respondents

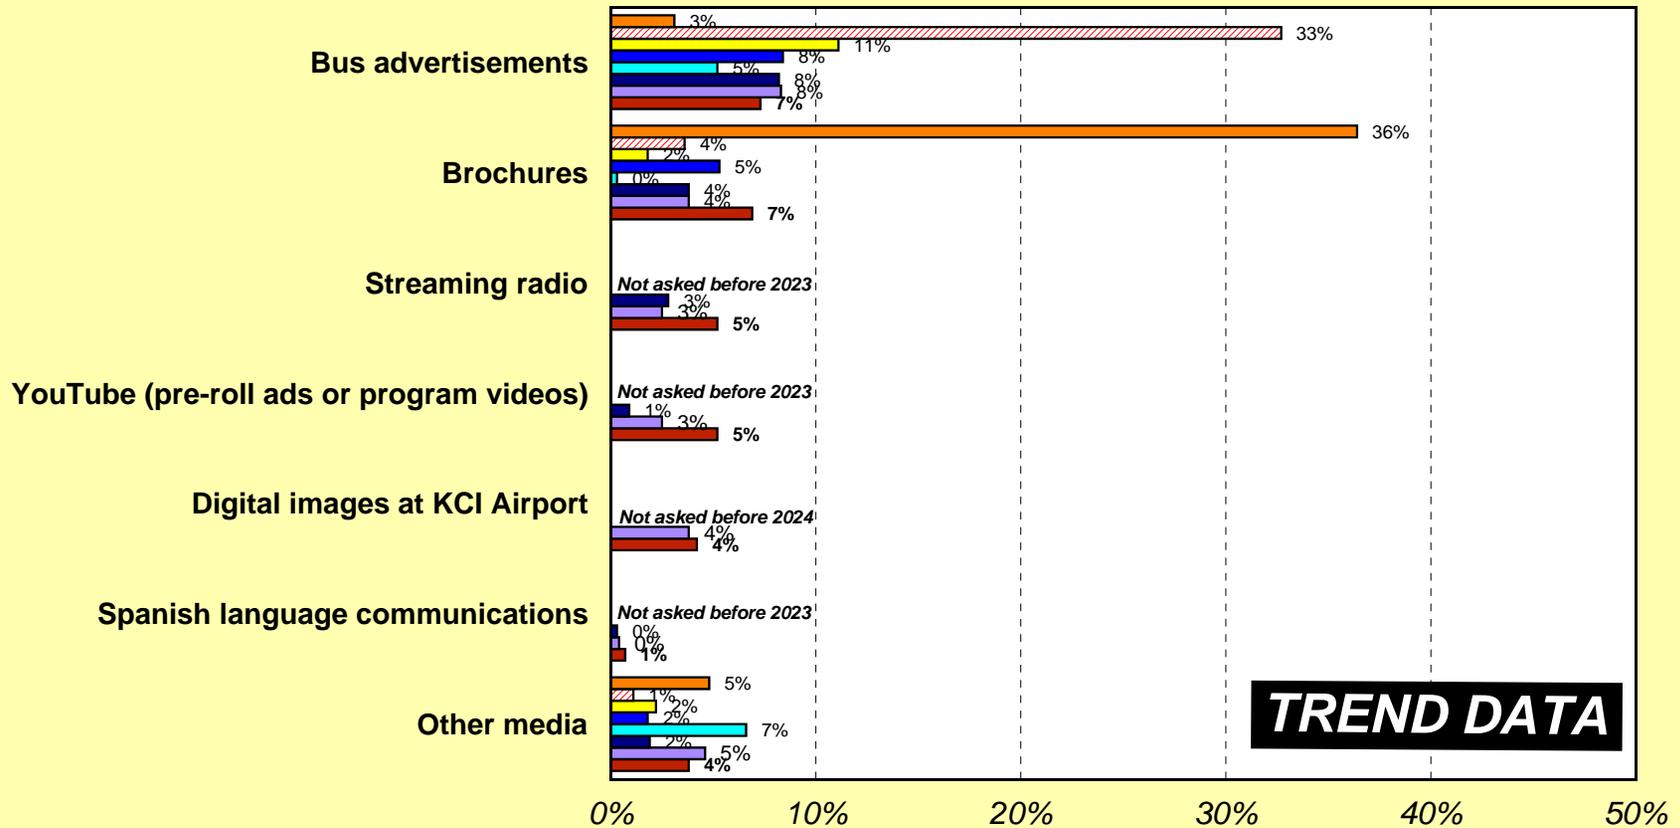

Q7a: What types of promotional media did you see or hear?

By percentage of respondents

Q7a (CONTINUED): What types of promotional media did you see or hear?

By percentage of respondents

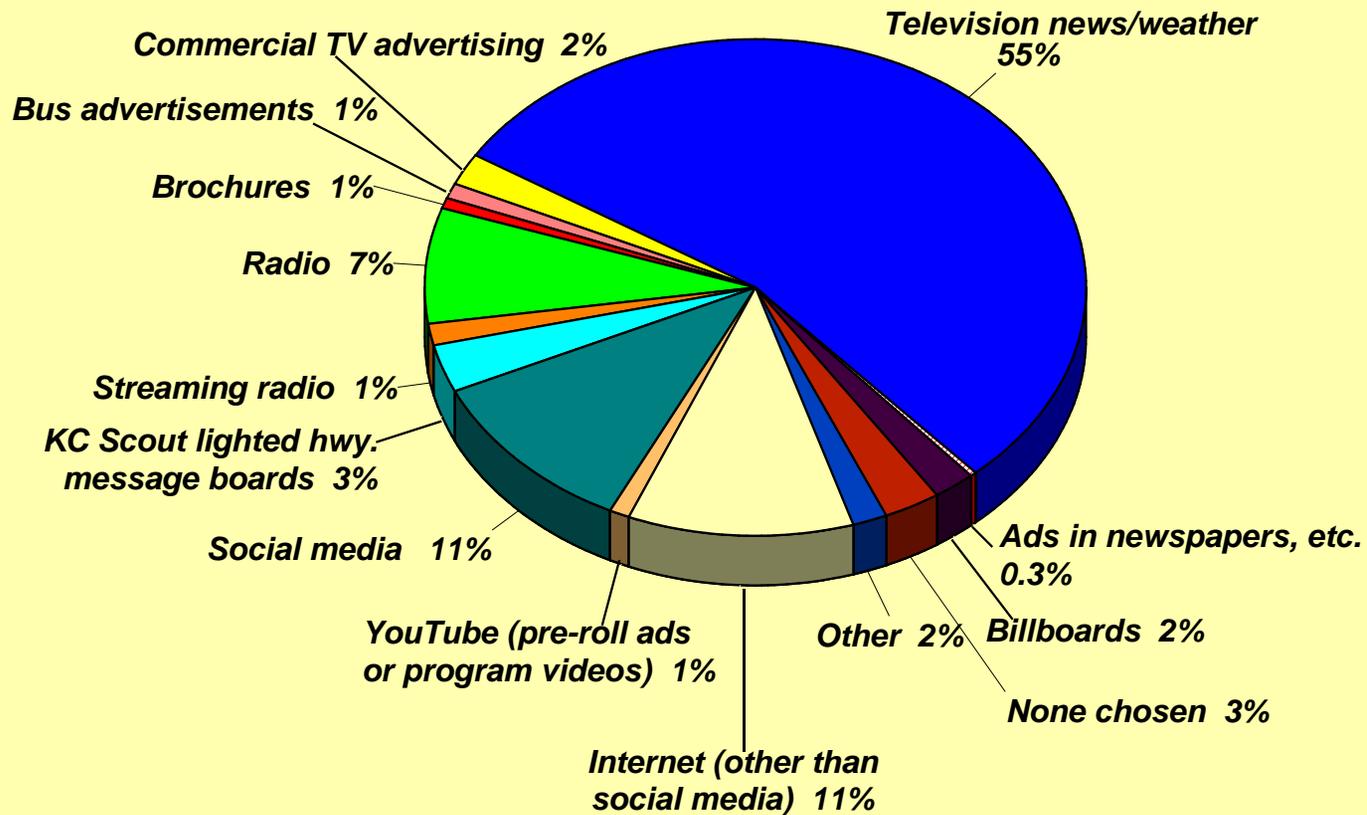

One (1) respondent selected
"Spanish language communications"

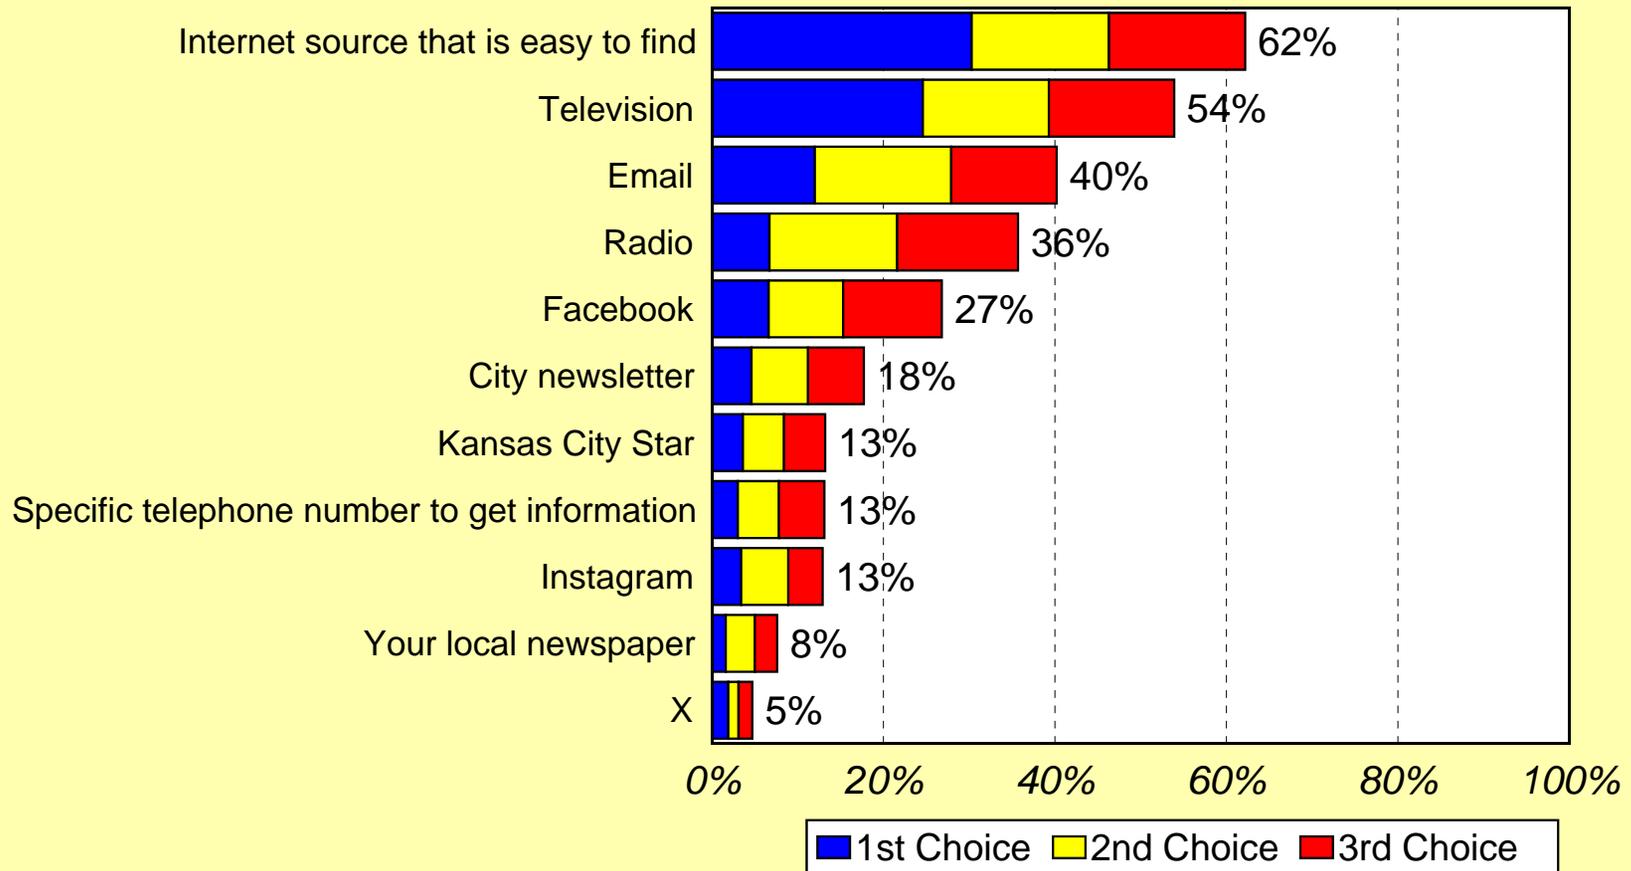

Q7b: Which ONE of the promotional media is your most frequent source of information about air quality?

By percentage of respondents have seen or heard promotional materials/media in the past year

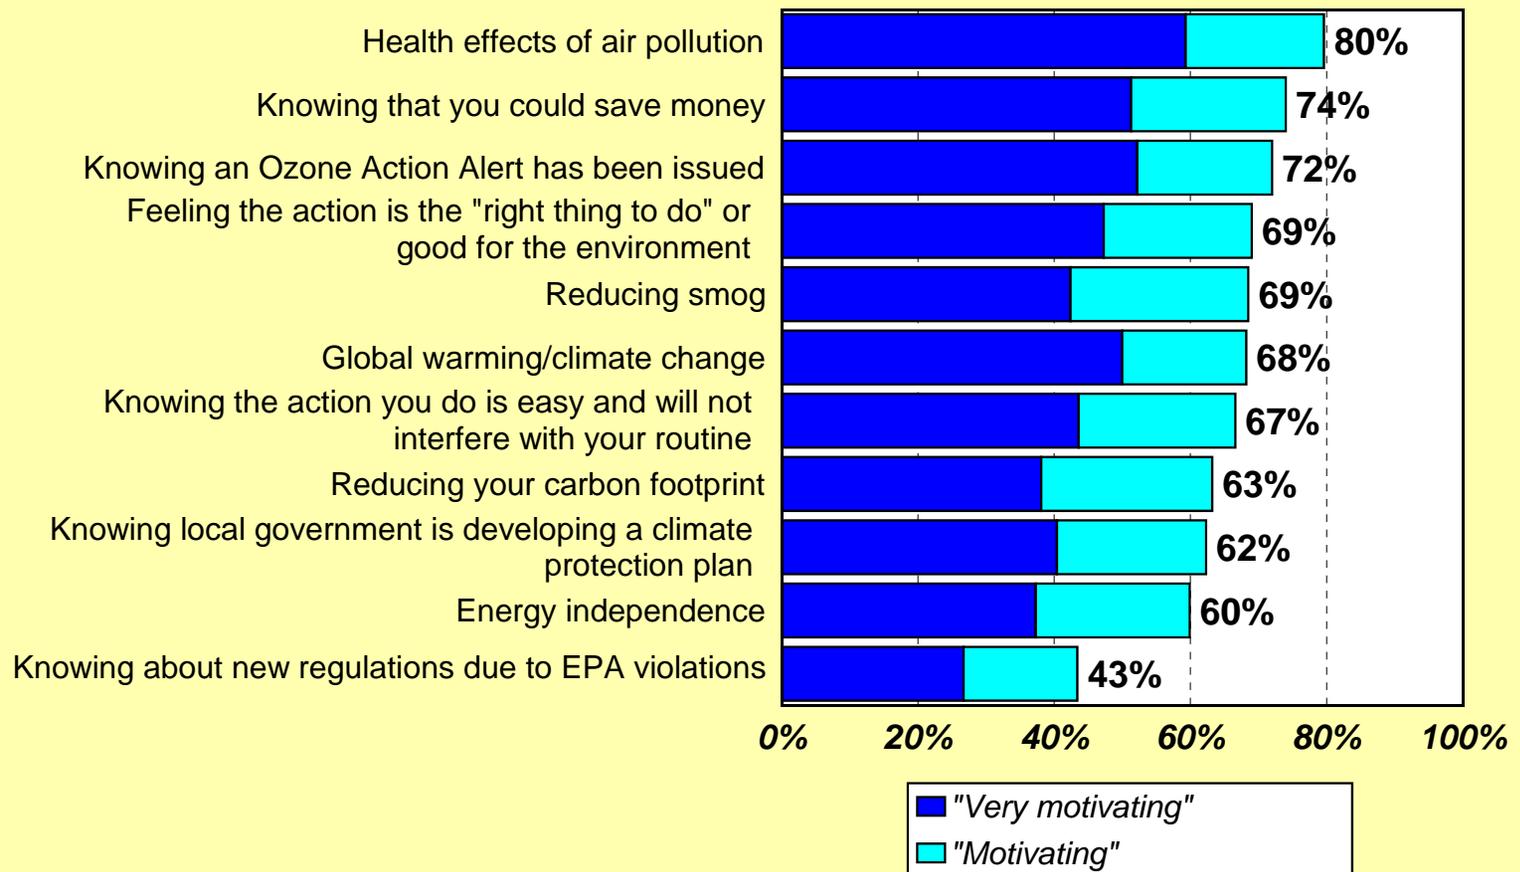

Q8: Which **THREE** of the following sources would you **MOST** prefer to receive information about air quality in your community?

By percentage of respondents who selected the item as one of their top three choices

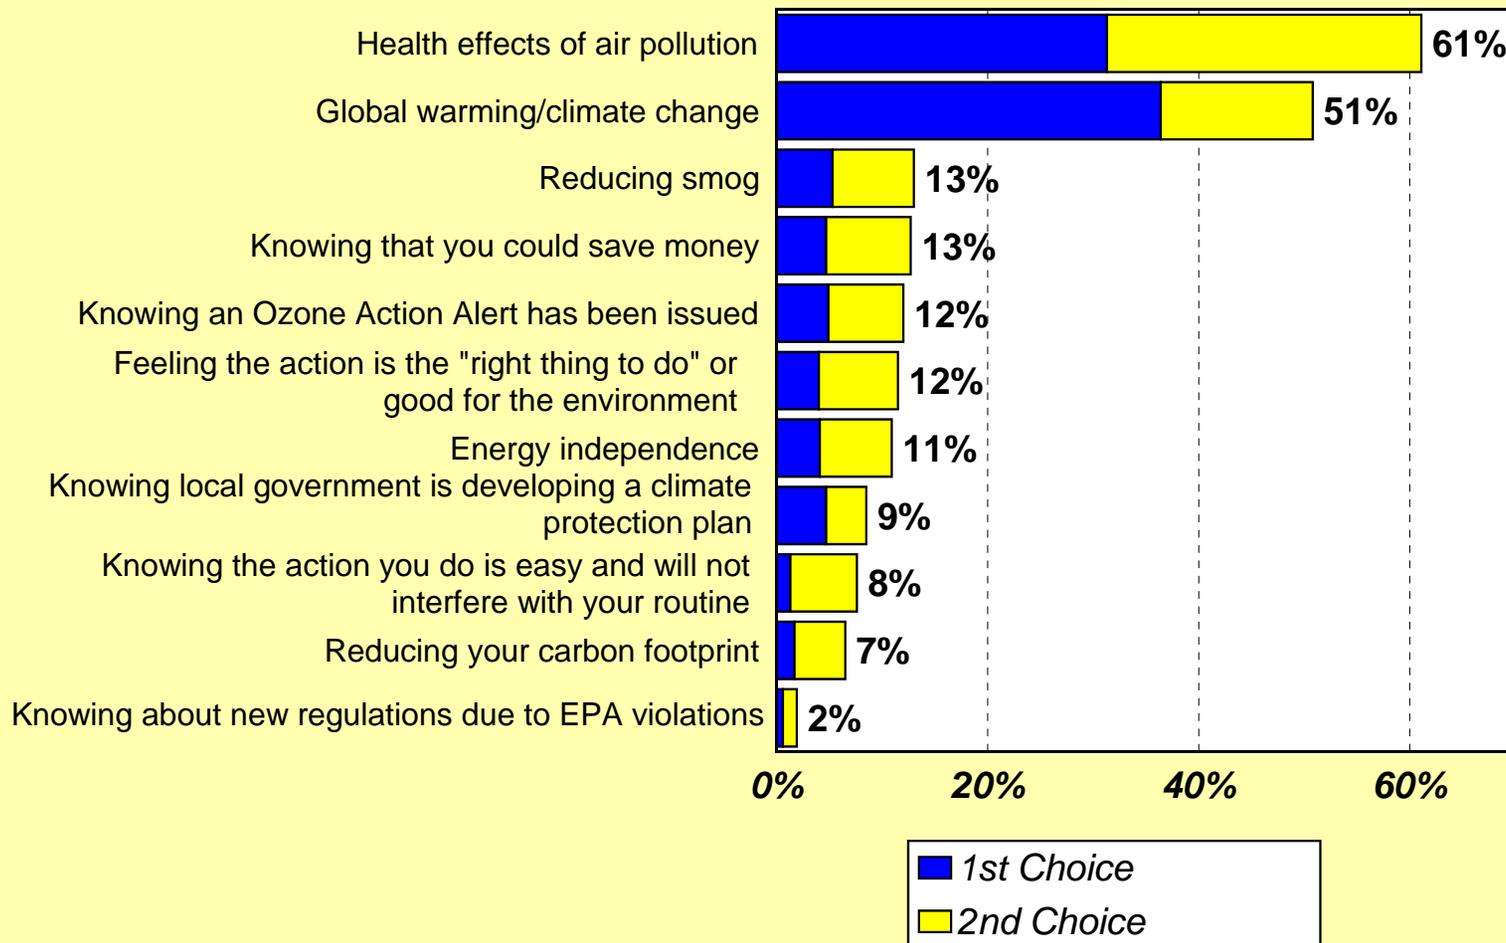

Q9: Level of Motivation Various Situations Would Give Residents to Reduce Air Pollution in the Kansas City Area

Based on the percentage of residents who rated their motivation on a scale of 1-5 where 5 was "very motivating" and 4 was "motivating")

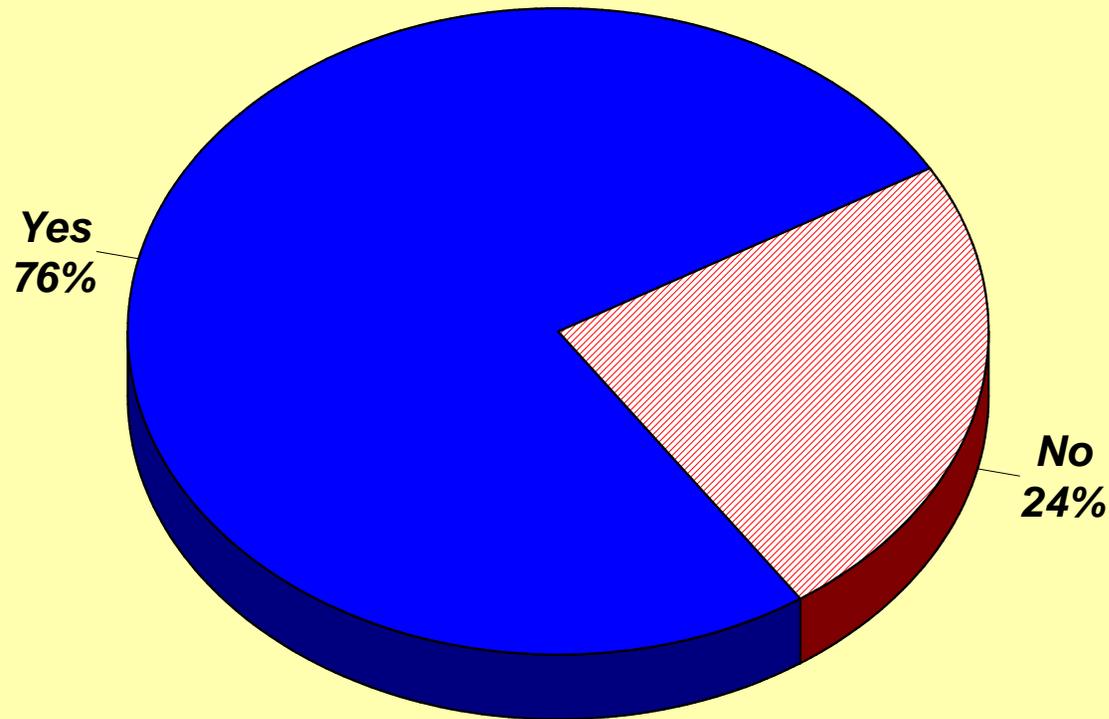

Q10: Reasons Residents Felt It Was Important to Reduce Air Pollution

By percentage of respondents who selected the item as one of their top two choices

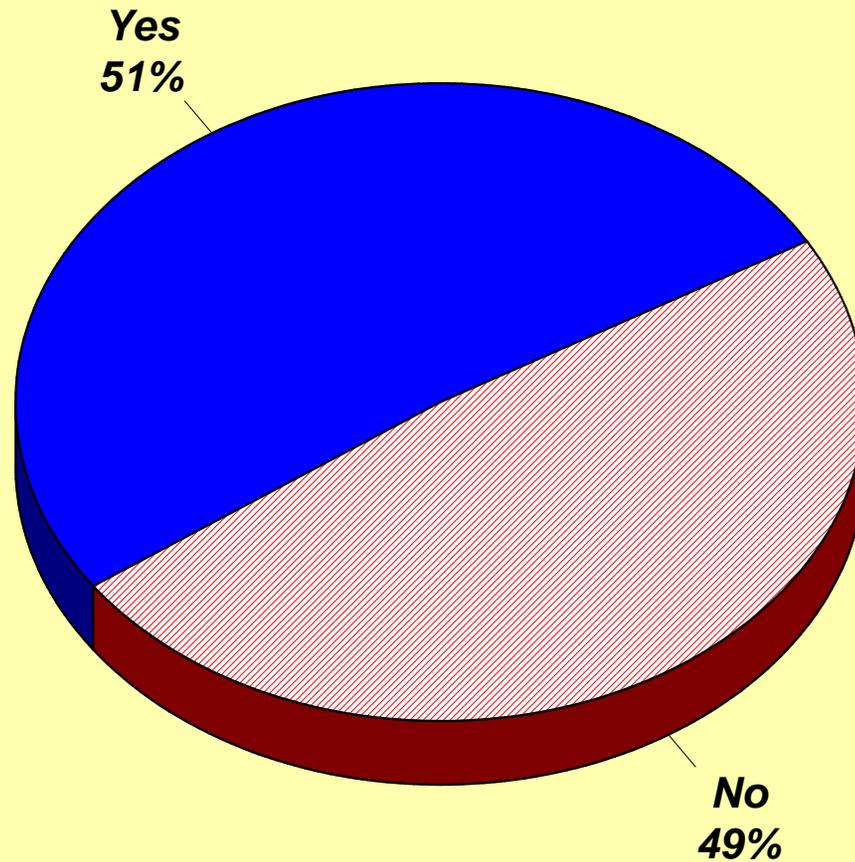

Q11: Do you remember seeing or hearing specific notifications about days with high levels of smoke or particulate matter?

By percentage of respondents

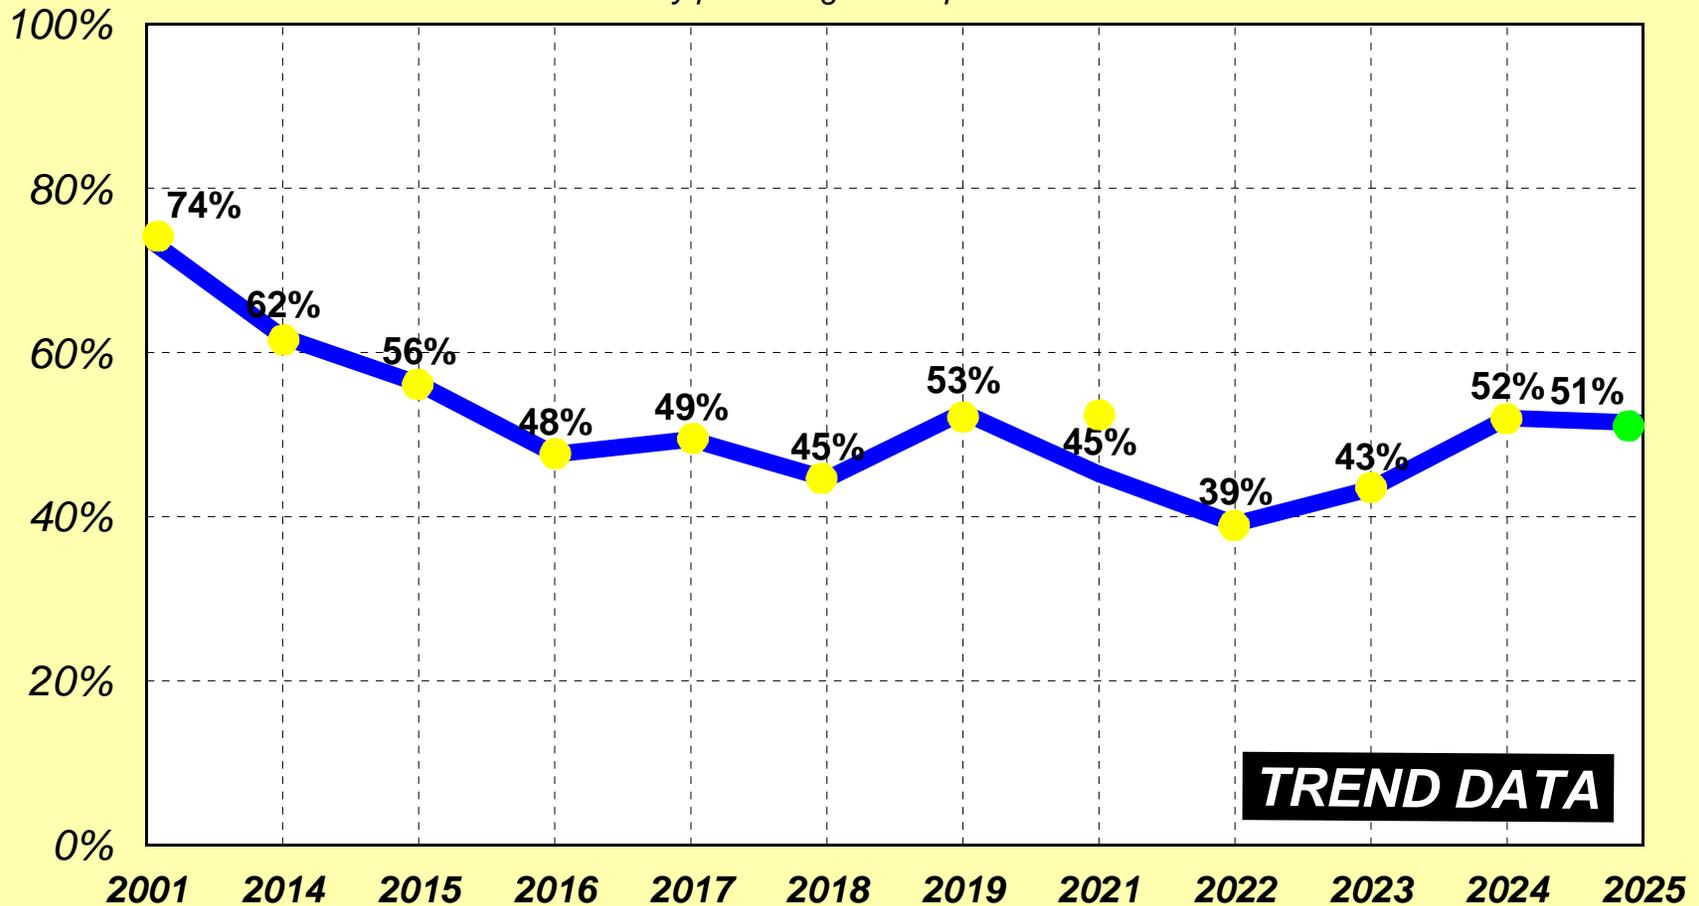

Q12: Have you seen Ozone “SKYCAST” information during the weather forecast on local television news or a Spanish-language TV station?

By percentage of respondents

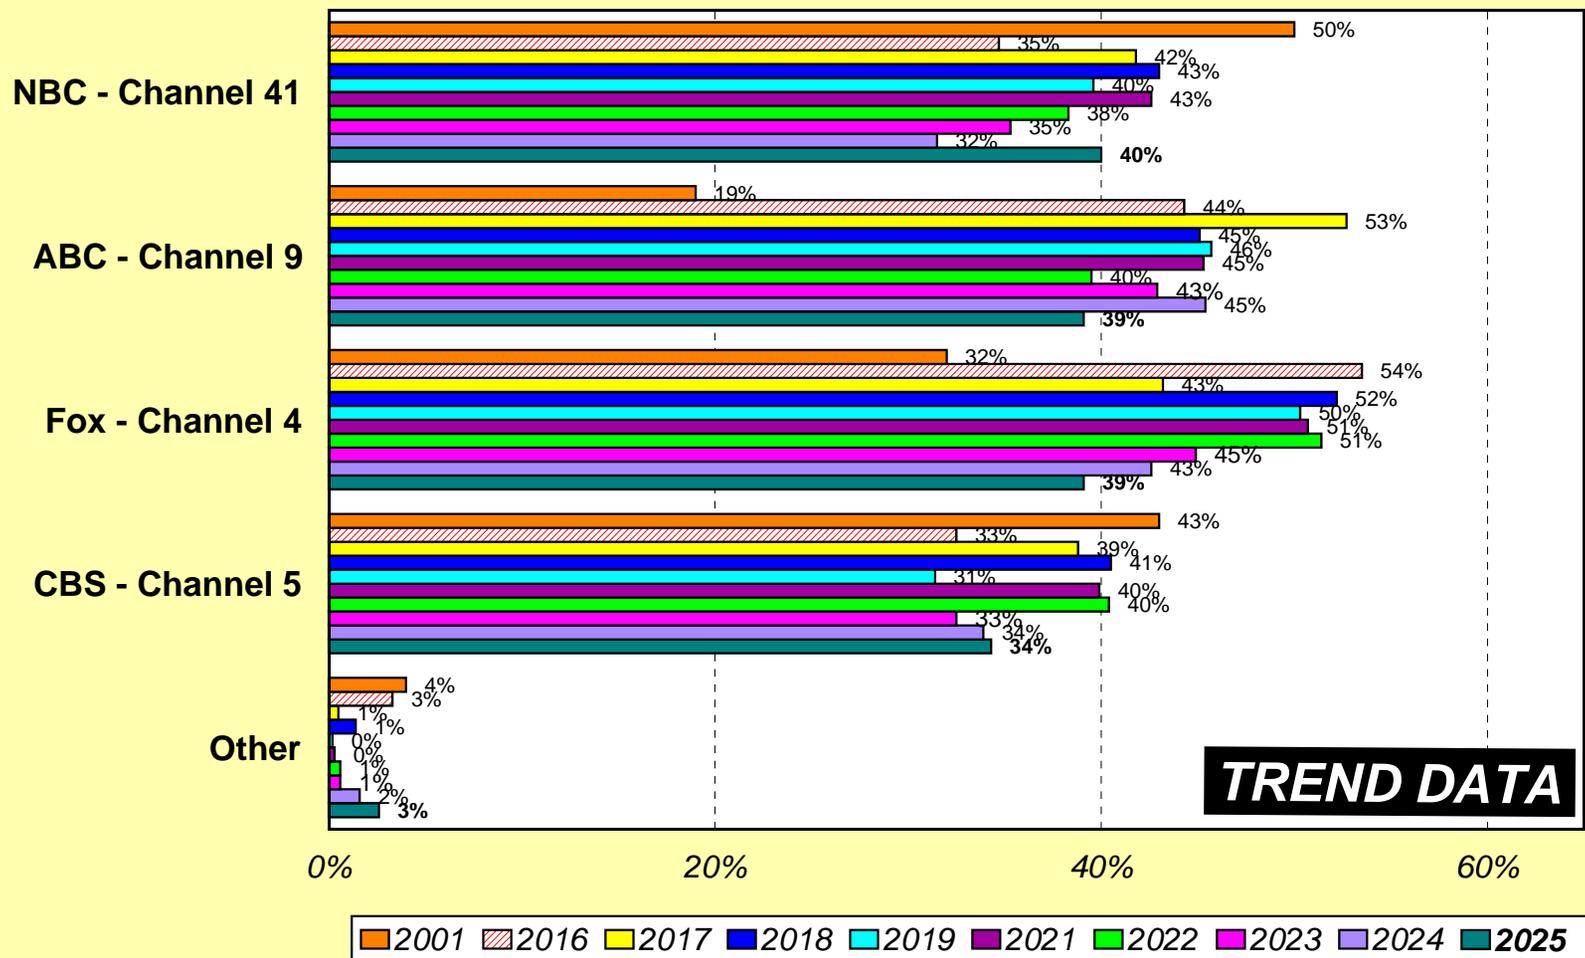

Q12: Percentage of Residents Who Have Seen “SKYCAST” Information During Weather Forecasts on Local Television News

By percentage of respondents

Q12a: Percentage of Residents Who Have Seen “SKYCAST” Information on Local Television Stations

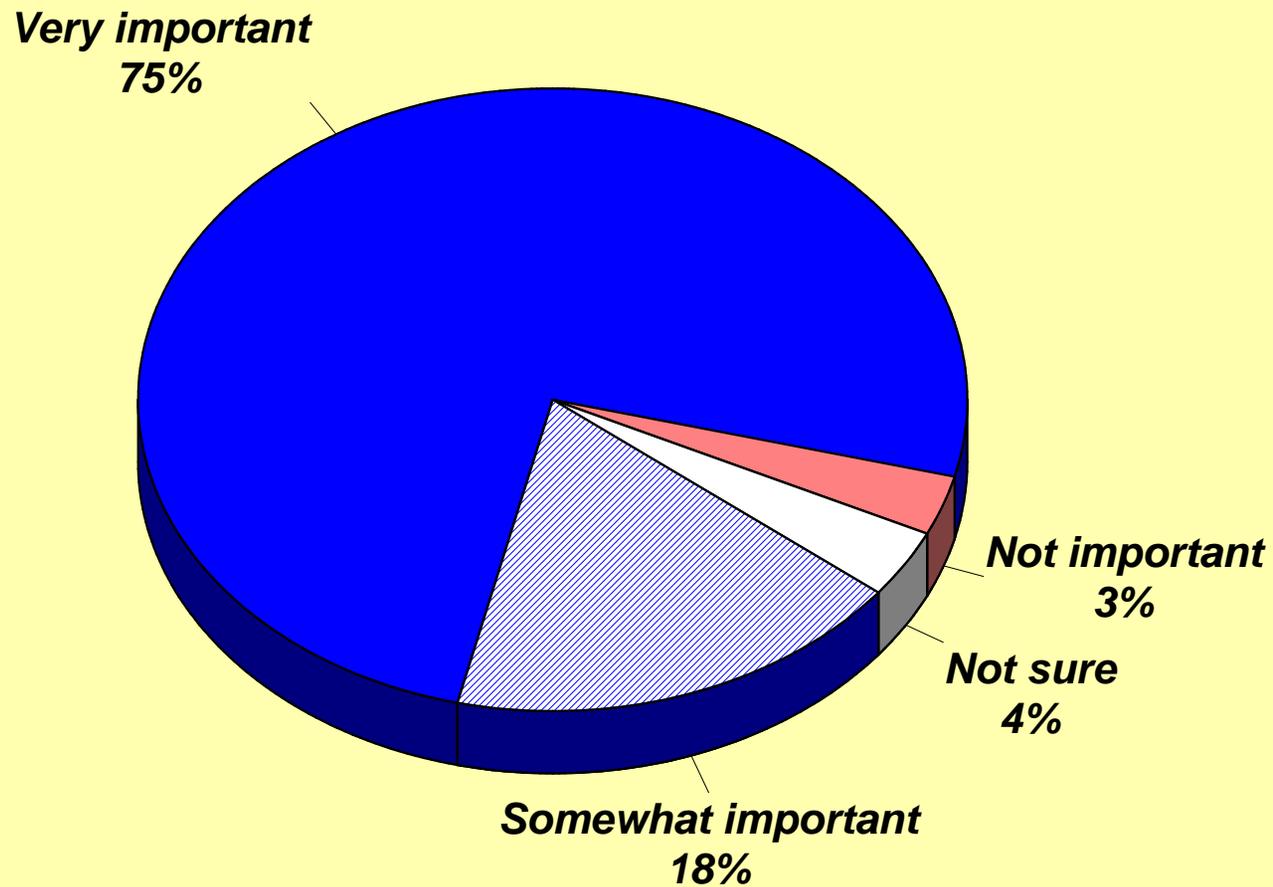

By percentage of respondents who had seen “SKYCAST” information

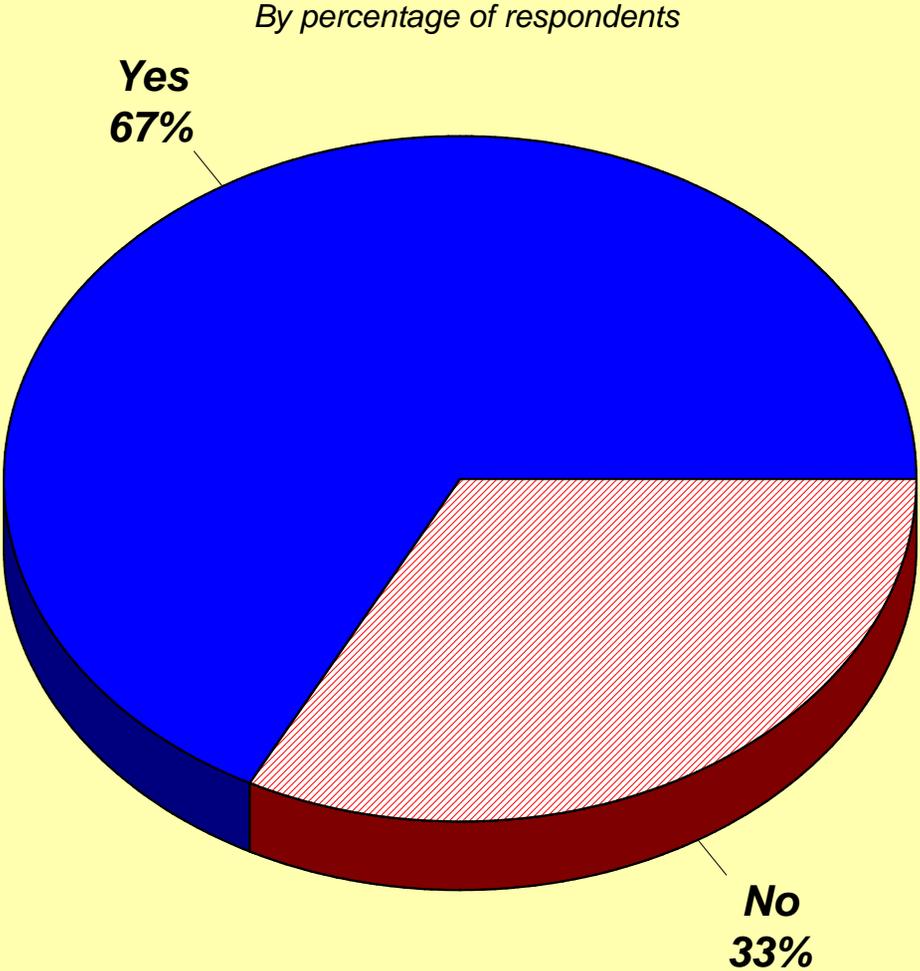

TREND DATA

Q12b: How Important Residents Think It Is for Local Television News to Provide “SKYCAST” Information

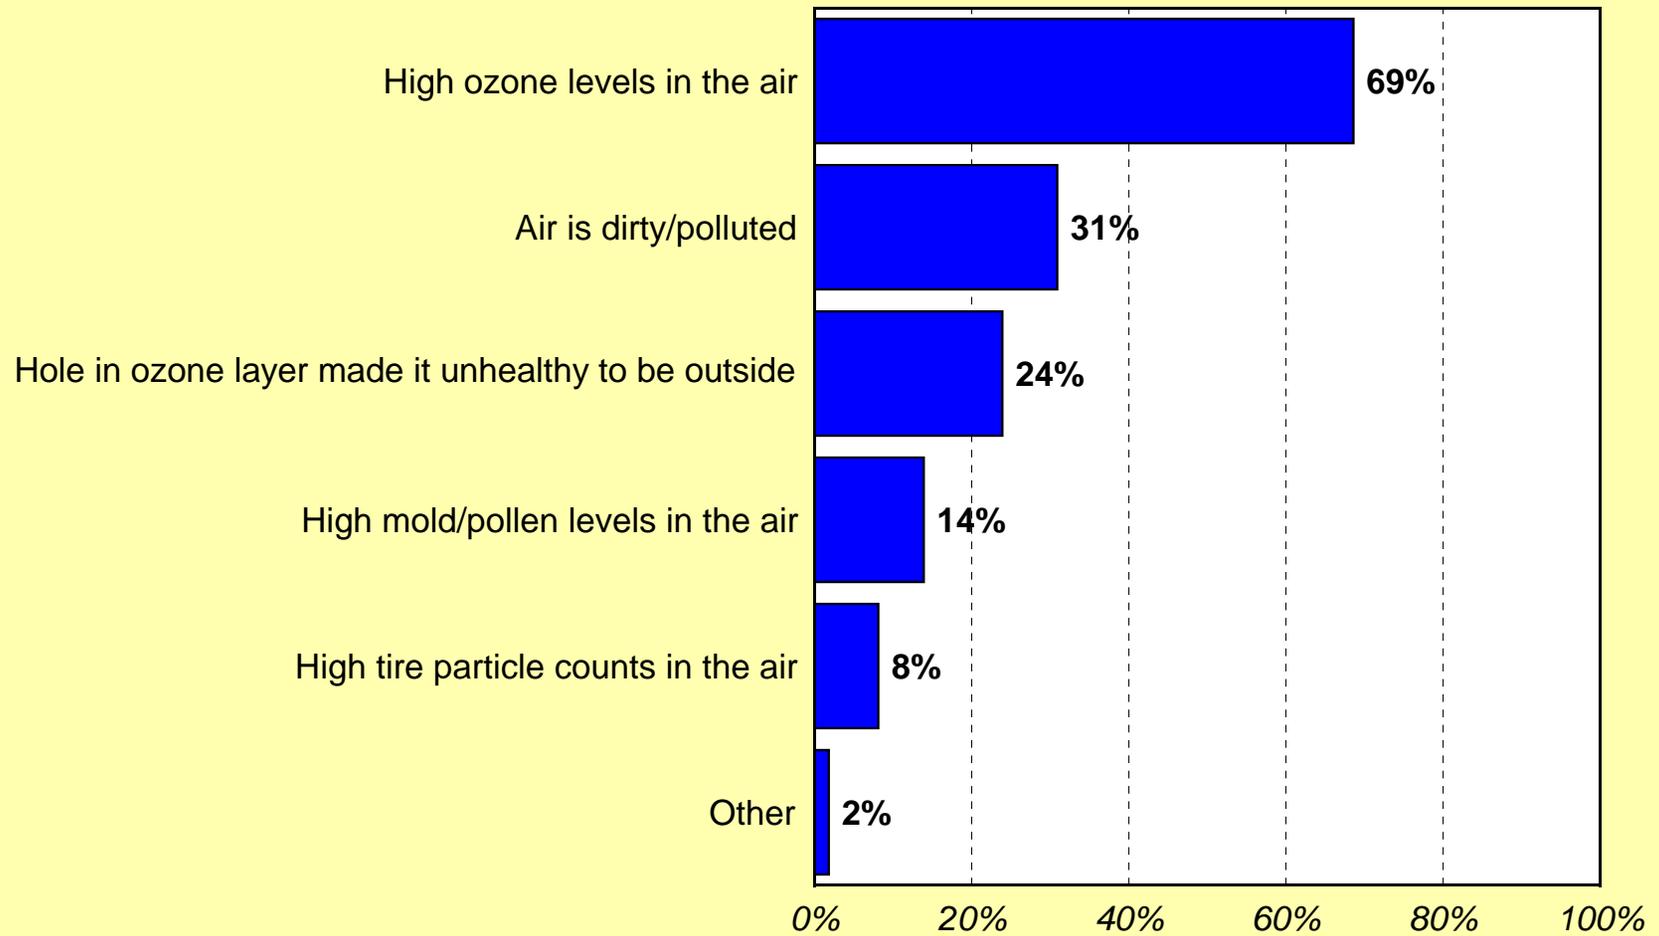

By percentage of respondents

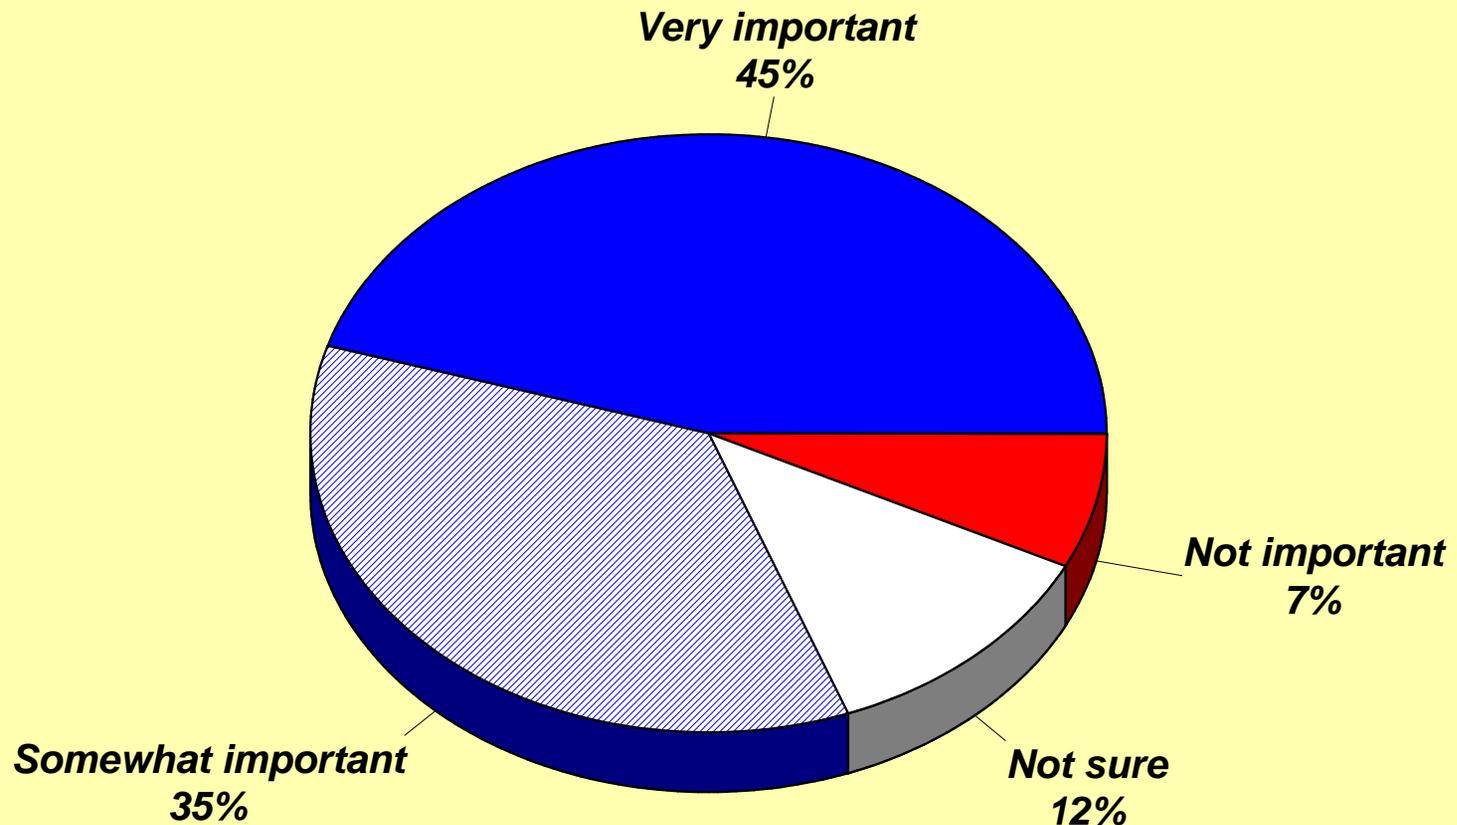

Q14: What do you think an "Ozone Action Alert" day means?

By percentage of respondents (excluding "don't know")

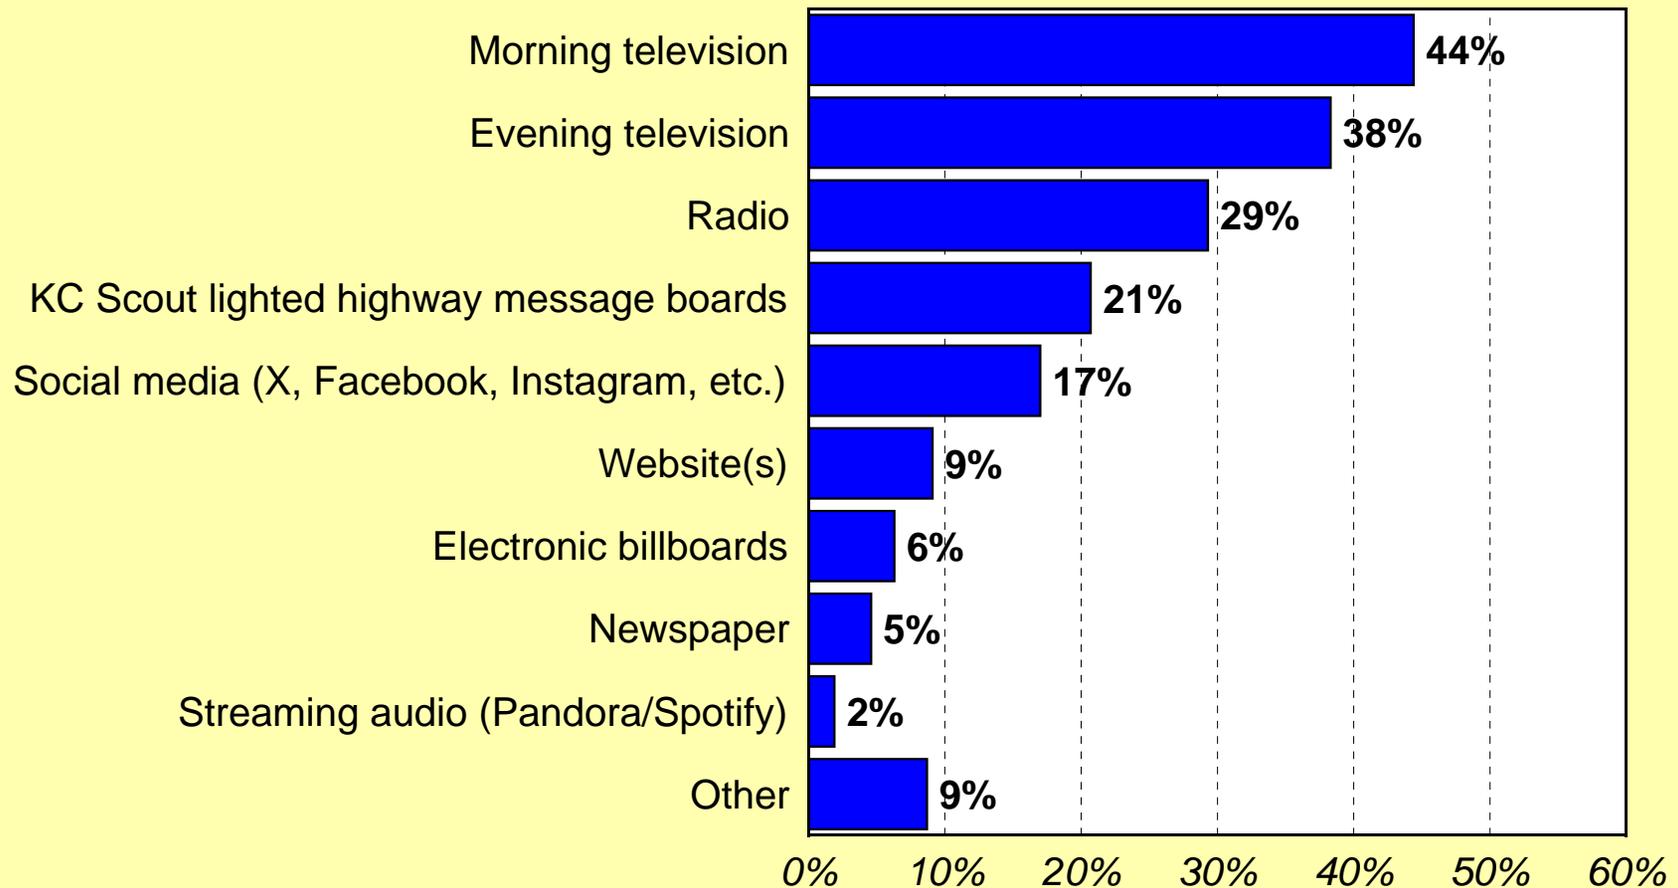

Q15: Importance of Knowing When It Is an “Ozone Action Alert” Day in the Kansas City Area

By percentage of respondents

Q16: Have you seen or heard the phrase "Ozone Action Alert" used to describe air quality in the Kansas City area from any of the following sources?

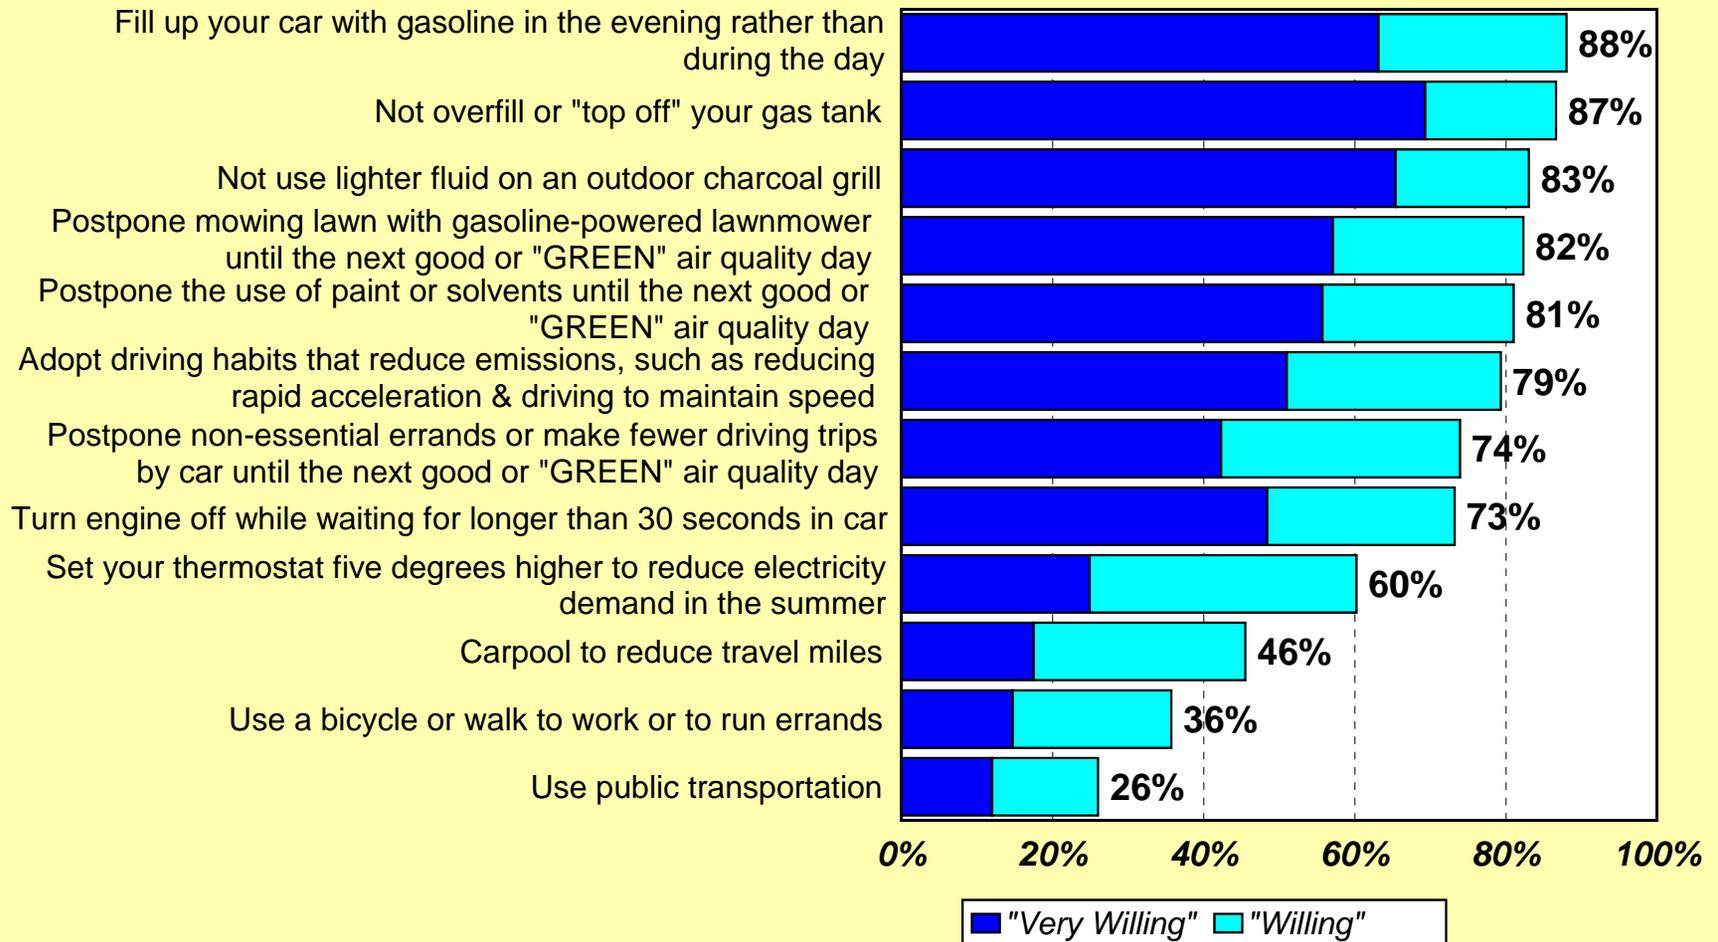

by percentage of respondents

Q17a: Willingness of Residents to Do Various Activities on an OZONE ACTION ALERT Day in the Kansas City Area

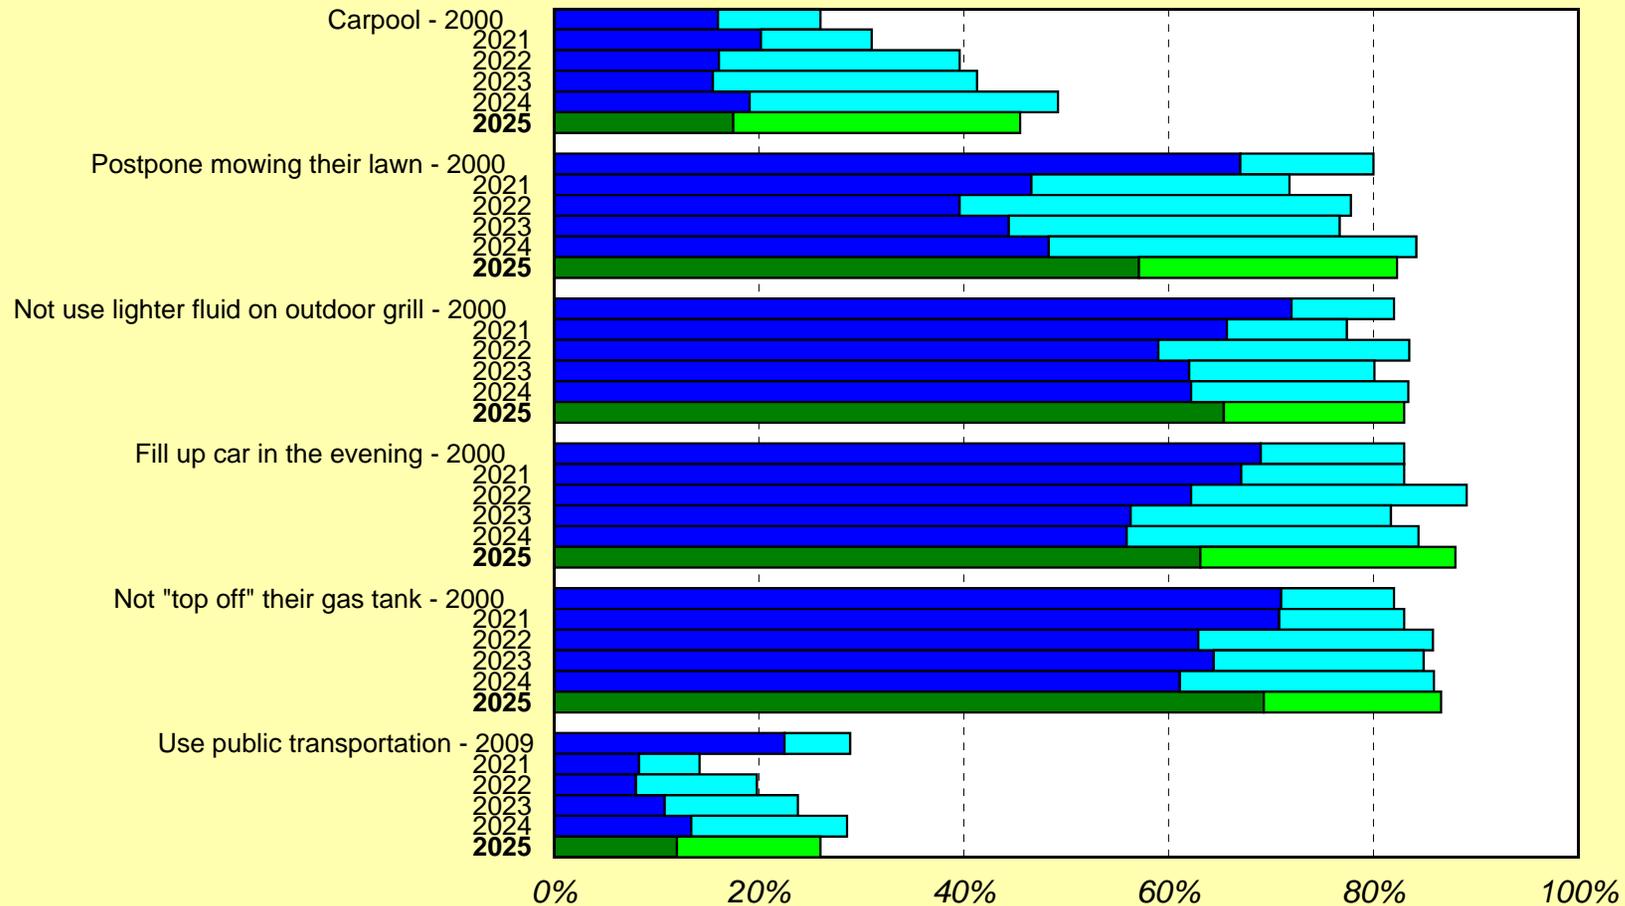

(Residents rated their willingness on a scale of 1-5 where 5 was "very willing" and 1 was "not willing")

By percentage of respondents who were "very willing" or "willing"

Q17a: Willingness of Residents to Do Various Activities on an OZONE ACTION ALERT Day in the Kansas City Area

(Residents rated their willingness on a scale of 1-5 where 5 was "very willing" and 1 was "not willing")
 By percentage of respondents who were "very willing" or "willing"

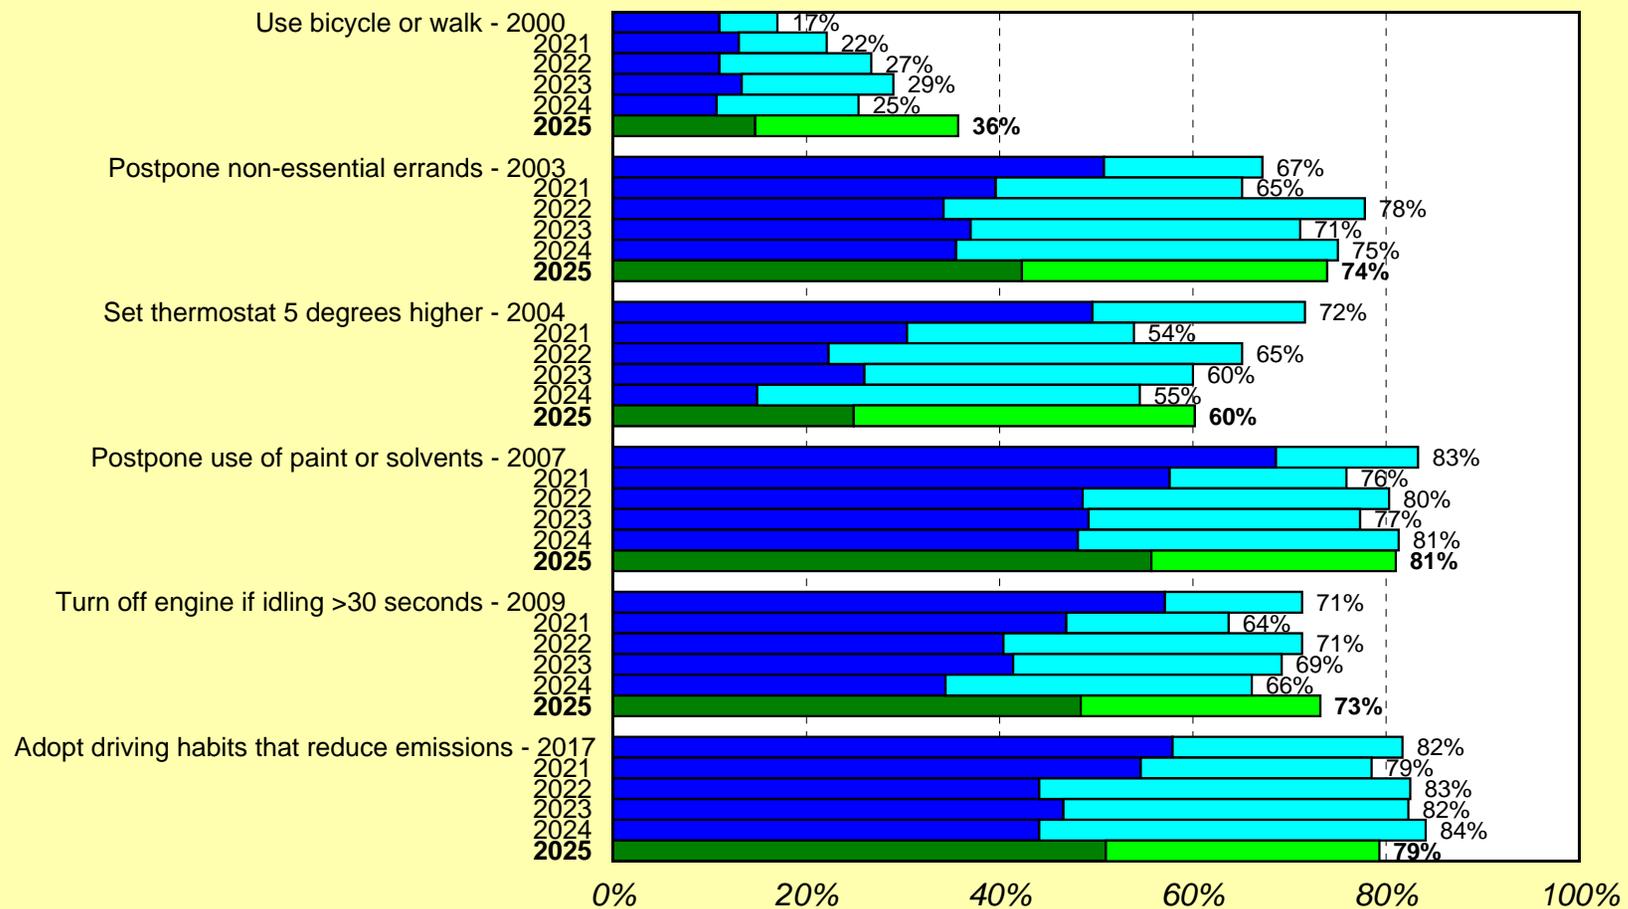

TREND DATA

Q17a (CONTINUED): Willingness of Residents to Do Various Activities on an Ozone Action Alert Day in the Kansas City Area

(Residents rated their willingness on a scale of 1-5 where 5 was "very willing" and 1 was "not willing")

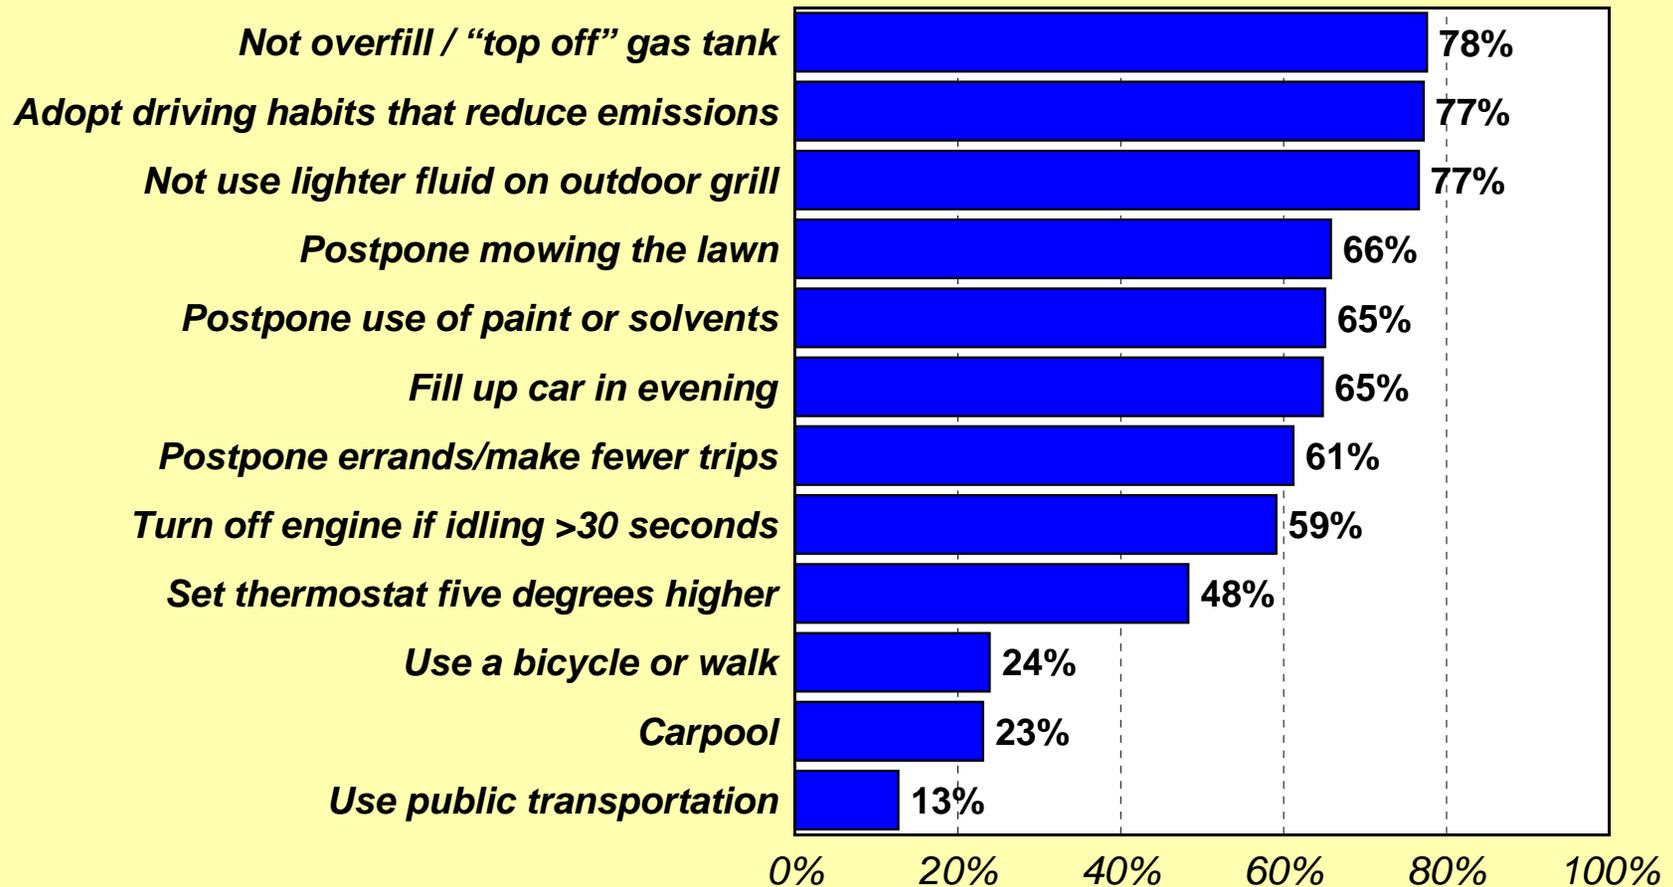

By percentage of respondents who were "very willing" or "willing"

TREND DATA

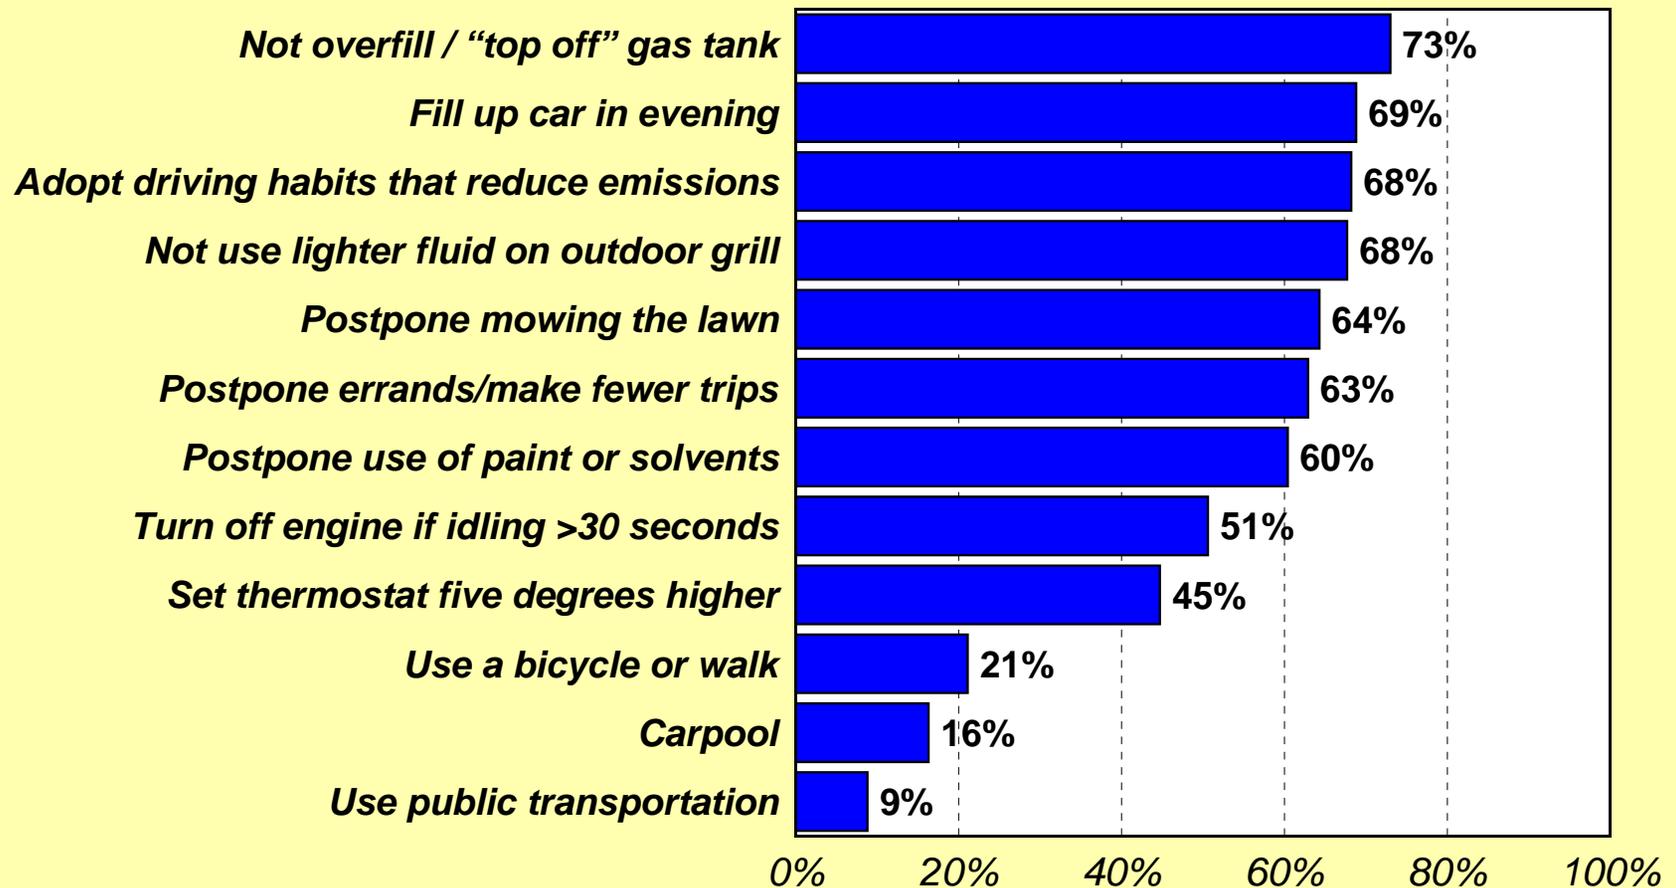

Q17b: Actions Kansas City Area Residents Do Regularly (Even When It Is NOT an Ozone Action Alert Day)

By percentage of respondents

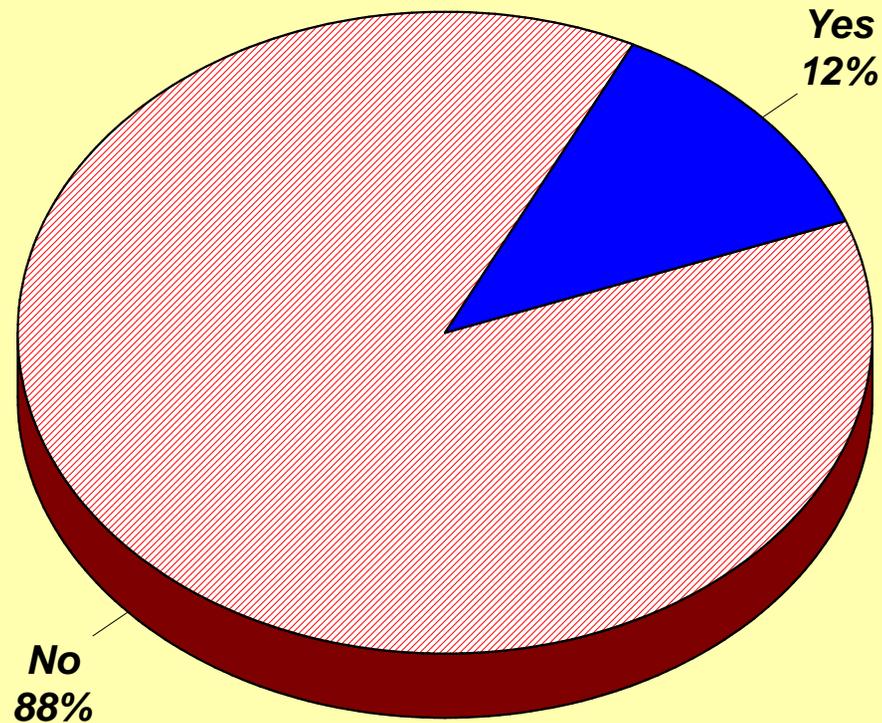

Q17c: Actions Kansas City Area Residents Already Do In Response to an Ozone Action Alert Day Notification

By percentage of respondents

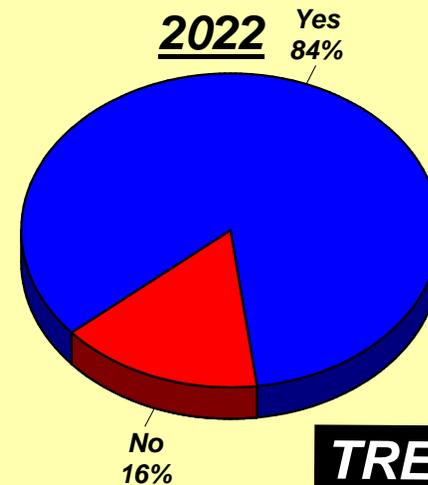

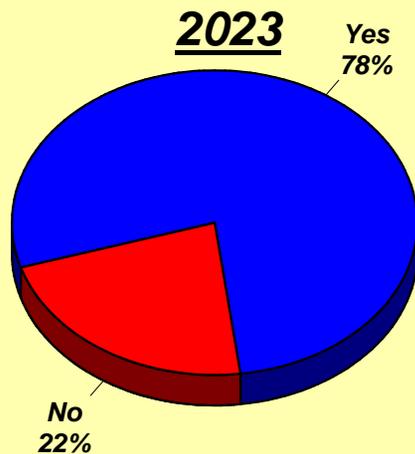

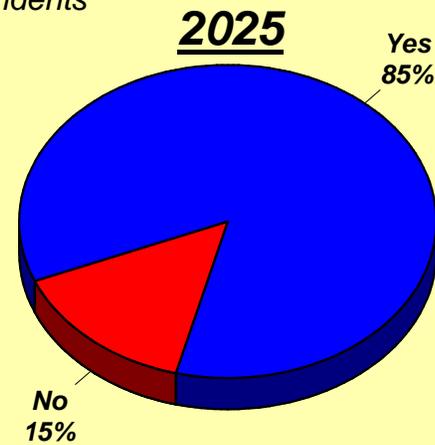

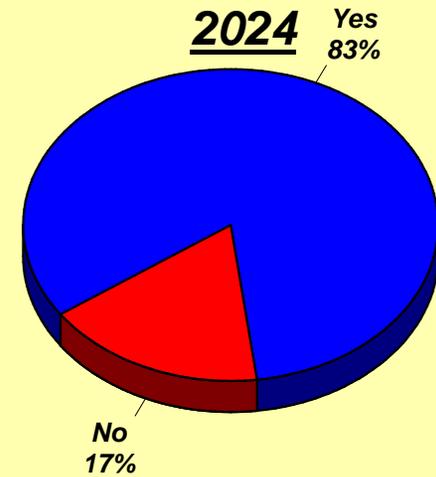

Q18: Have you heard about the AirQ Program or AirQKC.org?
By percentage of respondents

Q19: Do you or would you support efforts by your Municipal/County government to reduce greenhouse gas emissions?

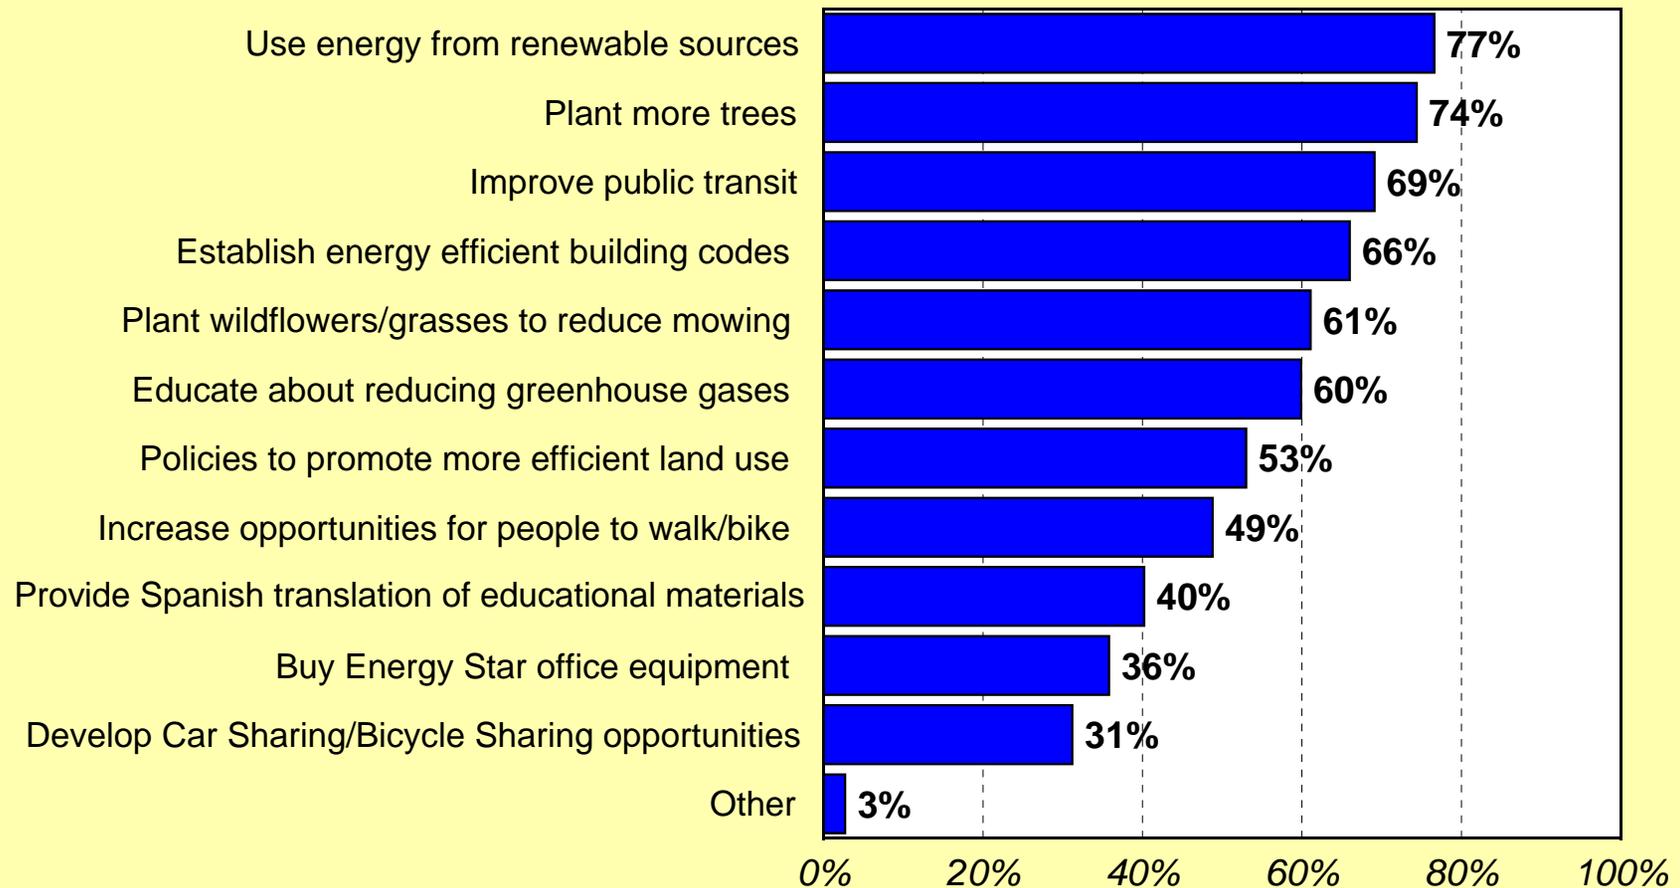

By percentage of respondents

TREND DATA

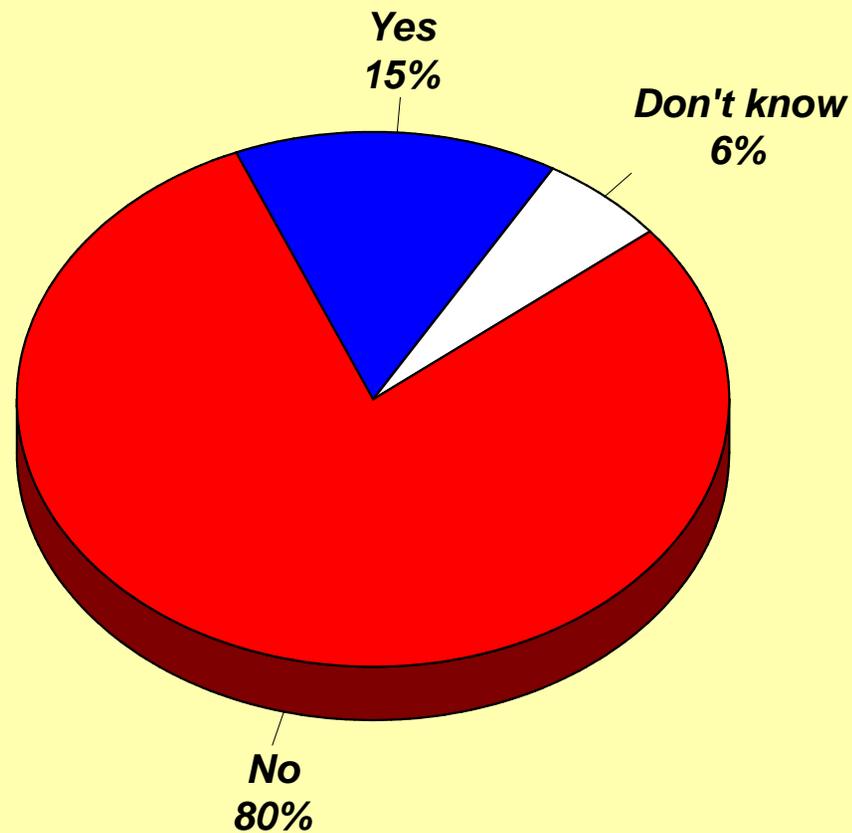

Q19a: Which of the following do you think should be the top strategies your municipal or county government should use to reduce greenhouse gas emissions?

By percentage of respondents (multiple selections could be made)

Q20: Have You Heard About “Operation Green Light”?

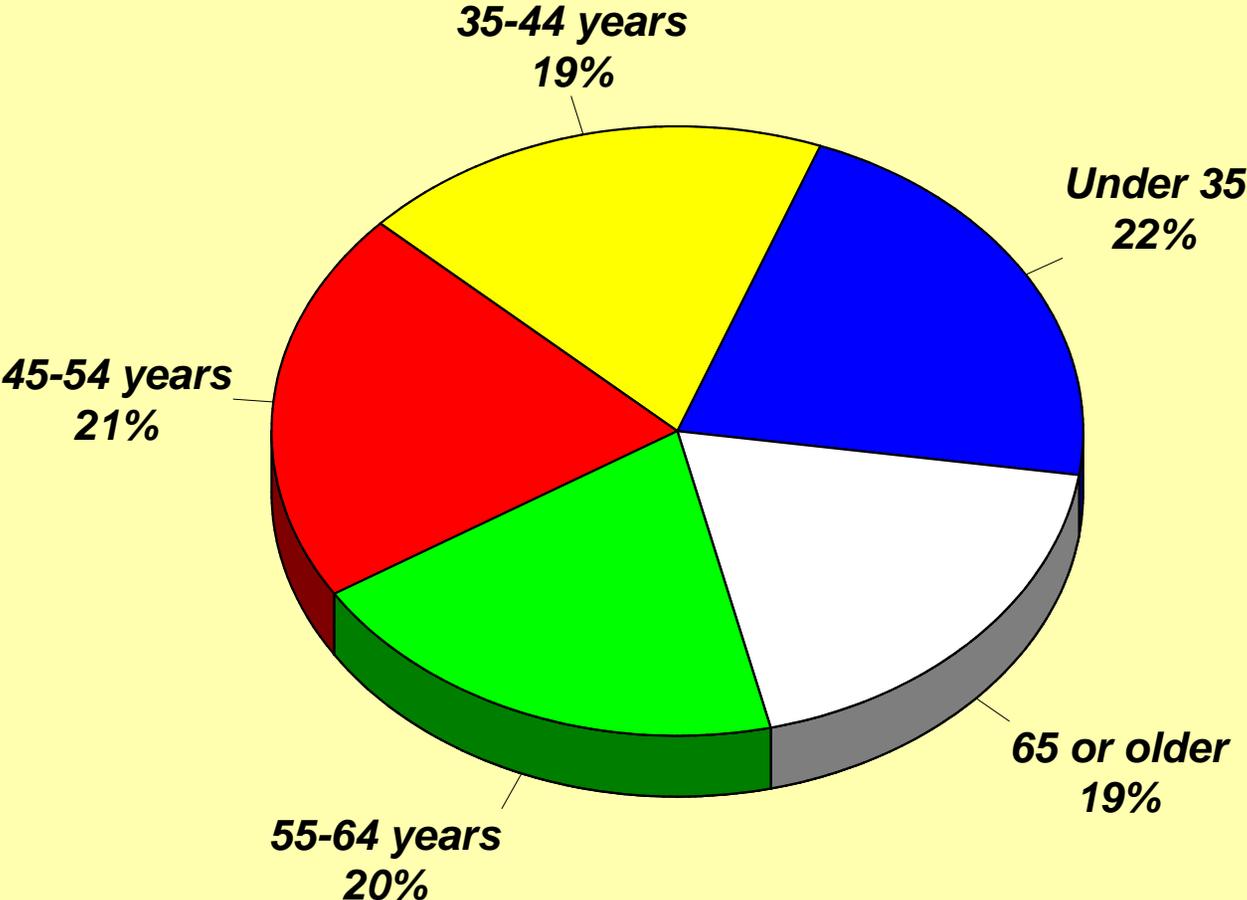

By percentage of respondents

Demographics

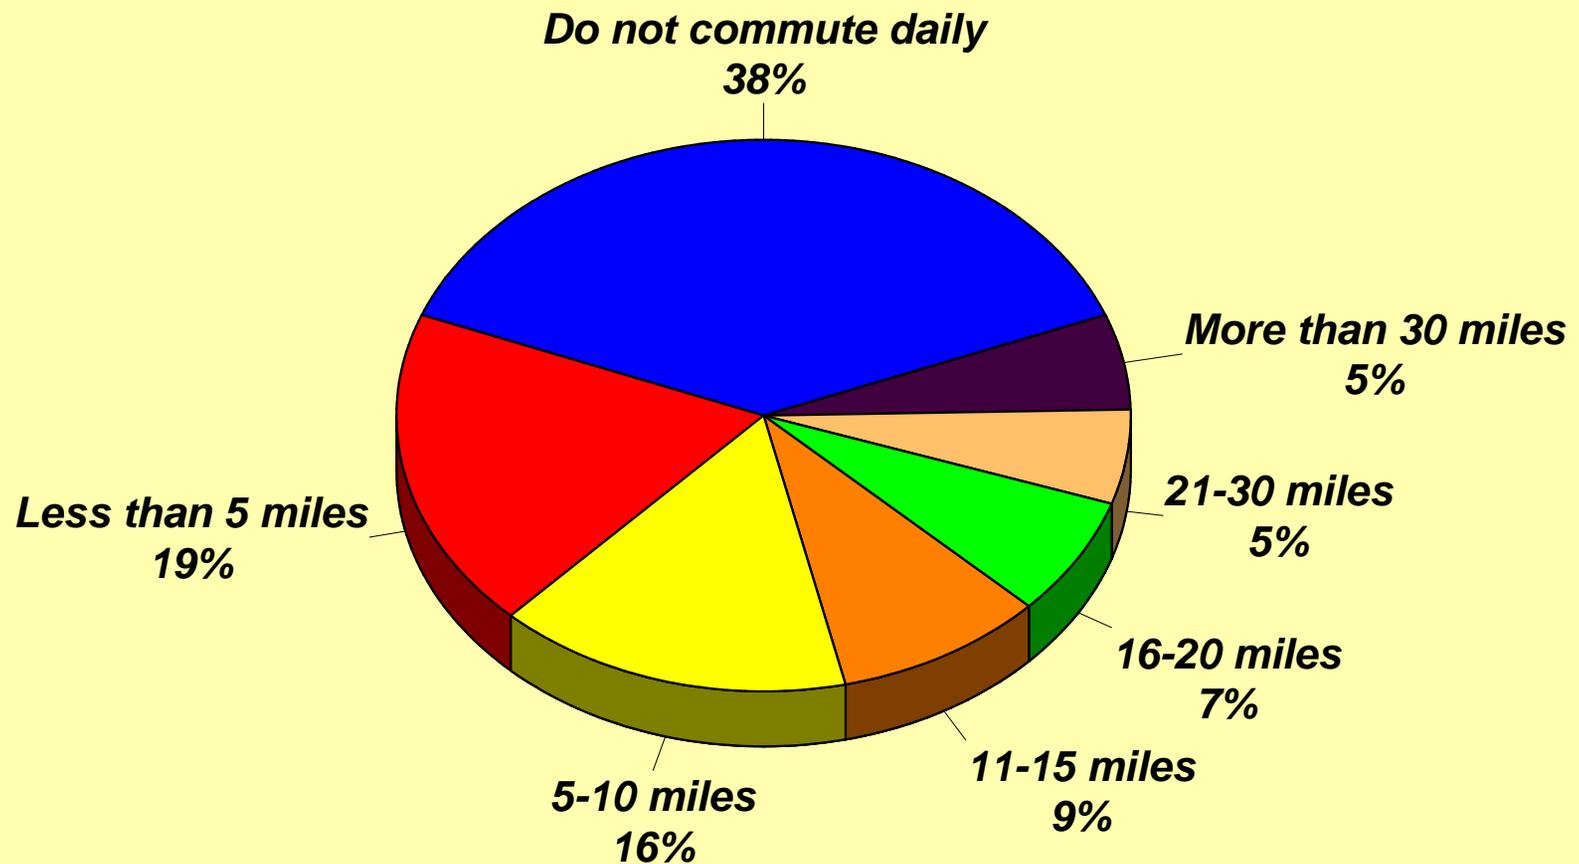

Age of Respondents

By percentage of respondents

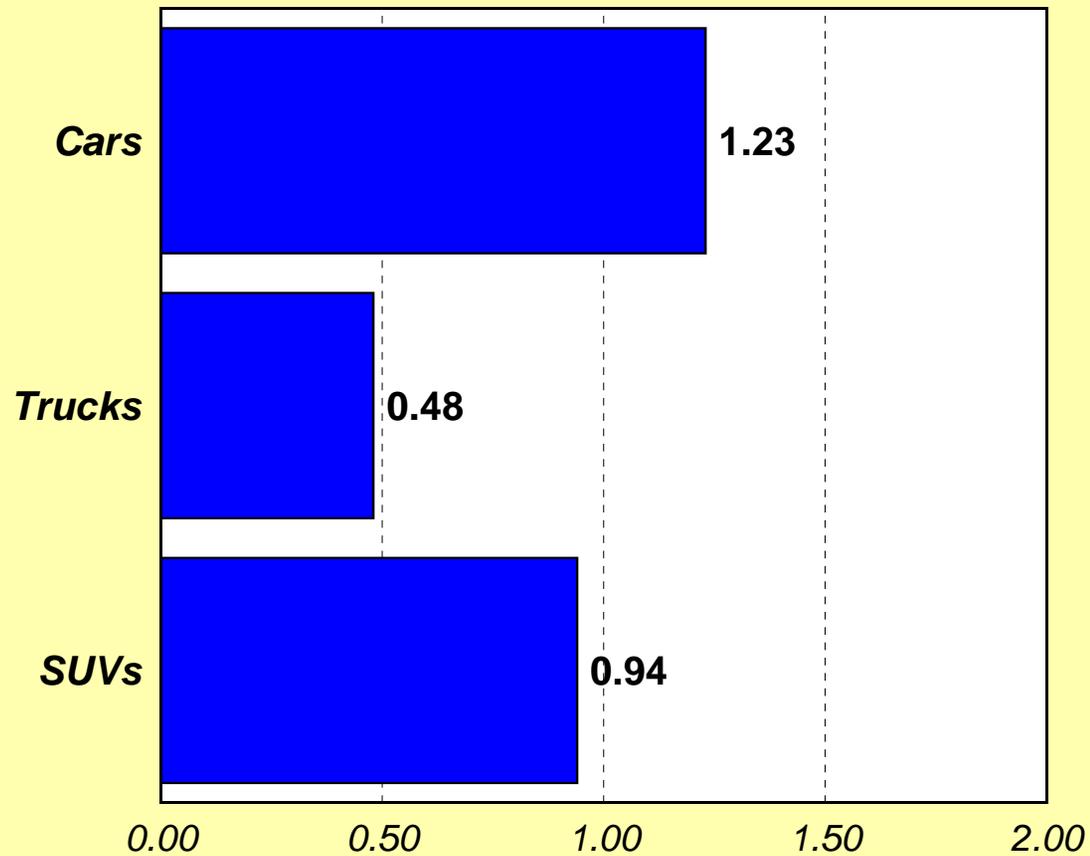

Average Distance of Normal Daily Commute (one way)

By percentage of respondents

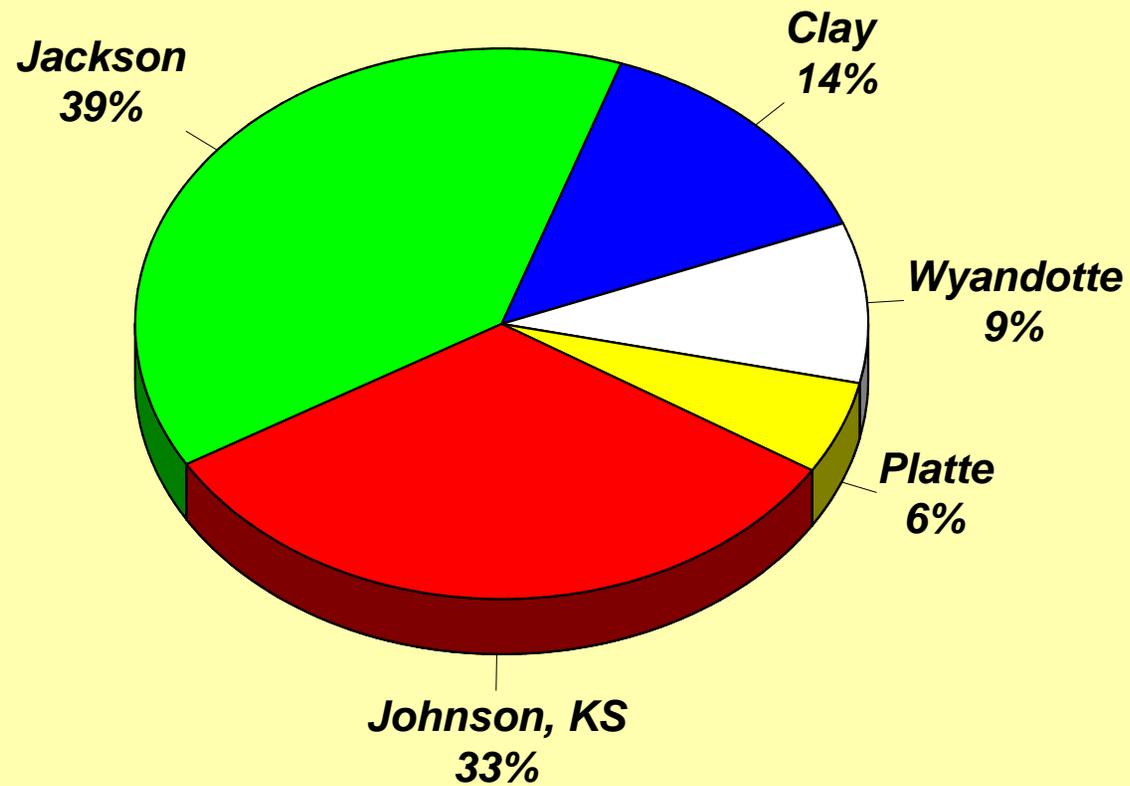

Number of Vehicles Owned by Household

Avg. Number of Vehicles Per Household = 2.17

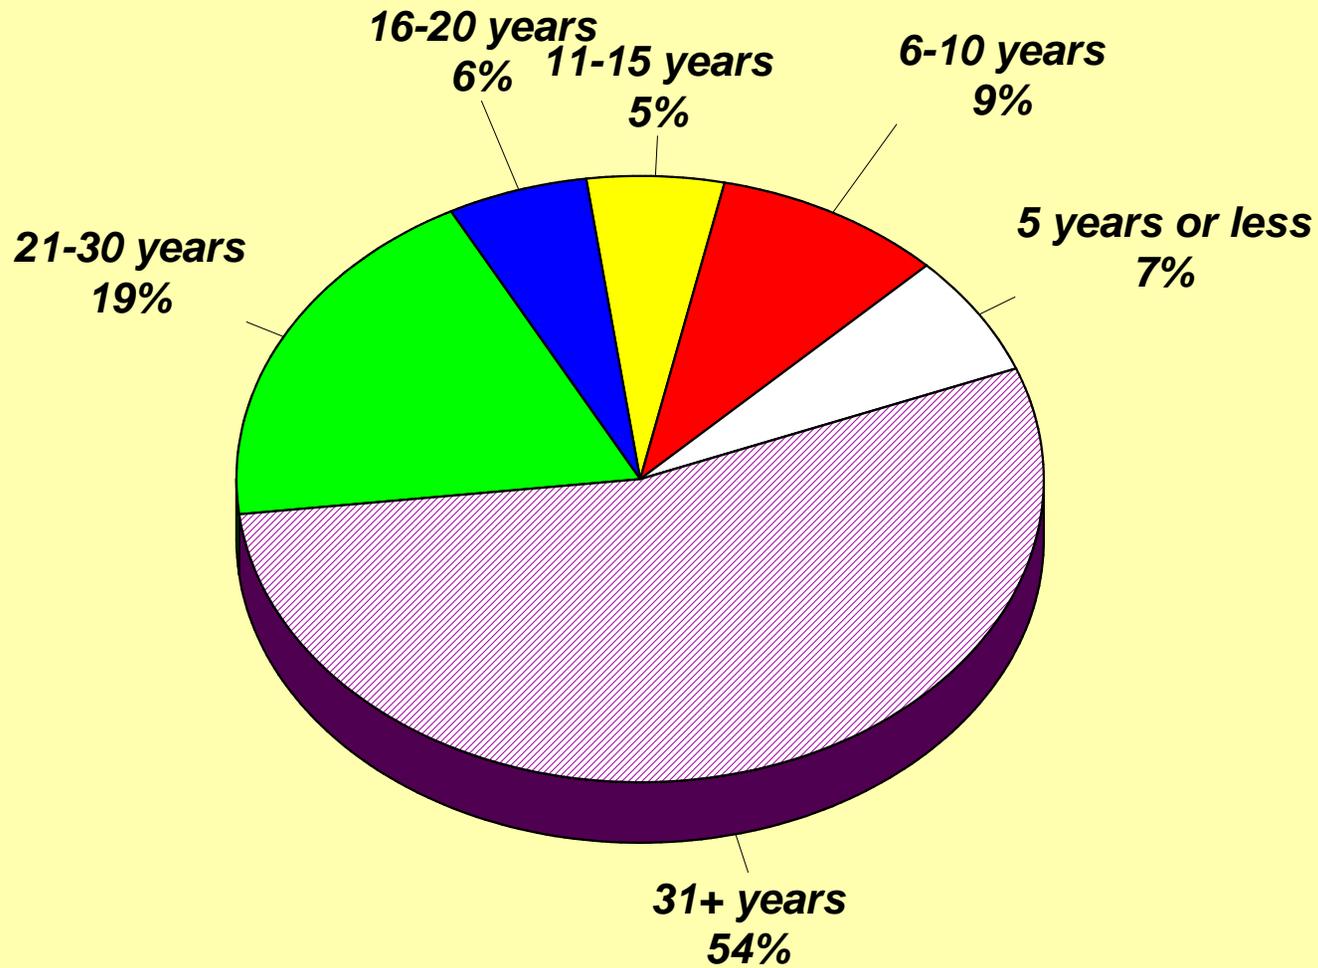

County Where Respondents Live

By percentage of respondents

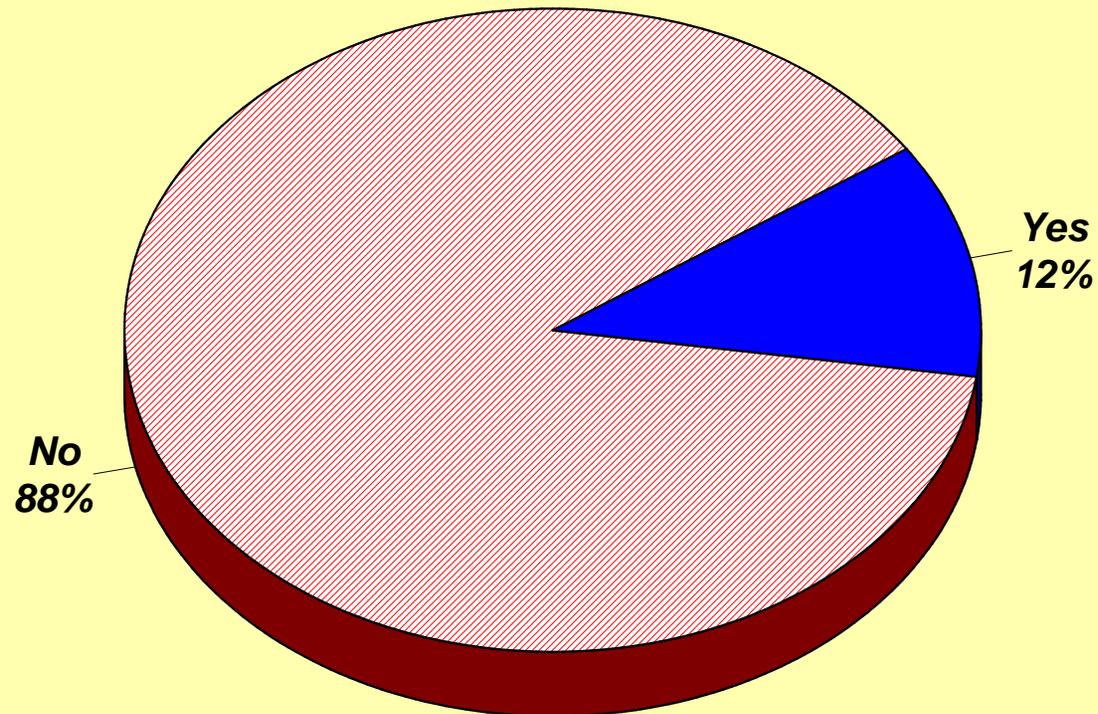

How long have you lived in the Kansas City area?

By percentage of respondents

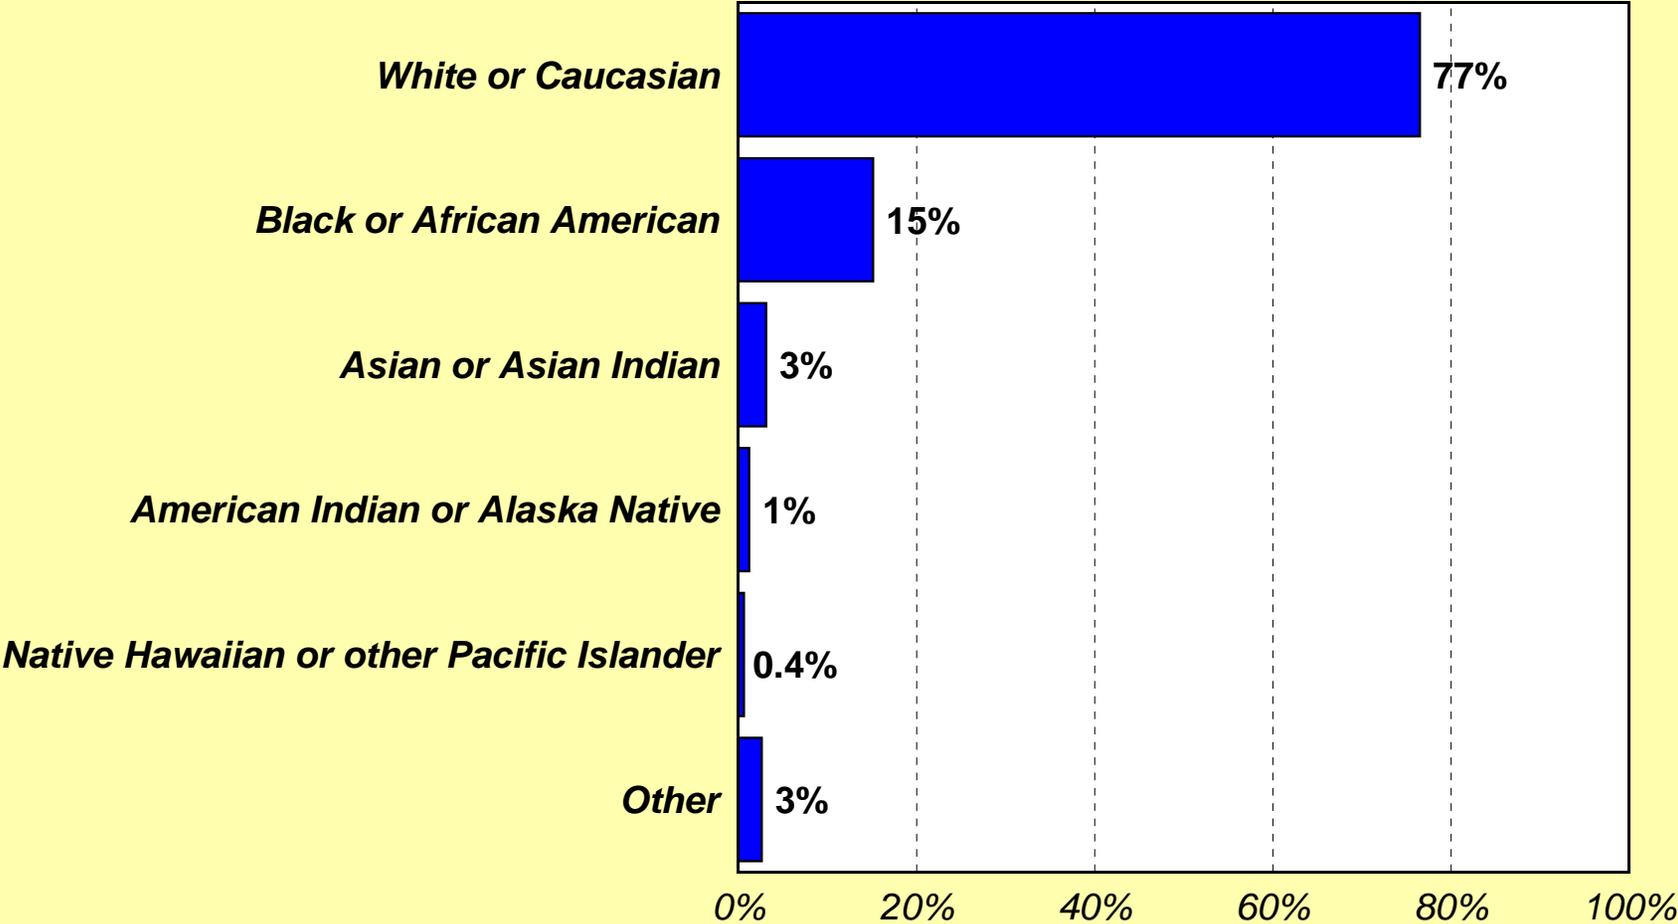

Are you or other members of your family of Hispanic, Spanish, or or Latino/a/x ancestry?

By percentage of respondents

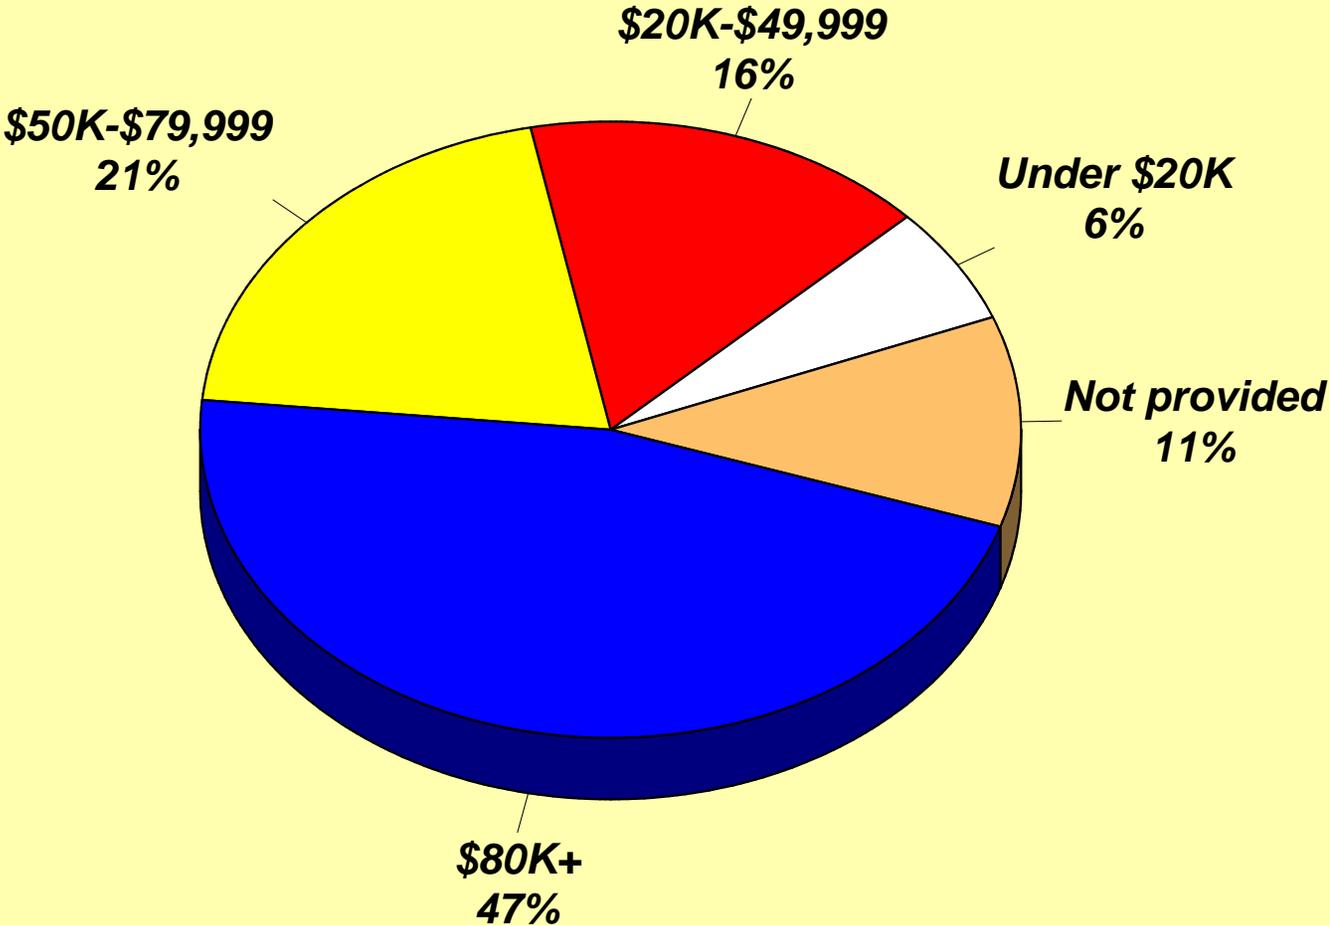

Race/Ethnicity

By percentage of respondents (multiple selections could be made)

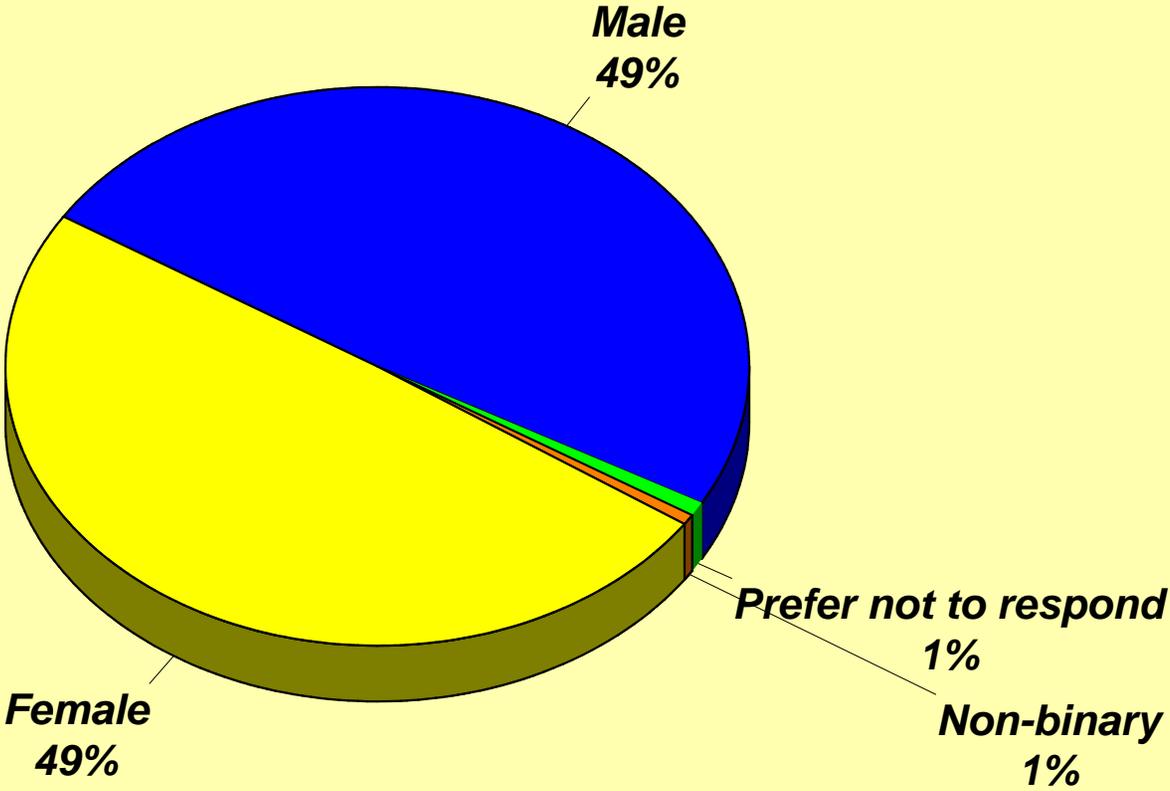

Annual Household Income

By percentage of respondents

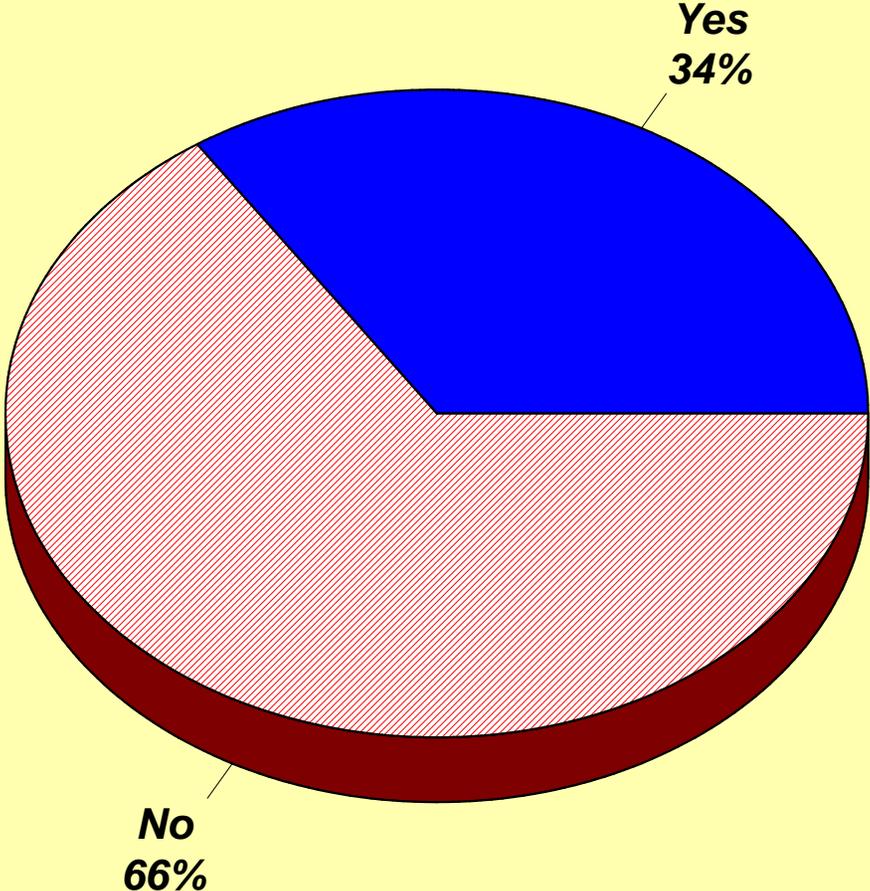

Gender of Respondents

By percentage of respondents

Households with Children 17 Years or Younger

By percentage of respondents

Section 2:
Tabular Data

Q1. Compared to last year, would you say you...

Q1. What would you say you are compared to last year	Number	Percent
Are more aware of air quality issues in Kansas City area	222	26.6 %
Have about the same level of awareness of air quality issues	547	65.5 %
Are less aware of air quality issues in Kansas City area	50	6.0 %
Not applicable (did not live in Kansas City area last year)	8	1.0 %
Not provided	8	1.0 %
Total	835	100.0 %

WITHOUT “NOT PROVIDED”

Q1. Compared to last year, would you say you... (without "not provided")

Q1. What would you say you are compared to last year	Number	Percent
Are more aware of air quality issues in Kansas City area	222	26.8 %
Have about the same level of awareness of air quality issues	547	66.1 %
Are less aware of air quality issues in Kansas City area	50	6.0 %
Not applicable (did not live in Kansas City area last year)	8	1.0 %
Total	827	100.0 %

Q2. Do you think that our natural environment will be better in the future?

Q2. Do you think that our natural environment will be better in the future	Number	Percent
Yes	146	17.5 %
No	477	57.1 %
Don't know	212	25.4 %
Total	835	100.0 %

Q10. Which TWO of the items listed in Question 9 above do you think are the MOST IMPORTANT reasons to reduce air pollution?

<u>Q10. Top choice</u>	<u>Number</u>	<u>Percent</u>
Global warming/climate change	304	36.4 %
Reducing smog	44	5.3 %
Health effects of air pollution	261	31.3 %
Energy independence	34	4.1 %
Knowing about new regulations due to EPA violations	5	0.6 %
Knowing an OZONE ALERT has been issued	41	4.9 %
Feeling the action is the "right thing to do" or good for the environment	33	4.0 %
Knowing the action you do is easy & will not interfere with your routine	11	1.3 %
Knowing that you could save money	39	4.7 %
Reducing your carbon footprint	14	1.7 %
Knowing that your local government has developed or is developing a climate protection plan	39	4.7 %
<u>None chosen</u>	<u>10</u>	<u>1.2 %</u>
Total	835	100.0 %

Q10. Which TWO of the items listed in Question 9 above do you think are the MOST IMPORTANT reasons to reduce air pollution?

<u>Q10. 2nd choice</u>	<u>Number</u>	<u>Percent</u>
Global warming/climate change	120	14.4 %
Reducing smog	64	7.7 %
Health effects of air pollution	249	29.8 %
Energy independence	57	6.8 %
Knowing about new regulations due to EPA violations	11	1.3 %
Knowing an OZONE ALERT has been issued	59	7.1 %
Feeling the action is the "right thing to do" or good for the environment	63	7.5 %
Knowing the action you do is easy & will not interfere with your routine	53	6.3 %
Knowing that you could save money	67	8.0 %
Reducing your carbon footprint	40	4.8 %
Knowing that your local government has developed or is developing a climate protection plan	32	3.8 %
<u>None chosen</u>	<u>20</u>	<u>2.4 %</u>
Total	835	100.0 %

SUM OF TOP 2 CHOICES**Q10. Which TWO of the items listed in Question 9 above do you think are the MOST IMPORTANT reasons to reduce air pollution? (top 2)**

Q10. Sum of top 2 choices	Number	Percent
Global warming/climate change	424	50.8 %
Reducing smog	108	12.9 %
Health effects of air pollution	510	61.1 %
Energy independence	91	10.9 %
Knowing about new regulations due to EPA violations	16	1.9 %
Knowing an OZONE ALERT has been issued	100	12.0 %
Feeling the action is the "right thing to do" or good for the environment	96	11.5 %
Knowing the action you do is easy & will not interfere with your routine	64	7.7 %
Knowing that you could save money	106	12.7 %
Reducing your carbon footprint	54	6.5 %
Knowing that your local government has developed or is developing a climate protection plan	71	8.5 %
None chosen	10	1.2 %
Total	1650

High ozone levels in the air	508	68.6 %
The air is dirty/polluted	229	30.9 %
The hole in the ozone layer has made it unhealthy to be outside	177	23.9 %
High mold/pollen levels in the air	103	13.9 %
High tire particle counts in the air	60	8.1 %
Other	13	1.8 %
Total	1090	

Q14-6. Other

- DIFFICULT TO BREATHE
- It usually means high smog levels are expected due to reduced wind combined with sunshine. CO is carbon monoxide aka smog, O₂ is oxygen is healthy oxygen we breath. High levels of CO + O₂ + O₂ with sunshine to excite the particles causes a carbon from CO to move to an O₂ atom forming CO₂ (Carbon Dioxide) and the released Oxygen binds to the other O₂ forming O₃ (Ozone). O₃ is harmful in the body because it is circulated in our blood like O₂, but the extra O is unstable. So it will often in the blood turn into O₂ + O. The O can then bind elsewhere destroying cells or creating toxins based on what happens to bump into in the bloodstream.
- POTENTIAL FOR HIGH POLLUTION
- Skip mowing the grass. Wait to buy gas or do it at the coolest time of day.
- Stay inside
- The air is unhealthy. When I first started hearing about them, I kind of scoffed because I'm a former smoker and I figured my lungs could handle it. Then I went outside to do yard work and I had to go in after 20 minutes. I felt like I had chained smoked an entire pack of cigs in that time, which isn't really possible.
- The hole in the ozone has been relatively repaired but I imagine this alert would indicate that if actions are not taken that the hole could regrow
- There are more efficient, productive and less costly things to spend government money. Eliminate.
- Those with lung problems need to take care.
- UV Rays are bad.

Q15. How important is it for you to know when it is an "OZONE ALERT" day in the Kansas City area?

Q15. How important is it for you to know when it is an "OZONE ALERT" day in Kansas City area	Number	Percent

Q17-12. Adopt driving habits that reduce emissions, such as reducing rapid acceleration & driving to maintain your speed	77.2%	22.8%
Q17-13. Other	48.8%	51.2%

Q17-13. Other

- A different choice other than the choices listed.
- Any other suggested better for the environment.
- Any that can help
- Any that would be recommended.
- Avoid travel if possible.
- Avoid using a charcoal grill or fire pit.
- Combine errands and plan route focused on farthest to closest stores to minimize gas needed leading to less emissions.
- Consolidate errands
- Dependent on activity
- Depends
- Depends on what other options are.
- Do away with cigarettes.
- DRIVE AN ELECTRIC CAR
- Driving less, whatever it takes
- Driving our electric vehicle
- Educate family members
- Fix infrastructure. No stop lights on Federal and State Highway / Freeway will reduce emissions 80%
Put in one way feeder roads along freeways I70, I35, I29, I435, I49, I670, 40 Highway, 78 Highway, 50 Highway, etc.
Make bridges on freeway so cross roads go under bridge.
Combine exit / entrance to freeways with feeder roads. I.e. model after Texas Systems.
Stop all building within 150 feet each side of freeways for expansion and feeder road systems.
- Gazing up car certain times, mowing certain times
- Have Hawthorn over spray ammonia to reduce NOx emissions.
- I am very concerned about those who have breathing problems and contamination of our parks and gardens.
- I bought a plug in hybrid car
- I garden to provide food for pollinators.
- I hate when people idle in parking lots! Outside ice cream places or picking up food parked outside a patio. I would love to see No Idle signs in parking lots!!!! Billy doesn't idle!!! Neither should you!!
- I hoped answering "Other" would give me a chance to say this: Why on earth would I want use a bicycle or walk to work or to run errands if an Ozone Action Alert is in effect because of poor air quality? Bicycle? Walk? Outside in the midst of a serious air quality event? Are you kidding?
- I purchased a hybrid vehicle to help the environment.
- I reduce and avoid all activities that can negatively effect air quality.
- If asked to not use appliances certain hours of the day.
- If asked to postpone work that would drive up the air quality concerns.
- If public transit was practical, I'd much prefer it to driving my car. But I'm not paying utilities and Kansas City taxes to sit in 80° "air conditioning" when it's 100 degrees outside.
- If we had electric public transportation I would use it occasionally. If it was provided free to residents my kids and I would use it regularly to visit our shopping centers even if I have a vehicle to use as well. We would need a local route in prairie village to make use of it. At least stops at the middle school, village shops, shawnee mission east high school, and corinth square along mission road. I would prefer if this electric bus was just local to prairie village. I do not feel safe about my kids riding a bus that takes them outside our community without me with them. So this would be for local transportation only.
- Industrial activity is the cause of most pollutants, have industry find means to reduce those pollutants must be priority. Blaming individuals as culprits is ludicrous, although I agree every one can chip in.
- KEEP CAR TUNED UP
- Literally anything.
- Live closer to where I work or work from home

Q17-13. Other

- Mostly use public transportation now. Have set thermostat 7 degrees there in summer and 10 degrees lower in winter. Walk more. Very energy conscious at home. Dislike that Energy is still using so many coal run power plants. Has not buried lines that was promised years ago. Has not improved the grid that numerous rate increases were supposed to correct. Would prefer solar. And wind energy even hydro. Not nuclear as been discussed. Solar panels can be recycled as can turbines. Nuclear waste is a dangerous substance and difficult to be rid of.
- No burning of yard waste or having any outdoor fires
- Not driving or staying inside
- Plant native plants to help as well as trees
- Planting trees and plants that help with air quality
- Reduce wasteful activities and products/deliveries
- Remind others of ways to reduce pollution
- Schedule or activity changes.
- Staying home
- Staying home
- Things that are achievable and realistic
- Throw all the MAGA politicians in the trash.
- Use an EV car
- Use battery powered lawn equipment.
- Use electric lawn and garden tools.
- Utilization of leased solar panels from Evergy
- Wait to burn
- Walk to work
- Walking in to a business instead of using a driving lane. Bought a hybrid. (Which is why I answered “not willing” to turn off car when idling.
- We own an electric hybrid.
- We have 1 electric car and an electric lawn mower already. Our gas vehicles don’t get used on bad days or very often. Carpooling not an option; retired. Never use lighter fluid.
- We have switch to electric cars. We also try to commute and use our bikes. There MUST be more driver education to accompany the bike paths. The cars have no respect and as a family. I’m unwilling to have our 9 year old on many of the paths. Some are okay.
- Whatever is needed
- Whatever is suggested
- Whatever it takes
- Whatever it takes to protect the environment and hopefully save money. I’m open to ideas.
- Whatever works but uses common sense, not just pretty words.
- Work from home
- Work remote, stay inside, check on elderly neighbors to make sure they’re aware of air conditions
- You dumped toxic lithium plant in backyard for \$4,000,000,000 of our dollars. You are sticking us with electrical vehicles that cause massive lack of electricity. Don’t you know Bill Gates wants to darken skies against Solar and wind? Don’t you know AI center looking at gigawatt energy generation need?

Q17. Do you already do this in response to an "Ozone Action Alert" Day?

(N=835)

	Yes	No	Not provided

	Number	Percent
Yes	676	85.0 %
No	119	15.0 %
Total	795	100.0 %

Q19a. Which of the following do you think should be the top strategies your Municipal or County government should use to reduce greenhouse gas emissions?

Q19a. Which following should be the top strategies your municipal or county government should use to reduce greenhouse gas emissions

	Number	Percent
Improve public transit	467	69.1 %
Increase opportunities for people to walk & bicycle	330	48.8 %
Establish policies that promote more efficient land use	358	53.0 %
Plant more trees	503	74.4 %
Reduce the need for lawn mowing by planting wildflowers & native grasses	413	61.1 %
Buy Energy Star office equipment	242	35.8 %
Educate government employees & local residents about things individuals can do to reduce greenhouse gases	405	59.9 %
Provide Spanish translation of educational materials about things individuals can do to reduce greenhouse gas emissions	272	40.2 %
Use energy from renewable sources like solar & wind	518	76.6 %
Establish energy efficient building codes	446	66.0 %
Develop car sharing or bicycle sharing opportunities	211	31.2 %
Other	18	2.7 %
Total	4183	

Q19a-12. Other

- Additional green spaces/parks/outdoor recreation areas
- Alternate road repair efforts to reduce delays and more circles less traffic lights
- Develop and deploy electric bike rebate programs like what exist in Denver and Atlanta.
- Do not raise taxes or fees, and spend funds already appropriated for environmental purposes responsibly, and wisely
- Encourage businesses and office complexes to adopt these strategies- higher thermostat settings, reducing lights, better building codes, encouraging employee activities.
- I think Prairie Village should look into adding it's own municipal utility for power. So it can establish pricing, rate plans, and neighborhood battery packs to better utilize solar. For example the current time of use energy plan from Evergy will not allow solar panels and surplus energy in the solar plans only compensate overproduction of energy at a very low rate. Surplus solar energy should be sold back at about 25% less than what it is being sold for in that time of use window. So if it's .12 per kwh at noon we should compensate people with solar panels at .09 per kwh for their surplus for their neighbors. Battery packs should be in neighborhoods and the packs should be recharged at night when surplus wind energy is present at wholesale rates (often under .03/kwh) and then provided to residents during the day. These pricing structures should make it profitable to add neighborhood batteries and for residents to add solar with a ROI of under 10 yrs. Partnering with local banks should streamline the process for residents.
- I've heard about communities participating in a program to measure their carbon footprint while trying to reduce it. There's lots of outreach, publicity, and encouragement. Then, at the end, there's the "reveal" and celebration if the results are positive. They even brag with signs by the city-limits signs. Looks like it would be a community builder or, at least, get people talking. Local municipalities could compete.
- Incentivize corporations, which by far cause the most amount of pollution compared to individual citizens, to reduce greenhouse admissions and fine those that don't comply
- LET PEOPLE MAKE THEIR OWN CHOICE
- More television and news stories, Instagram postings and alerts
- One big thing never mentioned here is the role of corporations and billionaires. With the reduction of regulations they are doing far more to destroy our world than any individual. Focus more on that.

Q19a-12. Other

- Promote work from home options.
- Protect mature trees.
- Publicize in a variety of ways and locations the importance and benefits -- both short term and long term -- of reducing greenhouse gas emissions. Actively enlist churches, synagogues, mosques and other spiritual/religious communities in the area seeking greater involvement in these initiatives.
- PURCHASE ELECTRIC POLICE CARS
- Shorten that work week?
- Stop using coal power plants. Promote solar, wind and Hydro power plants. Bury power lines for safety. Promote planting more trees and allowing prairie grass lawns in the city and along highways.
- Stop using gas powered lawn equipment. It stinks and is too loud. Too much herbicide and pesticide use. This makes living in Fairway unacceptable. Herb and pesticides spraying should be banned. If you want it, tent your yard. I don't want it!
- Work from home

Section 3:
Survey Instrument

March 2025

Air Quality: Make your voice heard

Dear Clay, Jackson, Johnson, Platte and Wyandotte County residents:

The MARC Air Quality Program is conducting a survey to help us better understand how residents feel about a wide range of issues related to regional air quality, including:

- Your perceptions of air quality in the Kansas City region.
- How you receive air quality information and alerts.
- How often you do activities that affect our air quality.
- How important air quality is to you.

Your feedback will help us set priorities, adjust our outreach activities and identify important educational messages for the coming year.

We have contracted with ETC Institute, a professional survey firm in Olathe, KS, to conduct this survey. Your address was selected at random for participation. All individual responses are confidential, and results will be shared only in a summary format. Please complete the survey and return it in the enclosed postage-paid envelope within the next two weeks. If you prefer to take the survey online, you may do so at MARCAirQualitySurvey.com. As our way of thanking everyone who participates, ETC Institute will randomly select one respondent to receive a \$500 Visa gift card.

The results of the 2025 survey will be available this summer at marc.org/environment/air-quality/air-quality-public-awareness-survey.

Thank you for taking the time to complete the survey. Your participation will benefit all Kansas City metro area residents.

If you have any questions, please feel free to contact Doug Norsby, Air Quality Planner at the Mid-America Regional Council, at (816) 474-4240 or airq@marc.org.

Sincerely,

A handwritten signature in black ink that reads "Douglas J. Norsby". The signature is written in a cursive style with a large, prominent "D" and "N".

Doug Norsby
Air Quality Program
Mid-America Regional Council

2025 MARC Air Quality Survey

Thank you for taking the time to complete this important survey! Your input will be used to determine perceptions of air quality issues in the metropolitan Kansas City area. This survey takes approximately 15 minutes to complete. When finished, please return your completed survey in the postage-paid envelope provided; you may also complete this survey online at MARCAirQualitySurvey.com. **Everyone who completes the survey will be given a chance to enter a random drawing for a \$500 Visa gift card.** If you have questions about the survey, please contact Doug Norsby at (816) 474-4240 or airq@marc.org. Thank you!

1. Compared to last year, would you say you...

- (1) Are more aware of air quality issues in the Kansas City area
- (2) Have about the same level of awareness of air quality issues
- (3) Are less aware of air quality issues in the Kansas City area
- (4) Not applicable (did not live in the Kansas City area last year)

2. Do you think that our natural environment will be better in the future?

- (1) Yes
- (2) No
- (9) Don't know

3. Do you think air pollution in the Kansas City area is...

- (1) Getting much worse
- (2) Getting somewhat worse
- (3) Staying the same
- (4) Getting somewhat better
- (5) Getting much better
- (9) Don't know

4. On average, how many days per year do you think metropolitan Kansas City's air pollution levels fail to meet the health standards set by the Environmental Protection Agency?

- (1) Zero (air is always healthy)
- (2) 1-5 days
- (3) 6-10 days
- (4) 11-15 days
- (5) 16-20 days
- (6) More than 20 days
- (9) Don't know

5. Do you or does anyone in your household have a breathing or respiratory problem?

- (1) Yes
- (2) No

6. How concerned are you about the health consequences of poor air quality in the Kansas City area?

- (4) Very concerned
- (3) Somewhat concerned
- (2) Not sure
- (1) Not concerned

7. Have you seen or heard any advertisements, public service announcements, brochures, billboards, radio or other promotional media about air quality in the Kansas City area during the past year?

- (1) Yes [Answer Q7a-b.]
- (2) No [Skip to Q8.]
- (9) Don't know [Skip to Q8.]

7a. What types of promotional media did you see or hear? [Check all that apply.]

- (01) Billboards
- (02) Advertisements in newspapers, magazines, or other print media
- (03) Television news/weather
- (04) Commercial TV advertising
- (05) Spanish language communications
- (06) Bus advertisements
- (07) Brochures
- (08) Radio
- (09) Streaming radio
- (10) KC Scout lighted highway message boards
- (11) Social media ('X', Facebook, Instagram, etc.)
- (12) YouTube (pre-roll ads or program videos)
- (13) Internet (other than social media)
- (14) Digital Images at KCI Airport
- (15) Other: _____

7b. Using the list from Question 7a on the previous page, write the number of the ONE promotional media that is your most frequent source of information about air quality. [Write in your answer below using the numbers from the list in Question 7a.]

MOST FREQUENT information source: _____

8. Which THREE of the following sources would you MOST prefer to receive information about air quality in your community? [Write in your answers using the numbers from the list below.]

- | | |
|--|--------------------------|
| 01. Internet source that is easy to find | 07. City newsletter |
| 02. Facebook | 08. Your local newspaper |
| 03. 'X' | 09. Kansas City Star |
| 04. Instagram | 10. Television |
| 05. Email | 11. Radio |
| 06. Specific telephone number to get information | |

1st: _____ 2nd: _____ 3rd: _____

9. People reduce air pollution for different reasons. Using a 5-point scale where 5 means "A Lot of Motivation" and 1 means "Little Motivation," please indicate how much motivation the following give you to help reduce air pollution?

Reasons	A Lot of Motivation	*	*	*	Little Motivation	Not Sure
01. Global warming/climate change	5	4	3	2	1	9
02. Reducing smog	5	4	3	2	1	9
03. Health effects of air pollution	5	4	3	2	1	9
04. Energy independence	5	4	3	2	1	9
05. Knowing about new regulations due to EPA violations	5	4	3	2	1	9
06. Knowing an OZONE ACTION ALERT has been issued	5	4	3	2	1	9
07. Feeling the action is the "right thing to do" or good for the environment	5	4	3	2	1	9
08. Knowing the action you do is easy and will not interfere with your routine	5	4	3	2	1	9
09. Knowing that you could save money	5	4	3	2	1	9
10. Reducing your carbon footprint	5	4	3	2	1	9
11. Knowing that your local government has developed or is developing a climate protection plan	5	4	3	2	1	9

10. Which TWO of the items listed in Question 9 above do you think are the MOST IMPORTANT reasons to reduce air pollution? [Write in your answers below using the numbers from the list in Question 9.]

1st: _____ 2nd: _____

11. Do you remember seeing or hearing specific notifications about days with high levels of smoke or particulate matter?

____(1) Yes ____ (2) No

12. Have you seen Ozone "SKYCAST" information during the weather forecast on local television news or a Spanish-language TV station?

____(1) Yes [Answer Q12a-b.] ____ (2) No [Skip to Q13.]

12a. On which TV stations have you seen "SKYCAST" information? [Check all that apply.]

- | | | |
|--------------------------|-------------------------|----------------------|
| ____(1) NBC - Channel 41 | ____(3) Fox - Channel 4 | ____(5) Other: _____ |
| ____(2) CBS - Channel 5 | ____(4) ABC - Channel 9 | |

12b. How important do you think it is for local television stations to provide "SKYCAST" information?

____(4) Very important ____ (3) Somewhat important ____ (2) Not sure ____ (1) Not important

13. Do you remember hearing specific notifications about any "OZONE ACTION ALERT" days?

____(1) Yes ____ (2) No

14. What do you think an "OZONE ACTION ALERT" day means? [Check all that apply.]

- ____(1) High mold/pollen levels in the air
- ____(2) High tire particle counts in the air
- ____(3) High ozone levels in the air
- ____(4) The hole in the ozone layer has made it unhealthy to be outside
- ____(5) The air is dirty/polluted
- ____(6) Other: _____
- ____(7) I don't know what an "OZONE ACTION ALERT" day means

15. How important is it for you to know when it is an "OZONE ACTION ALERT" day in the Kansas City area?

____(4) Very important ____ (3) Somewhat important ____ (2) Not sure ____ (1) Not important

16. Have you seen or heard the phrase "OZONE ACTION ALERT" used to describe air quality in the Kansas City area from any of the following sources? [Check all that apply.]

- ____(01) Newspaper
- ____(02) Radio
- ____(03) Streaming audio (Pandora/Spotify)
- ____(04) Morning television
- ____(05) Evening television
- ____(06) Website(s): _____
- ____(07) KC Scout lighted highway message boards
- ____(08) Electronic billboards
- ____(09) Social media ('X', Facebook, Instagram, etc.)
- ____(10) Other: _____

16a. Referring to the list in Question 16 above, write the number of the ONE source you consult most often. [Write in your answer below using the numbers from the list in Question 16.]

Source consulted MOST OFTEN: ____

17. An air pollution "OZONE ACTION ALERT" indicates that weather conditions may lead to poor air quality. Using a scale from 1 to 5, where 5 means "Very Willing" and 1 means "Not Willing," how willing would you be to do each of the following on an "OZONE ACTION ALERT" day in the Kansas City area?

Activity	Very Willing	Willing	Neutral	Unwilling	Very Unwilling	Not Sure	Do you already do this regularly (even when it is not an Ozone Action Alert day)?		Do you already do this in response to an Ozone Action Alert Day?	
							Yes	No	Yes	No
01. Carpool to reduce travel miles	5	4	3	2	1	9	Yes	No	Yes	No
02. Postpone mowing lawn with gasoline-powered lawnmower until the next good or "GREEN" air quality day	5	4	3	2	1	9	Yes	No	Yes	No
03. Not use lighter fluid on an outdoor charcoal grill	5	4	3	2	1	9	Yes	No	Yes	No
