

MID-AMERICA REGIONAL COUNCIL/KANSAS CITY REGIONAL PURCHASING COOPERATIVE

600 BROADWAY SUITE 200, KANSAS CITY MO 64105-1659 www.marc.org

ADDENDUM: 2

BID NO./TITLE: Bid No. 111 - Yearly Contract for Water & Waste Water Chemicals

ISSUE DATE: March 29, 2024

BIDS DUE: April 12, 2024 1:00 p.m. (Changed under Addendum 1 issued March 26)

Clarification requests received as of March 25, 2024, with response as follows

- 1. Holding Station, Overland Park, Kansas mentions bulk deliveries for sodium bisulfite (SBS) on page 16:
 - Q. How many gallons for estimated usage?
 - A. 1,000 gallons a year
 - Q. How many tanks and at what volume?
 - A. Two (2) 550 gallons each (1,100 total)
 - Q. On Appendix A which part of the pricing table is this chemical associated?
 - A. Appendix A, line items 11 and 12 do not include the Holding Station, Overland Park as this is usually paid/shared delivery out of the Nelson Complex.
- 2. Martway Holding Station, Mission, Kansas- mentions bulk deliveries for sodium bisulfite (SBS) on page 16.
 - Q. How many gallons for estimated usage?
 - A. 1,000 gallons a year
 - Q. How many tanks and at what volume?
 - A. Two (2) 755 gallons (1,600 total)
 - Q. Which part of the pricing table is this chemical listed on Appendix A?
 - A. This is usually paid/shared delivery out of Nelson Complex and not listed separately as a line item.
- 3. Nelson Complex, Mission Kansas
 - Q. Page 16 lists SBS totes only, however there is a requirement on Appendix A, page 23 for 70,000 gallons in bulk delivery.
 - A. The requirement on Appendix A, page 23 is correct. Nelson Complex needs both bulk and totes of SBS.
 - Q. If there is a bulk delivery requirement, what size tank is on premises and full truck load deliveries?
 - A. One (1) 6,500 gallons tank
- 4. Tomahawk Creek Plant, Leawood, Kansas
 - Q. On page 17 there are no storage capabilities shown for 130,000 gallons of sodium bisulfite (SBS), only mention of sodium metabisulfite in 50 LB. bags.
 - A. **DELETE** reference to sodium metabisulfite. Tomahawk Creek Plant uses sodium bisulfite (SBS) for dechlorination.
 - Q. What is the estimated gallons usage for sodium bisulfite (SBS)?
 - A. Listed volume is correct (130,000 gallons).

| | Q. A. | How many SBS storage tanks and at what volume? Two (2) – 6,500 gallons each | | | | | | | |
